1 Introduction

1.1 About the Company

The Oriental Insurance Company Limited (OICL), a public sector undertaking dealing in non-life insurance, is ahead of its peers in the industry in adopting information technology. OICL has been enjoying the highest rating from leading Indian credit rating agencies such as CRISIL and ICRA.

OICL has its head office at New Delhi, Primary Data Centre (DC) at Bengaluru & Secondary Data Centre (SDC/DRS) at Mumbai, 31 regional offices in various cities, Oriental Staff Training College (OSTC) at Faridabad and Chennai, 350+ divisional offices, 500+ branch offices, Regional Training Centers, 28 Claims Service centers, 32 TP Hubs and 900+ extension counters/micro offices geographically spread out across India.

Major OICL offices are provisioned with dual active-active links using MPLS over RF and leased lines. Smaller offices are provisioned with single links using either MPLS over RFP, Leased lines, VSATs or 2FA VPN connectivity over internet. For more than a decade, OICL has leveraged information technology to serve its customers effectively.

Apart from the Core-Insurance application (INLIAS), OICL has deployed various centralized applications viz web portal, Investment Management System (SAP Based), HRMS (PeopleSoft), E-mail, (MS Exchange), Video Conferencing, Proxy etc. Co-hosted at its Data Centers at Mumbai and Bengaluru. These Data Centers are equipped with enterprise class IT infrastructure. The company has sold more than 12 million policies in the year 2017-18. The Company has more than 100 general insurance products to cater to the varied insurance needs of its customers. It also has a strong workforce of about 15,000 employees and over 35,000 agents. The Company has a web portal www.orientalinsurance.org.in for use of its customers and agents with a provision for online issue/renewal of policies.

1.2 Notice Inviting Bids

The Chief Manager (IT) invites sealed bids from eligible Bidders for selection of vendor for Supply, Installation, Implementation, Integration, Maintenance and Support of Security System.

1.3 Project Objective

The Oriental Insurance Company Limited (OICL) intends to **select a bidder for Supply, Installation, Implementation, Integration, Maintenance and Support of Security System** for a period of five year (Extendable for one year on mutually agreed terms and conditions).

2	The bidder should have an annual turnover of Rs.200 crore (Rupees Three Hundred Crores) per annum for last 3 financial years (i.e. 2014-15, 2015-16 and 2016-17).	Copy of Audited Financial Statements (P&L and Balance Sheet) for the FY 2014-15, 2015-16 & 2016-17 and CA Certificate
3	Should have a positive net worth positive for each of the last three (3) financial years. Net worth is to be calculated as follows: Capital Funds (Paid up equity capital + Paid up preference shares + Free reserves) – (Accumulated balance of loss + Balance of deferred revenue expenditure + Other intangible assets).	Copy of Audited Financial Statements (P&L and Balance Sheet) for the FY 2014-15, 2015-16 & 2016-17 and CA Certificate (Certificate should indicate that the net-worth is calculated using the mentioned formula)
4	The Bidder should not have been blacklisted by the any Government or PSU enterprise or Regulatory/Statutory Body in India as on the date of bid submission.	Self-Declaration/ Undertaking to be submitted by the bidder
5	The bidder should have been operational in India for minimum of five (5) years as on the date of bid submission	Self-Declaration/ Undertaking to this effect to be submitted by the bidder
6	The Bidder must have presence in India and should have support center in Delhi NCR, Mumbai & Bangalore.	Self-Declaration/ Undertaking to this effect to be submitted by the bidder

Sr. No.	Eligibility Criteria	Supporting Documents
Credentials and Experience		
7	The Bidder should have implemented or have under implementation any 3 of the below mentioned security solutions for at least 1 BFSI with at least 1000 offices i. SIEM ii. NAC iii. MDM iv. DDoS v. PIM vi. DAM	Successful completion certificates or Credential Letters Or Copy of Contract / Purchase order from the Client for implemented projects Or Copy of Contract / Purchase order for under implementation projects
8	The bidder must have minimum five (5) IT Security professionals on their payroll with certification in CISA or CISSP or CISM or any other relevant / OEM professional certification in the field of IT Security.	Self-Declaration/ Undertaking to this effect to be submitted by the bidder
9	The Bidder must warrant that key project personnel to be deployed in this project have been sufficiently involved in the similar project (SIEM/NAC/MDM/DDoS/PIM/DAM) in the past.	Self-Declaration/ Undertaking to this effect to be submitted by the bidder AND Details of the personnel indicating their qualifications, professional experience and projects handled
10	Bidder should be either Original Equipment Manufacturer (OEM) of Security devices/software solutions or authorized partner of OEM. In case the bidder is an Authorized partner of the OEM, Bidder has to submit the authorization letter from the OEM.	Authorization letter on OEM's letterhead

Sr. No.	Eligibility Criteria	Supporting Documents
11	Bidder is required to submit the OEM Associations and support agreement in the form Manufacturer's Authorization Form for this project on OEM letterhead.	Manufacturer's Authorization Form MAF from the OEM should fulfill the below mentioned intents. 1.) We who are established and reputable manufacturers/ producers of _____ having factories/ development facilities at (address of factory/ facility) do hereby authorize M/s _____ (Name and address of the bidder) to submit a Bid, and sign the contract with you against the above Bid Invitation 2.) We hereby extend our warranty for the Solution, Products and services offered by the above firm against this Bid Invitation.
12	The proposed Solutions, namely: i. MDM ii. SIEM iii. DDoS should be in Gartner's Leaders/ challengers quadrant or leaders/strong player in forester wave and the following solution proposed should have been implemented/under implementation in at least 2 BFSI with 1000 branches in India i. NAC ii. PIM iii. DAM	Latest Gartner Report for the Mentioned Solutions Or Relevant Credential Letter Or Copy of Contract / Purchase order from the Client for implemented projects Or Copy of Contract / Purchase order for under implementation projects

Note:

- i. Bidders need to ensure compliance to all the eligibility criteria points.
- ii. Public Sector / scheduled commercial banks do not include regional rural banks and cooperative banks.

- iii. In-case of corporate restructuring the earlier entity's incorporation certificate, financial statements, Credentials, etc. may be considered.
- iv. In case of business transfer where bidder has acquired a Business from an entity ("Seller"), work experience credentials of the Seller in relation to the acquired Business may be considered.
- v. Purchase orders without relevant organization confirmation through a credential letter will not be considered as credentials.
- vi. While submitting the bid, the Bidder is required to comply with inter alia the following CVC guidelines detailed in Circular No. 03/01/12 (No.12-02-6 CTE/SPI (I) 2 / 161730 dated 13.01.2012): 'Commission has decided that in all cases of procurement, the following guidelines may be followed:
 - a. *In a RFP, either the Indian agent on behalf of the Principal/OEM or Principal/OEM itself can bid but both cannot bid simultaneously for the same item/product in the same RFP. The reference of 'item/product' in the CVC guidelines refer to 'the final solution that bidders will deliver to the customer.*
 - b. *If an agent submits bid on behalf of the Principal/OEM, the same agent shall not submit a bid on behalf of another Principal/OEM in the same RFP for the same item/product.'*

1.7 Project Timelines

The Project Manager/Coordinator shall submit weekly report on the progress of the project to OICL and appraise the activities completed during the week and activities to be taken up in next week. Necessary assistance from OICL officials will be provided to ensure that activities will be completed in time. The detailed activities to be completed in each phase are mentioned below along with the timelines.

S.No.	Solution	Item	Timelines
1	SIEM, NAC, MDM, DDoS , PIM and DAM Solution	Delivery of equipment and licenses.	8 Weeks from the Date of Issuance of PO
		Installation, commissioning and implementation	34 Weeks from the Date of Issuance of PO
2	VAPT	Submission of Interim Report and Recommendation	6 Weeks from the date of intimation from OICL for the Activity.
		Submission of Final Report and Recommendation	8 Weeks from the date of intimation from OICL for the Activity.
		Coordinate with Stakeholders in	Within 2 Months of acceptance of the

S.No.	Solution	Item	Timelines
		closures of Gaps Identified in the Final Report	Interim reports by OICL and intimation from OICL for closure

2 Scope of Work

2.1 Vision of the initiative

Cyber security has become a major concern over the past few years as hackers have penetrated the IT infrastructure of the enterprises with increasing frequency and sophistication. The protection of information infrastructure and preservation of the confidentiality, integrity and availability of information in cyberspace is the essence of a secure cyber space.

2.2 Overview of Scope

OICL intends to procure the security solutions to enhance the security landscape of OICL. The Scope includes procurement, installation, implementation, integration, maintenance and support of the solutions with all the relevant applications and infrastructure during the contract period. The objectives of the security solutions is as below.

The intent for Services/ Solutions is covered in the below functional principles:

- **Prevention & Identification of Information Security Vulnerabilities:** The services/ solutions should be able to identify information security vulnerabilities in OICL environment and prevent these vulnerabilities
- **Incident Management:** Reporting of information security incidents using appropriate tools. Track and monitor the closure of these information security incidents and escalation of these incidents to appropriate teams/ individuals in OICL
- **Continuous Improvement:** Continuously improve services/ solutions as per the requirements from OICL.

Based on the above principles, OICL has envisaged the following security solutions, required over and above their current existing set of solutions to enhance the robust monitoring that are compliant with ISO 27001, ISO 22301, PCI-DSS, OWASP etc.

- i. Security Information and Event Management (SIEM)
- ii. Network Access Control (NAC)
- iii. Mobile Device Management (MDM)
- iv. Distributed Denial of Service (DDOS)
- v. Privilege Identity management (PIM)
- vi. Database Activity Monitoring (DAM)

The Following are the brief activities bidder need to perform in order to successfully Supply, Installation, Implementation, Integration, Maintenance and Support of Security System:

- i. Bidder need to define in consultation with OICL different processes, policies, resources, technology, and interfaces.
- ii. Bidder should conduct comprehensive business requirement mapping session with OICL to understand their critical information/assets.
- iii. Bidder has to conduct policy identification exercise for target scope; perform asset

classification based on understanding of business flow of critical data and business impacting processes. Bidder has to provide adequate resources for implementation and facility management.

- iv. During the course of implementation OEM involvement should be spanning across all phases of implementation including Project Preparation, Solution Design Phase (Including Review/design of all the Policy Documents, Blueprints and other Solution documents), Configuration and Customization, Integration, Acceptance and Training. **Post Implementation** half yearly on site review of the implementation and adequate support is required from the OEM. OEM is required to submit the review report directly to OICL and bidder need to close the same. **OEM is required to provide the undertaking for the same**
- v. Bidder has to ensure that the end to end installation, configuration, parameterization, customization, implementation, integration, support and maintenance of all the solutions at central site i.e. DC & DR and branches/ offices is to be carried out as per the OICL Policies
- vi. Bidder has to ensure procurement of the necessary solutions and the corresponding hardware, software, database etc. required for implementing the proposed solutions.
- vii. Bidder should take complete ownership to deploy the solutions seamlessly in existing infrastructure, if any up-grade/Update or replacement needed in existing infrastructure has to be informed to OICL during the requirement gathering stage by bidder to deploy the solution with proper documentation.
- viii. Bidder is required to work with the existing System Integrator(s) of the OICL to integrate the security solutions with existing application platforms, server and storage environment, enterprise network, existing ISP, EMS/ NMS solutions, security solutions, ticketing tools etc.
- ix. Bidder is required to provide the necessary personnel to manage the operations for the solutions in scope and to ensure SLA compliance
- x. OICL reserves the right not to procure/implement any or all of the proposed tools mentioned in this RFP. In such cases, only the cost for tools procured and/or implemented would only be payable to the bidder on pro-rata basis.
- xi. OICL will provide the network bandwidth for the in-scope solution. However bidder is required to study the existing bandwidth at OICL Premises and then need to suggest OICL with the bandwidth requirement for in- scope solution, if any upgrade is required in terms of bandwidth bidder is required to provide OICL with necessary documentation and support in order to upgrade the bandwidth(if required, OICL will upgrade the Bandwidth post review of the submitted documents and bidder is not required to factor in any cost for upgrade of bandwidth). It is expected that the proposed solution to consume minimal bandwidth, so that it should not impact OICL day to day business operations.
- xii. OICL will provide the required Ethernet switch ports. However bidder is required to mention the number of Ethernet switch ports required for in- scope solution.
- xiii. Bidder should bring all the tools and equipment (Including Fiber Cable and copper cables) for successful commissioning of hardware and software for successful implementation of Solution
- xiv. Bidder should be responsible for performing all the adequate cabling activity related to server, storage, appliances, SAN, LAN etc. at OICL locations for successful commissioning of hardware and software. OICL Data Center and Disaster Recovery Center Runs on Fiber Channel
- xv. The bidder shall provide the detailed technical architecture comprising of hardware (including configuration) with operating systems and other application software in their technical bid.
- xvi. The bidder shall be responsible for generation and submission of necessary documents

- required during various phases of project viz. planning, installation, commissioning, rollout, acceptance testing, project diagrams, LLD, HLD and other documents/reports etc. All such documents shall be considered only after the same is approved by OICL.
- xvii. Bidder to provide regular updates/upgrades/patches released by the OEM during the entire contract period and shall document and provide the documents to OICL detailing all the changes in the solution and/or hardware. If required, bidder is required to provide the training to OICL Officials of all the changes made in the solution at no additional cost to OICL during the contract period.
 - xviii. All updates/upgrades/patches has to be applied in the UAT Environment within 15 days of release of updates/upgrades/patches by the OEM and approved by OICL. Updates/upgrades/patches has to be applied in Production, within 60 days of release of updates/upgrades/patches by the OEM and approved by OICL. However there may be a requirement of deployment of critical patches on urgent basis, bidder to deploy the same post approval and as per the instructions from OICL
 - xix. Activities, specifications and Scope Mentioned in Appendix -1 Technical and Functional Specification and Annexure 15-Volumetric also forms the part of the Scope of Work.
 - xx. Scalability Principles: All the services/solutions offered should be modular, scalable, and should be able to meet OICL requirements during the period of contract.
 - xxi. Availability Principles: All the services/solutions in scope needs to be designed and implemented with adequate redundancy and fault tolerance to ensure compliance with SLAs for uptime as outlined in this RFP.
 - xxii. Performance Principles: It should be ensured that neither during installation nor during operations of the security solutions any of the existing infrastructure/ business of OICL is impacted.
 - xxiii. All the proposed security equipment/devices should be IPv6 compliant from Day 1.
 - xxiv. Bidder is required to adhere to Service Level Agreements (SLA), periodic monitoring and reporting requirement stated in the RFP and shall submit the report to OICL for the same.
 - xxv. Continual improvement of the Security Operations as defined in the SLA.
 - xxvi. The solutions deployed should be modular, scalable and should be able to address OICL requirements during the entire contract period, with the deployed hardware.
 - xxvii. The solutions and services in scope should be designed with adequate redundancy and fault tolerance to ensure compliance with SLAs for uptime as outlined in this RFP.
 - xxviii. The solutions should not have a significant impact on the existing infrastructure of the OICL either during installation or during operation of the solutions.
 - xxix. Bidder to submit the relevant documents substantiating that bidder has back-lined with the OEM for the entire contract duration within 15 days of issuance of PO by OICL, however at the time of bid submission the bidder has to submit the confirmation of back-lining on its letterhead duly signed and stamped.
 - xxx. The proposed x86 servers should be in latest report for Gartner's Leaders Quadrant or amongst top 3 in latest IDC report while the Proposed RISC servers should be from leading RISC based Server OEMs.
 - xxxi. Bidder should ensure dual power supply for all proposed hardware/appliances.
 - xxxii. Bidder to factor in the requirement from the Active Directory OEM (Microsoft) required in order to do the interfacing, troubleshooting, integration, customization, maintenance of the existing Active Directory solutions (Version – Microsoft 2012 R2 Standard Edition). It will be the bidder responsibility to provide adequate support for Active Directory from the AD

OEMs

- xxxiii. Bidder will be solely responsible for implementing and commissioning the solution (including software, hardware and required components) at DC, DRS and all the offices (Endpoints) in order to successfully implement and commission the proposed solutions
- xxxiv. Bidder is required to right size requirement (hardware and software), in case of any shortfall bidder will provide additional hardware & software in order to meet the requirement at no additional cost to OICL
- xxxv. The responsibility of integration of all the proposed solutions with the existing or any new security solutions procured by OICL during the contract period, if required, lies with the bidder selected through this RFP. The OICL shall provide adequate support to bidder for the purpose of integration
- xxxvi. OEM Effort should be at least **20% of the total implementation effort** spanning across implementation phase.
- xxxvii. OICL will not take any responsibility of any assumptions made by the bidder. It is the responsibility of the bidder to ensure successful implementation of the proposed solution. The bidder is also responsible for the accuracy of the bid and OICL is not liable for any errors or assumptions made by the bidder.
- xxxviii. All trainings will be arranged by the selected Bidder/OEM in OICL's premise. OICL will provide training room along with required no. of PCs and projector. Rest all expenses required for providing the training will be borne by Bidder.
- xxxix. The proposal submitted by the bidder should be a No-Deviation Bid, any assumption, deviation or conditions quoted by the bidder anywhere in the proposal stands null & void.

xl. Training :

- a. **Post Implementation:** Provide training to the OICL personnel on operations, alert monitoring, policy configuration, generation of reports, and analysis of the reports, Troubleshooting and familiarization of features and functionalities for all solutions independently.
- b. The Bidder shall provide comprehensive training manual and other training documentation for all trainings. The training material should be mandatorily in English.
- c. The Bidder may utilize the OEM resources in case the Bidder does not have adequately experienced resources for providing training.
- d. The bidder will have to ensure that training is imparted in a professional manner through qualified personnel's and Course materials would have to be provided for the same.

2.3 Geographical Location

For the purpose of solution/equipment implementation, the location of different sites is as follows:

Site Name	City	State
Data Centre(DC)	Bangalore	Karnataka
Disaster Recovery Center	Mumbai	Maharashtra

The List of OICL offices is provided in the Annexure 16: List of OICL Offices

2.4 Detailed Scope of Work

For the solutions in scope, the bidder is required to propose appliance, Hardware or software or a combination of hardware and software to meet the individual requirements put forward by OICL for the respective solutions. Bidder is required to Design, size, supply, install, commission and maintain the required security solutions for the period of contract.

2.4.1 Implementation & Integration

- i. Implementation of the specified solutions and necessary hardware as per the technical requirement specified in the RFP is the responsibility of the bidder. Selected Bidder to ensure that the proposed solution (hardware and software) complies with all the functional and technical requirements as provided in Appendix 1 Technical and Functional Requirements & Annexure 15-Volumetric.
- ii. 15 days before delivery of the solutions, the bidder is required to review the OICL environment and specify any additional requirements that OICL may need to provide for the implementation of the solution
- iii. The bidder should provide the architecture for implementing the security solution on Existing and any New Network, which OICL may procure during the contract period. It would be responsibility of the bidder to coordinate with the OICL Existing or any new Network Service Provider to ensure the proposed Security solutions is properly tested and made to work in OICL Environment.
- iv. Bidder is required to integrate all the proposed tools and/or solutions with the OICL provided ticketing tools in order to log tickets.
- v. The Bidder to ensure that the security solutions and their operations comply with OICL's information security policies and industry leading standards (such as ISO 27001, ISO 22301, PCIDSS, etc.) and any applicable laws and regulations
- vi. In addition, the bidder is responsible for impact assessment and modification of solution operations at no extra cost, on account of any changes to applicable information security policies/ procedures / standards/ regulations/any GOI Guidelines.
- vii. Integrate the following with SIEM solution to provide a single view of events generated at no additional cost to OICL during the contract period.
 - a. Proposed Solution and hardware
 - b. Existing Applications and Hardware
 - c. New Applications and hardware to be implemented during the contract period
 - d. Existing and New Devices
- viii. OEM needs to validate all the documents submitted by the bidder during the implementation till the Go-Live of the respective solutions and bidder to submit the validation confirmation from the OEMs.
- ix. Any interfaces required with existing and new applications/ infrastructure for successful implementation/ operations of the solution should be developed by the bidder.
- x. Bidder is responsible for developing and implementing the security configuration, hardening of all the devices and software that are procured for Security Operations. Also, they have to periodically review the guidelines and configure.

- xi. Bidder shall be responsible for timely compliance of all audits and Vulnerability Assessment (VA) audit observations as and when shared by OICL.
 - xii. Post implementation, the bidder is responsible for integrating any additional logs that the OICL may wish to monitor with the SIEM solution at no additional cost to the OICL. Logs needs to be integrated with the SIEM solution through automated or manual mode. Bidder is required to provide the feasibility for both the modes of integration in coordination with the existing vendors.
 - xiii. The major and primary responsibility of integration of solution with SIEM lies with the bidder selected through this RFP.
 - xiv. The bidder should note that the production, DR and non-production environment should be physically separate. Bidder can propose Logical separation / Virtualization within the Production, Non Production and DR Environment.
 - xv. Development and implementation of processes for management and operation including (but not limited to) the following processes:
 - a. Configuration and Change Management
 - b. Incident and Escalation management processes
 - c. Daily standard operating procedures
 - d. Training procedures and material
 - e. Reporting metrics and continuous improvement procedures
 - f. Data retention and disposal procedures
 - g. BCP and DR plan and procedures for Security Solutions
 - h. Security Patch management procedure
 - xvi. Implement necessary security measures for ensuring the information security of the proposed Solutions.
 - xvii. The technical bid should include an overview of the processes mentioned above.
 - a. Develop Escalation Matrix in order to handle Information Security Incidents efficiently.
 - b. Provide necessary documentation for the operation, integration, customization, and training of each of the solutions in scope.
 - xviii. **During Implementation Phase**, bidder should propose at least **one –Dedicated Project Manager** -100% Onsite Deployment (at Head Office), **One - Solution Architect**- Onsite Support to Project team on need basis, **One - Security Expert**- Onsite Support to Project team on need basis.
 - xix. Integration with EMS Solution for Maintenance and monitoring of supplied hardware is to be performed by the bidder.
 - xx. Bidder is required to prepare High Level Design Documents, Low Level Design Document, SRS, SOPs, Rules Document and configuration etc. in conjunction with OICL Officials.
 - xxi. Deployment Mode (Standalone/HA) for various solutions to be proposed is mentioned in the Annexure 15-Volmetric along with the required volumetrics, bidder to propose the solution complying the requirements stated in Appendix-1: Technical and Functional Requirement and Annexure 15-Volumetric.
- 2.4.2 Facility management
- i. The Facility Management Services have to be provided for the tenure of the contract post successful Go-Live of security solutions.

- ii. In case the resource goes on leave / absent/being replaced, OICL should be intimated prior and suitable replacements/backup should be arranged by the bidder to ensure that regular functioning of the offices/locations does not get hampered. Bidder has to provide the resumes of new resource, OICL may interview the proposed resource and confirm their acceptability. In any event if a resource is found unfit by OICL, bidder shall agree to change the same and provide OICL with a replacement within reasonable time so as to not affect the services/project timelines.
- iii. **Support Executives** proposed should have at least 3 years of relevant experience in providing the Facility Services Management for Security solutions.
- iv. Project Manager proposed should have at least 7 years of relevant experience in program managing any 3 of the below mentioned solutions
 - SIEM
 - NAC
 - MDM
 - DDoS
 - PIM
 - DAM
- v. Bidder will operate and maintain all the components of the Security Solutions (Software and Hardware) supplied through this RFP for the entire contract period. During Warranty and Maintenance phase, bidder shall ensure that service levels are monitored on continuous basis; service levels are met and are reported to OICL.
- vi. The bidder is required to establish the helpdesk and provide facilities management services to support the OICL officials in performing their day-to-day functions related to the provided system. The Bidder shall setup a central helpdesk dedicated (i.e. on premise) for the Project implemented. This helpdesk would be Operational upon implementation of the Project and/or any solution. Bidder shall deploy manpower during Implementation, Warranty and Maintenance phases. The deployed resource shall report to OICL's Project In-charge and work closely with Program Management Office of the project. Bidder may deploy additional resources based on the need of the project and to meet the defined SLAs.
- vii. Helpdesk with 24*7 support shall be deployed, who shall be responsible for handling calls related to queries, fault, reporting, operations, trouble ticketing etc. Each of these agent's system will be provided space, phone and a desktop for receiving incoming calls from users and answer their queries.
- viii. Bidder shall address all the errors/bugs/gaps in the functionality in the solution implemented (vis-à-vis the FRS, BRS and SRS signed off) at no additional cost during the Warranty and Maintenance phase.
- ix. All patches and upgrades (in Version) from OEMs shall be implemented by the Bidder ensuring customization done in the solution as per the OICL's requirements are applied. Technical upgrade of the installation to the new version, as and when required, shall be done by the Bidder. Any version upgrade (in Version) of the software / tool / appliance by Bidder to be done after taking prior approval of OICL and after submitting impact assessment of such upgrade at no additional cost to OICL.
- x. Any changes/upgrades (in Version) to the software performed during the support phase shall subject to the comprehensive and integrated testing by the Bidder to ensure that the changes

- implemented in the system meets the specified requirements and doesn't impact any other function of the system. Release management for application software will also require OICL approval. A detailed process in this regard will be finalized by Bidder in consultation with OICL. Any Major Version Upgrade which requires re-sizing of the hardware and software during the contract period will be taken separately on mutually agreed payment terms
- xi. Issue log for the errors and bugs identified in the solution and any change done in the solution shall be maintained by the bidder and should be periodically submitted to the OICL team.
 - xii. Bidder, at least on a monthly basis, will inform OICL about any new updates/upgrades available for all software components of the solution along with a detailed action report. In case of critical security patches/alerts, the bidder shall inform about the same immediately along with his recommendations. The report shall contain bidder's recommendations on update/upgrade, benefits, impact analysis etc. The bidder shall need to execute updates/upgrades through formal change management process and update all documentations and Knowledge databases etc. For updates and upgrades, Bidder will carry it out at no additional cost to OICL by following defined process.
 - a. Errors and bugs that persist for a long time, impact a wider range of users and is difficult to resolve becomes a problem. Bidder shall identify and resolve all the problems in the identified solution (e.g. system malfunctions, performance problems and data corruption etc.).
 - b. Monthly report on problem identified and resolved would be submitted to OICL team along with the recommended resolution.
 - xiii. All planned or emergency changes to any component of the system shall be through the approved Change Management process. The Bidder needs to follow all such processes (based on industry ITSM framework). For any change, Bidder shall ensure:
 - a. Detailed impact analysis
 - b. Change plan with Roll back plans
 - c. Appropriate communication on change required has taken place
 - d. Proper approvals have been received
 - e. Schedules have been adjusted to minimize impact on the production environment
 - f. All associated documentations are updated post stabilization of the change
 - g. Version control maintained for software changes. The bidder shall define the Software Change Management and Version control process. For any changes to the solution, Bidder has to prepare detailed documentation including proposed changes, impact to the system in terms of functional outcomes/additional features added to the system etc. Bidder shall ensure that software and hardware version control is done for entire duration of Bidder's contract.
 - xiv. Bidder shall maintain version control and configuration information for application software and any system documentation.
 - xv. Bidder shall maintain at least the following minimum documents with respect:
 - a. The Bidder shall perform an in-depth analysis of the existing system and shall submit a detailed plan for the implementation of this project, including but not limited to the following:
 - Project Plan detailing each task with target date and assigned resource persons and installation of all supplied items and integration with existing infrastructure at DC, DR and OICL Offices.

- Architecture Diagram
 - b. Bidder shall submit this document to OICL for review and any suggestions by OICL will be incorporated therein.
 - c. High level design of whole system
 - d. Low Level design for whole system / Module level design
 - e. System requirements Specifications (SRS)
 - f. Any other explanatory notes about system, bidder shall also ensure updating of documentation of software system ensuring that:
 - g. User manuals and training manuals are updated to reflect on-going changes/enhancements.
 - h. All the technical documents (HLD, LLD, Design Document, SRS, Implementation Plan, Rules & Policy documents etc.) submitted should be vetted by OEM's of respective components and bidder need to submit the OEM confirmation along with the documents.
 - i. Bidder should ensure that all the required documentation is made available to OICL. HLD , Project Plan etc. during Kick Off; SRS, LLD , Existing Study Report, Pre-Requisite Documents etc. during requirement gathering stage; UAT Plan , Test Cases, Customization Documents etc. during Implementation ; User Manual, Training Manual, change request documents which includes configurations, architecture diagrams etc. and any other management support document etc. during post implementation.
- xvi. The Below Mentioned requirement of the resources during the **Warranty and Maintenance period** is the minimum requirement, bidder is required to right size the requirement in order to meet the Scope and SLA requirement.
- xvii. One – Dedicated **Project Manager** -100% Onsite Deployment(Head Office) during the warranty and maintenance phase, One - **Solution Architect**- Onsite Support to Project team on need basis, One - **Security Expert**- Onsite Support to Project team on need basis , Three - **Support Executives** -100% Onsite Deployment (General shift 9AM to 6 PM) and One **Support Executives for each remaining shifts** - 100% Onsite Deployment (for the remaining hours)
- xviii. The Bidder should not replace resources without prior permission of OICL. Also, the bidder should give at least one month prior notice to OICL in case of resource replacement. It is the duty of the bidder that the replacement provided should be equally or more qualified and experienced than the existing resource. Also, the existing resource should provide the complete handover to the new resource.
- xix. During FM period, Bidder will be responsible for:
- a. Overall maintenance and working of all the Solutions and hardware's supplied
 - b. Bug fixing and delivery of patches/ version changes effected
 - c. Providing tools for creating knowledge repository for the bugs identified, resolution mechanism, version upgrade, future upgrade etc. of Tools, OS, RDBMS etc.
 - d. Bidder shall create the knowledge repository and shall provide OICL Officials access to all the repository prepared for OICL.
 - e. Provision should be available for version control and restoring the old versions if required by OICL
 - f. Enhancement, modifications, customization, patches, upgrades due to statutory, regulatory, industry, changes will be provided at no additional cost to OICL.

- g. Bidder needs to provide sizing for anti-virus software, OICL will provide the required anti-virus license for windows servers (Symantec Version 14.X). Installation of the same has to be carried out by the bidder in coordination with OICL Existing Vendor.
- h. Configuration changes, version up-gradations, performance monitoring, trouble shooting, patch installation, running of batch processes, database tuning, replacement / support, technical support for process, application and data maintenance, taking backup of the database as required, recovery, query generation and management etc. of all software supplied under this RFP document. OICL will provide the necessary Tape Library and Backup License.
- i. Immediate bug fixing should be undertaken in the event of software failure causing an interruption of operation as per the response / resolution times defined by OICL. In case of any software /hardware failure, the solution should continue to function seamlessly.
- j. All the detected errors must be notified and corrected, as per the agreed timelines
- k. Support OICL in integrating any new applications(if any directed by OICL) with the proposed tools and provide support in extending the model and creating reports & monitoring the application/infrastructure (including software and/or hardware) from the same
- l. Provide OICL with performance monitoring reports and alert OICL in case of any performance issues by suggesting future capacity planning
- m. The operational support staff should have onsite support experience.
- n. Provide BCP/DR procedures and conduct DR drills in conjunction with OICL's policies/procedures
- o. As a part of FMS the Bidder shall provide services relating to maintenance and support of hardware, software and other peripherals. Below is the list of the services required by OICL. The list is however, not limited to these services. Also, the Bidder shall consider and envisage all services that will be required in the maintenance of these facilities and the management of these services will be provided for all offices of OICL. The services must meet the service levels mentioned in the RFP document.
 - Coordination of warranty repair or replacement service for Hardware and process warranty claims, as applicable. If the equipment are required to be taken outside OICL premises, the cost of transportation and other related costs will be borne by the Bidder.
 - Requesting dispatch of appropriate Vendor maintenance provider for product/Hardware maintained under a third party agreement
 - Coordinating and scheduling maintenance activities with the End User of OICL (e.g. network support, facilities support, etc.)
 - Maintain accurate documentation on the current location and status of Hardware and/or software in the process of being repaired
 - Services including requirement analysis, assisting OICL in hardware and system software platform acquisition, testing, verification, and installation. The Bidder agrees that services provided include implementation and maintenance of the hardware as well as installation & maintenance of the software.
 - Hardware maintenance services including preventive Hardware support,

preventive maintenance, corrective maintenance to remedy a problem, and scheduled maintenance required to maintain the Hardware in accordance with manufacturers' specifications and warranties

- Provide maintenance data, as reasonably requested by OICL, to support replacement / refresh scheduling
 - Provide a single-point-of-contact to End Users for the resolution of Hardware related problems or to request an equipment upgrade or consultation. If the Hardware supplied by the bidder is to be replaced permanently, then the Bidder shall replace the equipment of same Make/Model/configuration or of higher configuration.
 - Provide support and assistance, as required, to isolate complex network, operational and software problems related to the proposed solutions
 - Update, or provide the information required for the OICL to update the asset management system with the OICL
 - Track and report observed Mean Time Between Failures (MTBF) for Hardware
 - Backup, remove, protect, and restore programs, data and removable storage media in a machine prior to presenting the machine for service
 - Bidder to take corrective actions in order to resolve any security related issue including Malware attacks, Phishing attacks etc. occurring in OICL.
 - Bidder to provide adequate FM support for Trend Micro Email Gateway for the entire contract period.
- p. The OICL will not be liable to pay any additional charges in respect of any sort of maintenance required during the tenure of the contract in order to meet the scope and SLA.
- q. The activities (not exhaustive) that are expected to be provided by the BIDDER have been listed below:

<p>1. Server/Appliance Management at DC and DR</p>	<ul style="list-style-type: none"> i. Support of server/appliance operating system, system management software and operating system utilities, including minor upgrades (such as release upgrade) ii. Provision of maintenance service, health check and trend reports iii. Managing system IDs, domain structure, OS security and OS configuration iv. Define and Manage print queues v. Administer file system directory distribution and replication vi. Manage Simple Object Access Protocol (SOAPs) and maintain logs vii. Analyze performance, maintain and improve performance.
---	---

	<ul style="list-style-type: none"> viii. Maintain processes ix. Comply with IT policies, Regulatory and Statutory Guidelines x. Support migration activities xi. Support test to migration activities xii. Coordinate any change in infrastructure, including those that may affect the Service Level of any of the Service Providers. xiii. Create, maintain and provide all appropriate project plans, project timelines, cost estimates, technical specifications, management documentation and management reporting in a format that is acceptable to OICL.
<p>2. Server/Appliance Operations – Major Incident Management</p>	<ul style="list-style-type: none"> i. Determining scope of the problem ii. Managing the incident through service restoration iii. Validating severity classification of the problem iv. Facilitating Service Recovery Team meeting v. Escalating the issue as required vi. Conducting Root Cause Analysis
<p>3. Server/Appliance Operations System Operations:</p>	<ul style="list-style-type: none"> i. Monitor hardware and software during in-scope service hours ii. Administer and/or execute Service processes and procedures iii. Perform basic problem determination on systems and components managed by Bidder which include: <ul style="list-style-type: none"> a. Hardware, System Software and Network problems b. Evaluate planned changes to server/appliance environment and advise requirements to support such changes c. Monitor status of system processes d. Monitor and respond to system/hardware alerts and events, application alerts and application file system space issues e. Monitor and maintain system error logs f. Perform required batch setup activities (ad hoc requests)

4. Server/Appliance Planning	<ul style="list-style-type: none">i. Configuration Managementii. Performance Managementiii. Capacity Management
-------------------------------------	---

	<ul style="list-style-type: none">iv. Pre-installation assessment on the integration requirement and integration parametersv. Performing OEM interaction for resolving solution related issuesvi. Provision of network / endpoint level handholding /guiding support for the implementation / integration of security solutionvii. Performing Access Managementviii. Performing periodic review of access and take corrective actions in consent with OICLix. Performing patch updates and software updates for security solution after testing the same in the Test Environmentx. Periodic assessment and review of the solution deployment and mapping with IRDAI/ Regulatory guidelines every six months during the entire tenure of the contract.xi. Resolving issues related to report generation, workflows, report creation, report customization and assignment of /modification in roles and responsibilitiesxii. Performing any other day-to-day administration and support activitiesxiii. Liaising with the existing underlying application vendors for resolution of integration related issuesxiv. Fixing all the reported issues and deploy the fix to Security Solutions, hardware, OS & DB at DC , DRS and other Offices of OICLxv. Bidder shall ensure the availability of resource at DC and DR site as per the requirement and in order to adhere the SLA Parametersxvi. Bidder shall maintain defined RPO (1 Hour) and RTO (2 Hour).xvii. Comply with IT and security policies of OICL, regulatory and statutory guidelines and make necessary changes to comply if requiredxviii. Create, maintain and provide all appropriate project plans, project timelines, cost estimates, technical specifications, management documentation and management reporting in a format that is acceptable to OICL
--	---

2.4.3 AMC & ATS Support

- i. The successful bidder should provide comprehensive AMC & ATS for proposed solution, including other software, associated modules, hardware and services required to meet the requirements in the RFP.
- ii. The hardware should have three year onsite & comprehensive warranty and the AMC will commence from year 4 onwards post warranty period. The software should have one year onsite & comprehensive warranty and the ATS will commence from year 2 onwards post warranty period.
- iii. Bidder shall be fully responsible for the manufacturer's warranty in respect of proper design, quality and workmanship of all required hardware, equipment, software etc. covered in the RFP. Bidder shall warrant all required hardware, equipment, spare parts etc. against any manufacturing defects during the warranty period.
- iv. During the warranty, AMC & ATS period Bidder shall maintain the systems and repair / replace at the installed site, at no charge to OICL, including defective components that are brought to the Bidder's notice.
- v. If OICL buys any other supplemental hardware which is of the same OEM and is OEM recommended from a third party vendor and installs it within these hardware under intimation to the bidder then the warranty of hardware and software should not become void. However, the warranty will not apply to such supplemental hardware installed.
- vi. If Operating System or additional copies of Operating System are required to be installed / reinstalled / de-installed, the same shall be done at no additional cost during the period of contract after due approval from OICL.
- vii. The bidder shall follow the below mentioned technical standards:
 - a. Security Requirements;
 - b. Operating Procedures;
 - c. Recovery Procedures;
 - d. Perform an inventory of warranties and licenses in place as of the Start Date of the warranties
- viii. The Bidder shall ensure that the warranty complies with the agreed Technical Standards, Security Requirements, Operating Procedures, and Recovery Procedures
- ix. Bidder shall monitor warranties, ATS and AMC of the supplied hardware and software
- x. As far as possible, the equipment should be repaired at site. Where the equipment is taken for repairs outside OICL, a substitute should be provided and data, if any, should be transferred to the substitute machine besides creating back-up in one of the systems at OICL DC and DRS. Data in the machine being transferred should be deleted and hard disk should be degaussed before taking the device outside OICL Premises.
- xi. In the event of system breakdown or failures at any stage, relevant protection available shall be specified which would include the following:
 - a. Diagnostic for identification
 - b. Protection of data entered
 - c. Recovery / restart facilities
 - d. Backup facilities

- xii. The ATS support for identified solution(s) should include the following:
 - a. All minor and major version upgrades during the period of contract at no extra cost
 - b. Program updates, patches, fixes and critical security alerts as required
 - c. Documentation updates
 - d. 24*7*365 support for all the security application related malfunctions and ability to log requests online
 - e. The Bidder should have back to back agreement with the OEMs for ATS and AMC support.
- xiii. Improve the policies configured on an on-going basis to reduce the occurrence of false positives.
- xiv. Bidder shall curtail the closure time for incidents and events, also ensure the periodic check-up reviews for the same.
- xv. There will be a User Acceptance Testing by OICL/OICL Designated Officials for the tools deployed and Security Solutions wherever applicable.
- xvi. The OICL shall commence the User Acceptance Testing as and when products and services are made ready by the Bidder and a formal confirmation that the system is ready for UAT is submitted to OICL. The results thereafter will be jointly analyzed by all concerned parties.
- xvii. UAT will cover acceptance testing of all the product/services, integration with all the tools new and existing and integration of security solutions with all targeted devices/systems and /or applications(new and existing).
- xviii. Once UAT of all the security tools as required in the RFP are individually completed, then a System Integration Testing shall be carried out by the Bidder to ensure the complete inter-operability of the security tools among themselves and integration with the existing infrastructure (targeted devices/systems) of OICL..
- xix. The Bidder is expected to make all necessary modifications to Security solution including customizations, interfaces, appliances, integration, software etc., if there are performance issues and errors identified by the OICL. These deviations/ discrepancies/ errors observed will have to be resolved by the bidder immediately.
- xx. Bidder to share with OICL the following documents also:
 - System Setting & Parameters document for the proposed solution.
 - Design, Development and Technical document including the customization source code for any customization to be undertaken on the product proposed for OICL
- xxi. Complete acceptance has to adhere to the stipulated time lines.
- xxii. The solution will not be accepted as complete if any facility /service as required is not available or not up to the standards projected by the bidder in their response and the requirement of this RFP.
- xxiii. The OICL will accept the solution on satisfactory completion of the above inspection.
- xxiv. In case of discrepancy in facilities /services provided, the OICL reserves the right to cancel the entire /part of the contract.
- xxv. Bidder must design a high level system integrated work flow pertaining to key security processes into the overall design of system which ensure minimum manual intervention

2.4.4 Scope of Work for Each Security Solutions

2.4.4.1 Mobile Device Management

The following elements are all required to construct a complete, end to-end mobility solution. Mobile devices, such as notebook PCs, tablet PCs, Smart Phones, data and Internet services. Infrastructure to support the application, especially next generation (4G) wireless networks and security/encryption software loaded on the mobile devices and network infrastructure Enterprise applications integration includes back office applications, legacy systems, security, and all the other aspects of OICL. The Mobile Device Management module is essential solution required by OICL to manage, monitor and support use of mobile devices.

The proposed Mobile Device Management solution should be able to address the following key areas but not restricted:

- i. Configuration of the solution balancing critical document access requirements with data security assurance
- ii. Tying mobility to strategic business objectives
- iii. Identifies key business processes that can be improved with mobilization
- iv. Defines business process improvements
- v. Devise business and technical alignment with OICL's requirement
- vi. To implement every aspect of the identified and designed mobility initiative, including architecture and systems integration
- vii. Assists with device management and configuration
- viii. Provides different devices application hosting options
- ix. Provides help desk services
- x. Scalable, so new users and increasingly sophisticated devices can be accommodated easily

The Bidder is expected to perform the following activities:

SOLUTION IMPLEMENTATION

- i. Implement the solution for the identified devices.
- ii. Configuration/re-configuration of the required policies

SOLUTION INTEGRATION

- i. Integrate MDM with SIEM to generate alerts for any MDM violations.
- ii. The responsibility of integration of solutions with SIEM and other security solutions (existing or procured through this RFP or new procured), if required, lies with the Bidder selected through this RFP. The OICL shall provide adequate support to the Bidder for the purpose of integration
- iii. The Bidder needs to ensure the proposed solution is configured to generate events for monitoring through SIEM.

Monitoring

- i. Monitor events from MDM and take appropriate action after due approval from OICL on an on-going basis.
- ii. Improve the policies configured on an on-going basis to reduce the occurrence of false positives.

2.4.4.2 Distributed Denial of Service (DDoS)

The proposed DDoS solution should address the following key areas but not limited:

- i. Prevent all types of DDoS attacks (volumetric, protocol & application) such as, but not limited to, UDP Flood, ICMP Flood, SYN Flood, Smurf DDOS, Slowloris, HTTP Flood, Zero-day attacks, TCP exhaustion, etc. that impact the services hosted on Internet.
- ii. The solution should be able to mitigate the effects of DDoS attacks over Internet links commissioned in our Data Centre and Disaster Recovery Center.
- iii. The Solution should identify the root cause of the attack & take preventive action to avoid facing similar type of attacks again.
- iv. Solution should detect the attack irrespective of the type of attacks such as volumetric, layer 2, 3, 4 or 7 using the solution provided by them
- v. Proposed solution should have capability of Detection and Mitigation of DDoS attacks.
- vi. Constantly monitor the behavior of the application visitors

The Bidder is expected to perform the following activities:

SOLUTION IMPLEMENTATION

- i. Implement the solution as per OICL's requirement
- ii. Configure policies as per OICL's requirement.

SOLUTION INTEGRATION

- i. Integrate DDoS solution with SIEM and other security solutions to generate alerts for any violations
- ii. The Bidder shall be responsible for providing the operational and maintenance training to the identified staff of the OICL as and when required by the OICL.
- iii. The responsibility of integration of solutions with SIEM and other security solution, if required, lies with the bidder selected through this RFP. The OICL shall provide adequate support to the bidder for the purpose of integration.

Monitoring

- i. Monitor events from DDoS and take appropriate action after approval OICL on an on-going basis.
- ii. Improve the policies configured on an on-going basis to reduce the occurrence of false positives.

2.4.4.3 Network Access Control

The proposed Network Access Control solution should be able to address the following key areas but not restricted:

- i. The OICL intends to procure a Network Access Control solution which is an automated security control platform that can monitor and control everything on the network—all devices, all operating systems, all applications, all users.
- ii. The solution shall let employees and guests remain productive on the network while critical network resources and sensitive data remain protected. Based on third-generation network access control (NAC) technologies, the solution shall be easy to install, manage, configure and upgrade.
- iii. NAC shall provide following:

- a. Visibility into user identities and device types
 - b. Guest user self-enrollment
 - c. Easy access to WPA2 secure wireless and wired networks
 - d. Real-time policy assessment
 - e. Dynamic role-based enforcement
 - f. Guided Self-Remediation Process
- iv. NAC solution deployed shall allow only authorized and compliant devices to access and operate on OICL's network. The Bidder shall design the NAC solution such that the OICL does not need re-architecture of the network or upgrade/ replacement of the network devices
 - v. In case of failure of NAC appliance/ software, the Bidder shall provide redundant solution in no more time than 4 hours for any location where ever NAC is deployed.
 - vi. The Bidder is required to supply, implement & maintain NAC

SOLUTION IMPLEMENTATION

- i. Implement the solution for the identified devices.
- ii. Configuration of the required policies

SOLUTION INTEGRATION

- i. Integrate NAC with SIEM to generate alerts for any NAC violations.
- ii. The responsibility of integration of solutions with SIEM and other security solution, if required, lies with the Bidder selected through this RFP
- iii. The OICL shall provide adequate support to the Bidder for the purpose of integration.
- iv. The Bidder needs to ensure the proposed solution is configured to generate events for monitoring through SIEM

Monitoring

- i. Monitor events from NAC and take appropriate action after approval from OICL on an on-going basis.
- ii. Improve the policies configured on an on-going basis to reduce the occurrence of false positives.

2.4.4.4 Privilege Identity management (PIM)

The proposed Privilege Identity Management solution should be able to address the following key areas but not restricted:

- i. Discovery of sensitive source and data-Creation of an inventory through auto discovery of all operating systems and users, databases and database users, network/security devices and its users, relate data from TACACS/TACACS Plus/AD/Radius/ or any other LDAP, relate user data from files for applications deployed across the enterprise.
- ii. In addition to Super-User password management (SUPM), solution must also be able to provide Shared Account Password Management (SAPM) including service accounts, application to application accounts password management and database administrative accounts management capabilities.

- iii. Management of password vault for all types of users with single-sign-on functionality for all types of resources (OS / DB / Application / Network / Security). The vault must be highly secured and fail-safe.
- iv. Creation / testing of policies/rules for enforcing access control and proper rights management on covered resources.
- v. Reporting of activities through session recording / logging / Tracking.
- vi. Reporting of deviations to the policies and access control.
- vii. Masking of sensitive data in output.
- viii. Integration with SOC application and SIEM solution
- ix. Support Port wise Access Manager SSL/VPN.
- x. Support strong / Multi factor authentication.
- xi. Support virtual infrastructure / environment.
- xii. Support easy customization of approval workflows according to business needs (without requiring code changes).
- xiii. Complying with relevant regulatory demands and reporting of compliance percentage i.e. IRDA
- xiv. Block and prohibit activities beyond approved privileges.
- xv. Raise alerts for wrongful attempts.
- xvi. Help enhance forensic capability along with supporting solutions.
- xvii. Role base access to servers
- xviii. Audit and Monitoring of Privileged Accounts
- xix. Command Level Controls of various devices
- xx. Manage passwords hard-coded in configuration files, scripts, applications, and application server configurations.
- xxi. The Bidder is required to supply, implement & maintain PIM

SOLUTION IMPLEMENTATION

- i. Implement the solution as per OICL's requirement
- ii. Configure policies as per OICL's requirement.

SOLUTION INTEGRATION

- i. Integrate PIM solution with SIEM to generate alerts for any violations
- ii. The Bidder shall be responsible for providing the operational and maintenance training to the identified staff of the OICL as and when required by the OICL.
- iii. The responsibility of integration of solutions with SIEM and other security solution, if required, lies with the bidder selected through this RFP. The OICL shall provide adequate support to the bidder for the purpose of integration.

Monitoring

- i. Monitor events from PIM and take appropriate action after approval from OICL on an ongoing basis.
- ii. Improve the policies configured on an on-going basis to reduce the occurrence of false positives.

2.4.4.5 Database Activity Management (DAM)

The proposed Database Activity Management solution should be expected to should be able to address the following key areas but not restricted:

- i. Creation of an inventory through auto discovery of all databases and database users, deployed across the enterprise. Discovery of sensitive data.
- ii. Discovery of vulnerabilities, missing patches.
- iii. Creation of policies/rules for enforcing access control and proper rights management on databases.
- iv. Monitoring access to databases, database activities, blocking unauthorized access/activities and segregation of duties.
- v. Reporting of deviations to the policies and access control.
- vi. Masking of sensitive data in output.
- vii. Virtual patching of database for known missing patches.
- viii. Complying with relevant regulatory demands.
- ix. Help enhance forensic capability along with supporting solutions
- x. The Bidder is required to supply, implement & maintain DAM

SOLUTION IMPLEMENTATION

The Bidder is expected to perform following activities:

- i. Deploy the DAM for DC and DR locations for the in-scope databases
- ii. Configure the DAM rules and policies.

SOLUTION INTEGRATION

- i. Integrate DAM with SIEM to generate alerts for any DAM violations and provide a correlated view of threats and vulnerabilities associated with them along with remediation mechanism.
- ii. The responsibility of integration of the DAM solution with SIEM and any other solution, if required, lies with the Bidder selected through this RFP. The OICL shall provide adequate support to the Bidder for the purpose of integration.

MONITORING

- i. Monitor events from DAM and suggest/ take appropriate action to the OICL on an on-going basis.
- ii. Improve the policies configured on an on-going basis to reduce the occurrence of false positives.

2.4.4.6 Security Information & Event Management (SIEM)

The SIEM solution is expected to collect logs from security and network devices, servers and application security logs. In addition, the logs being generated by the solutions deployed as part of the SOC implementation need to be collected by the SIEM. The bidder is expected to perform the following as part of the SIEM:

SOLUTION IMPLEMENTATION

The Bidder is expected to perform following activities:

- i. Prepare the designs and implement the solution in line with IRDAI's guidelines on Information and cyber security for Insurers, ISO27001:2013/ ISO22301/IT Act (along with its amendments) standards as modified from time to time.
- ii. Deploy and Implement the SIEM for DC and DR locations for the in-scope identified devices/applications/databases etc.
- iii. This will also include integration of the solution with all devices such as routers, switches, servers, firewalls, DDoS appliance, Load Balancers, WAF, and APTs etc. (This list is not exhaustive). OICL May at its discretion add the security solution/devices which has to be integrated by the bidder during the contract.
- iv. Creating and applying policies after analyzing traffic pattern for correlation purpose
- v. Develop parsing rules for non-standard logs
- vi. Implement correlation rules based on out-of-box functionality of the SIEM solution and also based on the standard used-cases.

SOLUTION INTEGRATION

- i. Integrate SIEM with various applications and solutions
- ii. The responsibility of integration SIEM lies with various applications and solutions with the Bidder selected through this RFP. The OICL shall provide adequate support to the Bidder for the purpose of integration.
- iii. Integration with TACACS/TACACS Plus/AD/Radius/ or any other LDAP to facilitate user identification.
- iv. Integration with Security and Network Solution and Appliances
- v. Integration with Server, Storage, VM etc. to provide the consolidated view of the events
- vi. Configure all automated updates for all features by the SIEM solution.
- vii. Configuration of update and upgrades as and when the latest version is released.
- viii. Configuring backup Schedule of the SIEM solution.
- ix. Check for Failover between appliances used for SIEM solution.

MONITORING

- i. The SIEM should be able to collate logs from the devices/applications/databases/servers/all the integrations points etc., including the solutions deployed as part of this RFP
- ii. Improve the policies configured on an on-going basis to reduce the occurrence of false positives.
- iii. Configure Incident based alert mechanism supported by devices/application like Visual Alerts, e-mail etc.
- iv. The SIEM should be able to log automated tickets on Ticketing Tool based on the criticality and threshold defined.

ONGOING OPERATIONS

- i. Monitor the SIEM alerts and suggest/take appropriate action
- ii. Perform on-going optimization, performance tuning, maintenance, configure additional use-cases, suggest improvements as a continuous improvement process, trend Analysis etc.
- iii. Perform log backup and archival as per OICL's policy requirements and applicable legal/statutory requirements of Govt. of India.
- iv. Install/Re-install/ reconfigure any component/ system of the security equipment's supplied by the bidder, in case of crash of those components / system on problem or patch/upgrades etc. The bidder also needs to support, if any security installations done by a separate vendor.
- v. Root cause analysis of any event has to be done and proper corrective action has to be taken with information to OICL officials. Based on that, the bidder should recommend for improvement to policies, procedures, tools and other aspects.
- vi. Creating Out-of-the-box reports and customized reports templates based on the needs of OICL .The reports should be available for the following (not limited to): a). Indian Information Technology Act 2000 including all amendments b). IRDA guidelines c). Payment Card Industry (PCI) d). ISO27001 e). ISO22301 etc. f) COBIT etc.
- vii. Switches of the RO and Branches are managed and maintained by the other Vendors of OICL, Bidder is required to coordinate with the OICL Vendors to collect the logs manually and capture & ship the same in the SIEM Solution in order to provide comprehensive analysis of the logs. Frequency of the Log capturing has to be mutually discussed during the time of SRS Preparation and Signoff

STORAGE

The SIEM should be able to maintain 6 months of logs on storage online. In addition, after 6 month duration the bidder should maintain logs on the TAPE Drives. The bidder is responsible for sizing the hardware and software adequately based on the EPS estimate given.

The bidder is responsible for automated online replication of logs (online/ archival) from DC to DR for redundancy.

The solution should be capable of automatically moving the logs from online to archival drives based on the ageing of the logs.

Key Applications to be monitored are as follow but not limited to:

S.No	Applications
1	Email Exchange-Microsoft
2	Portal
3	INLIAS – Live and Non Live
4	HRMS-PeopleSoft
5	SAP

6	Antivirus-Symantec
7	Active Directory-Microsoft
8	Bulk Mail-Logix
9	ECM-Documentum
10	HSM-Safenet
11	DLP-Forcepoint
12	Proxy-Cisco WSA

The Bidder is required to right size the EPS Count based on the solution proposed through this RFP in order to handle the EPS count generated through the supplied Solutions/hardware. The EPS Count provided in the RFP is catering to the available solutions/devices with OICL. In case the supplied solutions and/or appliance is unable to maintain the requirement during the contract period the bidder is required to augment the solution and/or hardware at without any additional cost.

2.4.4.7 VAPT

Vulnerability Assessment and Penetration Testing should cover the OICL's Information System Infrastructure which includes Networking systems, Security devices, Servers, Databases, Applications Systems, websites maintained at OICL's premises. Bidder should carry out an assessment of Threat & Vulnerabilities assessments and assess the risks in OICL's Information Technology Infrastructure. This will include identifying existing threats if any and suggest remedial solutions and recommendations of the same to mitigate all identified risks, with the objective of enhancing the security of Information Systems.

The frequency for conducting VAPT should be at half-yearly. However, OICL at its own discretion can change the frequency. Bidder is required to hire the Cert-In Empaneled third party agency to conduct VAPT and the same has to submit the report to OICL directly. Bidder is required to perform Gray Box Testing for applications and for devices/appliances bidder is required to perform white box testing.

Bidder is required to close all the gaps/issues identified in the proposed solution and also coordinate with the existing vendors of OICL in order to close all the gaps identified in VAPT Reports as per the timelines provided in the RFP and submit the status report of all the identified gaps in the VAPT Report on weekly basis.

A. Vulnerability Assessment:

OICL expects an authenticated type but non-destructive vulnerability assessment to be carried out.

- i. Vendor should be able to cover a broad range of systems like Operating systems (Windows, Linux, AIX, HP UX etc), Databases (MS SQL Server, MySQL, Oracle, DB2 etc), Web servers (WAS, Apache, Tomcat, IIS etc), Application servers, Network devices (Cisco etc), Security devices (Cisco, Checkpoint, Juniper, Fortinet, PaloAlto, Sonicwall etc).

- ii. Vendors are expected to conduct the audit against the standard configuration document that OICL has created, as also the latest global standards and industry best practices. In case, any new asset is identified during project execution, vendor is expected to develop the checklist and conduct the assessment.
- iii. The purpose of the vulnerability assessment is to discover all systems on perimeter network or internet facing and to assess these systems for securities vulnerabilities. Vulnerability assessment shall attempt to determine vulnerabilities that may enable unauthorized logical access to protected system. The vendor will conduct vulnerability assessment against network and security infrastructure components to identify services in use and potential vulnerabilities present.
- iv. Initially OICL proposes VAPT to be conducted for IT assets in Data Center & Disaster Recovery Center & Offices/Branches. The VAPT exercise must cover the following IT Infrastructure but not limited to:-
 - a. All the servers and applications in DC & DR.
 - b. All the Firewall Devices in DC & DR
 - c. PCs & Laptops at Offices
 - d. All the Routers installed at DC, DR & Offices.
 - e. All the L3, L2 & L1 network switches present in DC,DR & Offices
- v. The assessment should check for various categories of threats including:
 - a. Unauthorized access into the network and extent of such access possible
 - b. Unauthorized modifications to the network and traffic flowing over network
 - c. Extent of information disclosure from the network
 - d. Spoofing of identity over the network
 - e. Possibility of denial of services
 - f. Possible threats from malicious codes (viruses, malware and worms etc.)
 - g. Possibility of traffic route poisoning
- vi. Scope of work for Vulnerability Assessment
 - a. General aspects for all systems
 - Access control and authentication
 - Network settings
 - General system configuration
 - Logging and auditing
 - Password and account policies
 - Patches and updates
 - b. Specific requirements for Server/OS Configuration Audit
 - File system security
 - Account Policies
 - Access Control
 - Network Settings / Network Port / Network Access Details
 - System Authentication
 - Logging And Auditing
 - Patches And Updates
 - Unnecessary services
 - Remote login settings
 - c. Configuration Audit of Networking & Security Devices

- Access Control
 - System Authentication
 - Auditing And Logging
 - Insecure Dynamic Routing Configuration
 - Insecure Service Configuration
 - Insecure TCP/IP Parameters
 - System Insecurities
 - Unnecessary services
 - Remote login settings
 - Latest software version and patches
- d. Database Configuration Audit
- Database Account Authentication
 - Password Policy
 - Database Account Privileges
 - Database Auditing
 - Database Logging And Tracing
 - Database Network Access Mechanism
 - Database Patching
 - Database Files And Directories Permission
 - Access control and authentication
 - Unnecessary services
 - Remote login settings
 - Patches and updates
- e. Security configuration of desktops, laptops, tablet phones and mobile devices that are used by the business users can be performed on sampling basis as per OICL's requirements.

B. Penetration Testing

The objective of the assessment is to determine the effectiveness of the security of organization's infrastructure and its ability to withstand an intrusion attempt. This may be achieved by conducting both reconnaissance and a comprehensive penetration test. This will provide good insight as to what an attacker can discover about the network and how this information can be used to further leverage attacks. The security assessment should use the industry standard penetration test methodologies (like OSSTM) and scanning techniques, and will focus on applications. The application tests should cover but not limited to OWASP Top 10 attacks. Bidder shall perform application security testing, to identify security vulnerabilities in the OICL's applications that may be exploited by a user to obtain unauthorized access. This will also include identification of any configuration issues that may not have been possible to identify during traditional vulnerability assessment. Bidder shall use automated and manual testing techniques to exploit the weaknesses identified in the application logic, in areas like authentication, authorization, information leakage, field variable control, session timeout & logout, cache control, server side logic, client side logic, error handling, application administration and encryption. The Scope for penetration testing should include but not limited to list of internet facing websites/ applications in System Detail section. It is explicit that penetration tester should conduct

vulnerabilities assessment consulting with concerned personnel and proper permission of OICL. Finally remediation and recommendations must be provided along with all findings. The following areas are to be considered for penetration testing:

- i. Network Security
 - a. Password Security Testing
 - b. Router Security Assessment
 - c. Anti-Virus System Security Assessment and Management Strategy
 - d. Internet User Security
- ii. Host Security
 - a. Unix/Linux/Solaris System Security Assessment
 - b. Windows System Security Assessment
 - c. Web Server Security Assessment
 - d. Other relevant/mapped application Security Assessment
- iii. Database Security Assessment
- iv. Scope of work for Penetration Testing
 - a. Tests for default passwords
 - b. Tests for DoS (Denial of Service) vulnerabilities
 - c. Test for directory Traversal
 - d. Test for insecure services such as SNMP
 - e. Check for vulnerabilities based on version of device/server
 - f. Test for SQL, XSS and other web application related vulnerabilities
 - g. Check for weak encryption
 - h. Check for SMTP related vulnerabilities such as open mail relay
 - i. Check for strong authentication scheme
 - j. Test for sample and default applications/pages
 - k. Check for DNS related vulnerabilities such as DNS cache poisoning and snooping
 - l. Test for information disclosure such as internal IP disclosure
 - m. Look for potential backdoors
 - n. Check for older vulnerable version
 - o. Remote code execution
 - p. Weak SSL Certificate and Ciphers
 - q. Missing patches and versions
 - r. This is a minimum indicative list, bidders are encouraged to check for more settings in line with best practices including PCI, OSSTM etc
- v. Review of System Security Plan. The Specific Objectives and Techniques are as follows:-
 - a. Critical Element: System security plan to be documented for the system including mapping of all interconnected systems.
 - b. Approved system security plan to be put in place.
 - c. The plan is to be in accordance with the existing guidelines and policies promulgated in OICL
 - d. Implementation of corrective actions to be effectively ensured.

2.5 Warranties

- i. The hardware should have three year onsite & comprehensive warranty and the AMC will commence from year 4 onwards post warranty period.
- ii. The software should have one year onsite & comprehensive warranty and the ATS will commence from year 2 onwards post warranty period.
- iii. Warranty for the supplied hardware will commence from the date of acceptance of the hardware by OICL and software warranty will commence from the date of the respective solution Go-Live. Bidder is required to track of the product warranties and support from OEMs for all the supplied solution and hardware and submit the report to OICL
- iv. Performing warranty and license registration, if any, with the appropriate manufacturer, for hardware and software that are either procured through the Bidder or procured by OICL with notification to the Bidder for inclusion in such database.
- v. Reports related to hardware leases and warranties and software licenses must be provided to OICL
- vi. All software to be supplied/ delivered and installed must be of the latest version and should form part of the OEM's current product line.
- vii. The bidder should also ensure that the solution proposed shall be technically compliant to perform satisfactorily as per requirements mentioned in the specification and deliverables.
- viii. The warranty, which for all practical purposes would mean Comprehensive On-site Warranty, shall start and remain valid for three years from the date of installation and acceptance of products.
- ix. In the event of replacement of any part of the system, it should be done with a part of equivalent or higher configuration which should be compatible with the system
- x. Warranty shall include software upgrades, updates, patches, hot fixes and service support without charging any additional cost to OICL.
- xi. In case of shifting of any appliance supplied by the bidder at any location of OICL, wherever the appliance has to be shifted from one OICL location to another, the bidder is required to uninstall / reinstall and maintain the system/s at the new location, without any extra cost to OICL

Bidders need to ensure that the solutions and hardware proposed comply with these minimum technical requirements. The Bidder shall provide the details of each individual solutions proposed along with the Hardware & software proposed, in Appendix 02– Bill of Materials.

Bidder should right size the hardware, software and its related services/support in order to meet the requirement as mentioned in the RFP for the entire contract. In case of shortfall bidder is required to provide the additional hardware, software and its related services/support at without any additional cost to OICL in order to meet the requirement of the RFP.

Bidder should ensure the compliance to SLAs, Scope and Terms & Conditions as defined in the RFP for the entire contract period.

Bidder shall ensure after sales support and maintenance of the complete system to provide prescribed SLA. The bidder is to ensure that the OEM support service for the proposed software and hardware is available for the entire contract period. In case of any support/software/equipment issue, Bidder shall

not only inform OICL beforehand but also shall provide the replacement solution/equipment of same/advanced model at no cost to OICL.

The Bidder shall be responsible for all patches/updates required in the offered solutions for smooth implementation of the project at without any extra cost to OICL

Sr. No.	Phase	Nature of activity	Remarks	Primary Responsibility
1	Planning	i. Conduct Kick-off meeting ii. Identify project point(s) of contact iii. Identify OICL resources required to assist in deployment, policy walkthrough, testing, and installation. iv. Low Level Requirement Gathering v. Project Planning	Project Plan Project Governance	Bidder/OEM
2	Design	i. Bidder/OEM should execute design phase ii. Bidder/OEM should develop solution design/architecture documents which will include: iii. Solution overview and conceptual design iv. Detailed design and connectivity parameters v. Create a User Acceptance Test Document	Design & Architecture Document Prerequisite Document User Acceptance Test Plan	Bidder/OEM
3	Delivery	i. Physical delivery of the security equipment/solution as per Appendix 02 - Bill	The Bidder has to supply and deliver the security equipment/solutions mentioned in Appendix 02 -	Bidder/OEM

Sr. No.	Phase	Nature of activity	Remarks	Primary Responsibility
		of Materials at DC, DRC, and Offices	Bill of Materials at the respective OICL's site	
4	Installation & configuration	<ul style="list-style-type: none"> i. Deploy solution ii. Complete initial configuration iii. Complete Integration and Installations of Security Solutions with relevant applications/devices/solutions iv. Documentation of installation and configuration 	<p>The Bidder is required to provide following deliverables as part of the this phase:</p> <ul style="list-style-type: none"> Successful deployment solution Installation and Configuration Document Gap Assessment <p>The Bidder/OEM is required to unpack, assemble, mount and boot the equipment and install the necessary service packs, patches, and fixes to the Operating System, set up and configure the equipment. Bidder to resolve any compatibility issues of sub-systems with OS, respective drivers, firmware, and any other cards to be installed if required.</p>	Bidder/OEM
5	Optimize	<ul style="list-style-type: none"> i. Fine-tuning of solution ii. Monitor and resolve issues iii. Provide an information knowledge-transfer workshop 	<ul style="list-style-type: none"> Tuning policies. Policies override SOP Transfer of Information session 	Bidder/OEM
6	Deployment Confirmation	<ul style="list-style-type: none"> i. This phase will comprise of deployment 	Validation Report by OEM	OEM

Sr. No.	Phase	Nature of activity	Remarks	Primary Responsibility
	and Validation	validation to be conducted by OEM. ii. In case OEM is not satisfied with the installation and configuration of product, they will submit their recommendation in form of a report to the OICL accordingly		
7	Monitoring, Management & Sustenance	i. Post- deployment (after sign-off) Bidder will manage & monitor proposed solution ii. Facilitation & operation for all change management, upgrade, updates, etc. during contract period	Reports and Dashboards as per defined SLAs Go Live Operations	Bidder/OEM
8	Warranty & AMC/ATS	i. Provide warranty and AMC/ATS support for the tenure of the contract	The Bidder will be responsible for providing comprehensive onsite warranty support, back-to-back from the OEM to meet the Service Levels	Bidder

Preventive Maintenance: Bidder shall carry out preventive maintenance at least once in quarter in consultation with the OICL team during the warranty period as well as in the subsequent Support period. Preventive Maintenance will include replacement of worn-out parts, checking diagnostic etc. In case equipment is taken away for repairs, the Bidder shall provide a standby equipment (of equivalent configuration or higher), so that the work of the OICL is not affected.

3 Terms & Conditions

3.1 General

3.1.1 Definitions

OICL/PURCHASER: Shall mean The Oriental Insurance Company Limited

3.1.2 Amendment to Bid Document

At any time prior to the deadline for submission of Bids, OICL may for any reason either on its own initiative or in response to a clarification requested by a prospective Bidder, modify the Bid Document, by amendment.

All prospective Bidders that have received the Bid Document will be notified of the amendment. The same will be binding on them. In order to allow prospective Bidders reasonable time in which to take the amendment into account in preparing their Bids, OICL may, at its discretion, extend the deadline for a reasonable period to be decided by OICL for the submission of Bids. Details will be communicated and published on our portal www.orientalinsurance.org.in.

3.1.2.1. OICL also reserves the right to change any terms and conditions of the RFP and its subsequent addendums as it deems necessary at its sole discretion. OICL will inform the Bidder about changes, if any before the deadline of bids submission.

3.1.2.2. OICL may revise any part of the RFP, by providing an addendum to the Bidder at stage till commercial bids are opened. OICL reserves the right to issue revisions to this RFP at any time before the deadline for bid submissions.

3.1.2.3. OICL reserves the right to extend the dates for submission of responses to this document.

3.1.2.4. Bidder shall have the opportunity to clarify doubts pertaining to the RFP in order to clarify any issues they may have, prior to finalizing their responses. All queries/questions are to be submitted to the Chief Manager, IT at the address mentioned below and should be received by the point of contact not later than the date and time specified in section 1.4 Schedule of Events. Responses to inquiries and any other corrections and amendments will be distributed to the Bidder by fax or in electronic mail format or hardcopy letter, at the sole discretion of OICL.

The Chief Manager

Information Technology Department,

The Oriental Insurance Company Limited, 2nd

Floor, Head Office, "Oriental House",

A-25/27, Asaf Ali Road, New Delhi - 110 002

3.1.2.5. Preliminary Scrutiny – OICL will scrutinize the offer to determine whether it is complete, whether any errors have been made in the offer, whether required technical documentation has been furnished, whether the documents have been properly signed, and whether items are quoted as per the schedule. OICL may, at its discretion, waive any

minor non-conformity or any minor deficiency in an offer. This shall be binding on the Bidder and OICL reserves the right for such waivers and OICL's decision in the matter will be final.

- 3.1.2.6. Clarification of Offer – To assist in the scrutiny, evaluation and comparison of offer, OICL may, at its discretion, ask the Bidder for clarification of their offer. OICL has the right to disqualify the Bidder whose clarification is found not suitable to the proposed project.
- 3.1.2.7. OICL reserves the right to make any changes in the terms and conditions of purchase. OICL will not be obliged to meet and have discussions with any Bidder, and / or to listen to any representations.
- 3.1.2.8. Erasures or Alterations – The offer containing erasures or alterations will not be considered. There should be no hand-written material, corrections or alterations in the offer. Technical details must be completely filled up. Correct technical information of the product being offered must be filled in. Filling up of the information using terms such as “OK”, “accepted”, “noted”, “as given in brochure / manual” is not acceptable. OICL may treat the offers not adhering to these guidelines as unacceptable.
- 3.1.2.9. Right to Alter Quantities – OICL reserves the right to alter the requirements specified in the tender. OICL also reserves the right to delete or increase one or more items from the list of items specified in the tender. OICL will inform the Bidder about changes, if any. In the event of any alteration in the quantities the price quoted by the bidder against the item would be considered for such alteration. The bidder agrees that the prices quoted for each line item & component is valid for period of contract and can be used by OICL for alteration in quantities. Bidder agrees that there is no limit on the quantities that can be altered under this contract. During the contract period the bidder agrees to pass on the benefit of reduction in pricing for any additional items to be procured by OICL in the event the market prices / rate offered by the bidder are lower than what has been quoted by the bidder as the part of commercial offer. Any price benefit in the products, licenses, software, services & equipment should be passed on to OICL within the contract period.

3.1.3 Sub-contracts

In case sub-contracting any of the activities under the scope of this RFP is required, the bidder needs to notify and take prior permission in writing from OICL. It is clarified that notwithstanding the use of sub-contractors by the Bidder, the Bidder shall be solely responsible for performance of all obligations under the RFP irrespective of the failure or inability of the subcontractor chosen by the Bidder to perform its obligations. The Bidder shall also have the responsibility for payment of all dues and contributions, as applicable including any statutory requirement and compliance. No additional cost will be incurred by OICL on account of sub-contract, if any.

3.1.4 Acceptance of the Solution

3.1.4.1. The User acceptance test will be carried out as per mutually agreed Acceptance Test Plan (ATP) against the systems requirements. The system will be considered accepted (supplied, installed and operationalized) only after Acceptance Test is completed .

Some of features required to be completed are enumerated below:

- i. The solution should correspond to what is stated in the purchase order without deviation except where mutually agreed upon
- ii. The equipment is fully installed, commissioned and operational. The features specified in the Functional Specifications / mutually agreed for implementation should be demonstrated.
- iii. The final acceptance of the system will be based on successful processing under live demonstration.
- iv. First acceptance will be after equipment are installed, commissioned, tested and all features are demonstrated at the specified locations.

3.1.4.2. In case of discrepancy in hardware & related software supplied & not matching the Bill of Materials or technical proposal submitted by the bidder in their technical bid, the bidder shall be given 6 weeks' time to correct the discrepancy post which OICL reserves the right to cancel the entire purchase contract and the Bidder should take back their equipment at their costs and risks. The test will be arranged by the Bidder at the sites in the presence of the officials of OICL and / or its consultants and appropriate functional and technical training should be given to the officials of OICL / or its consultants. The warranty for the equipment including all the software and other peripherals equipment & software by the Bidder pursuant to this Agreement will commence after acceptance testing. There shall not be any additional charges for carrying out this acceptance test. OICL will take over the system on successful completion of the above acceptance test. The Installation cum Acceptance Test & Check certificates jointly signed by Bidder's representative and OICL's official or its authorized representative should be received at Head Office along with invoice etc. for scrutiny before taking up the request for consideration of payment.

3.1.5 Conditional bids

Conditional bids shall not be accepted on any ground and shall be rejected straightway. If any clarification is required, the same should be obtained before submission of bids.

3.1.6 Submission of Bids

Bidders shall submit the Bids online. For details please refer RFP Section 5 – Instruction to Bidders.

3.1.7 Performance Security

Within 15 days after the receipt of Notification of Award from OICL, the bidder shall furnish performance security to OICL as per Annexure - 6, which shall be equal to 10 percent of the value of the contract - valid till date of expiry of five year Contract period in the form of a bank guarantee from a nationalized/ scheduled bank as per the norms laid by the RBI.

Failure by bidder to submit the Performance security will result in invocation of Bid security held by the Company (OICL).

3.1.8 Pre-Bid Meeting

All queries/ requests for clarification from bidders must reach us by e-mail (tender@orientalinsurance.co.in) or in person as per timeline given in section 1.4. Format for the queries / clarification is provided in “Annexure 4 - Query Format”. No clarification or queries will be responded in any other format. OICL will respond to any request for clarification of the tender document in the pre-bid meeting.

The Representatives of Bidders attending the pre-bid meeting must have proper authority letter to attend the same and must have purchased the Tender document.

Any modification to the Bidding Documents, which may become necessary as a result of the pre-bid meeting, shall be made by the Company exclusively through the issuance of an Addendum and not through the minutes of the pre-bid meeting.

3.1.9 Installation and Implementation

The bidder shall be responsible for supply, installation and commissioning of the proposed solution, hardware with technical specification as mentioned in Annexure-1; and to undertake support of the same.

At the direction of OICL, the acceptance test of the solution shall be conducted by the successful bidder in the presence of OICL’s authorized representative(s) and/or any other team or agency nominated by OICL. All expenses for acceptance test shall be borne by the bidder. The acceptance tests should include verification of documentation for equipment start-up procedures; shutdown procedures; configuration; failover testing and testing of all redundancies – verification of documented fail-over and restoration procedures. Draft Acceptance test procedure should be submitted by bidder. The final acceptance test procedures will be discussed and mutually agreed after the implementation.

3.1.10 Delay in Bidder’s performance

Implementation of the Solution and performance of service shall be made by the bidder in accordance with the time schedule specified by OICL in the contract.

Any unexcused delay by the bidder in the performance of his implementation/service/other obligations shall render the bidder liable to any or all of the following sanctions: forfeiture

of his performance security, imposition of liquidated damages, and/ or termination of the contract for default.

If at any time during performance of the contract, the bidder should encounter conditions impeding timely implementation of the Solution and/or performance of services, the bidder shall promptly notify OICL in writing of the fact of delay, its likely duration and cause(s), before the scheduled delivery / installation / implementation date. OICL shall evaluate the situation after receipt of the bidder's notice and may at their discretion extend the bidder's time for delivery / installation / implementation, in which case the extension shall be ratified by the parties by amendment of the contract. If the bidder's request to delay the implementation of the Solution and performance of services is not found acceptable to OICL, the above mentioned clause would be invoked.

3.1.11 Payment terms

The Bidder must accept the payment terms proposed by OICL. The financial bid submitted by the Bidder must be in conformity with the payment terms proposed by OICL. Any deviation from the proposed payment terms would not be accepted. OICL shall have the right to withhold any payment due to the Bidder, in case of delays or defaults on the part of the Bidder. Such withholding of payment shall not amount to a default on the part of OICL.

Hardware, Software and other components to be provided for execution of project should be sized for entire contract period by considering Scope, functional & technical requirements and SLAs.

However, if it is found that the hardware is not sized adequately or the hardware utilization goes beyond the threshold limit of 80%, the Bidder has to provide additional hardware at no additional cost to meet the performance parameters set by OICL. The Bidder must accept the payment terms proposed by OICL as proposed in this Section. The financial offer submitted by the Bidder must be in conformity with the payment terms proposed by OICL. Any deviation from the proposed payment terms would not be accepted.

The scope of work is divided in different areas and the payment would be linked to delivery and acceptance. All / any payments will be made subject to compliance of Service Levels defined in the RFP document. The OICL shall have the right to withhold any payment due to the Bidder, in case of delays or defaults on the part of the Bidder. Such withholding of payment shall not amount to a default on the part of OICL. If any of the items / activities as mentioned in the price bid is not taken up by OICL during the course of the assignment, OICL will not pay the fees quoted by the Bidder in the price bid against such activity / item.

Payment for the Supply of required Hardware, Software , Design, Installation, Implementation, and Commission of the solutions shall be made by OICL as per the solutions in scope as mentioned in the Scope of Work.

S. No.	Deliverables	% of Payment	STAGES (On completion of the activities)
1	Hardware / Appliance	70%	70% cost would be payable on successful post-delivery inspection of the product
		30%	30% cost would be payable on successful installation and acceptance testing of the product
2	Software / License	100%	100% cost would be payable on successful post-delivery inspection of the product
3	Installation, Implementation & Commissioning	100%	100% of the Installation, Implementation & Commissioning Cost of the respective Solution/Product will be payable on successful Go-Live of the respective solution/product
4	Payment for deployment of endpoint solutions (MDM, NAC and DAM)	90%	90% cost would be payable on successful deployment of 80% users, nodes or devices across the network for the respective solution
		10%	10% cost would be payable on successful deployment of remaining 20% users, nodes or devices across the network for the respective solution
5	FM Support (if applicable)		Payment will be made quarterly in arrears. Bidder to submit the relevant documents with the attendance sheet along with the invoice
6	ATS	Yearly in advance	Payment will be made post warranty period
	AMC	Quarterly in arrears	Payment will be made post warranty period
7	Training	100%	100% cost would be payable post successful completion of the training to the designated officials
8	VAPT	50%	On Submission of Interim Report to OICL
		50%	On Acceptance of the Final Report by OICL

3.1.12 Mode of Payment

OICL shall make all payments only through Electronic Payment mechanism (viz. ECS).

3.1.13 Penalties and delays in Bidder's performance

In case the vendor fails to meet the SLA mentioned in section 7, penalty will be imposed as mentioned in section 7 Service Level Agreement

3.1.14 Currency of Payments

Payment shall be made in Indian Rupees (INR) only.

3.2 Other RFP Requirements

- a. The Head Office of OICL is floating this RFP. However, the Bidder getting the contract shall install and commission the solution, procured through this RFP, at OICL's DC and DRS or at such centers as OICL may deem fit and the changes, if any, in the locations will be intimated to the Bidder.
- b. Technical Inspection and Performance Evaluation - OICL may choose to carry out a technical inspection/audit and performance evaluation of products offered by the Bidder. The Bidder would permit OICL or any person / persons appointed by OICL to observe the technical and performance evaluation / benchmarks carried out by the Bidder. Any expenses (performing the benchmark, travel, stay, etc.) incurred for the same would be borne by the Bidder and under no circumstances the same would be reimbursed to the Bidder by OICL.
- c. The Bidder's representative and local office at New Delhi will be the contact point for OICL. The delivery status of equipment should be reported on a weekly basis.
- d. Bidder should ensure that the hardware delivered to OICL including all components and attachments are brand new. In case of Operating System, the Bidder should ensure that the same is licensed and legally obtained with valid documentation made available to OICL.
- e. OEM's Authorization Form – The Bidder should furnish a letter from original equipment manufacturer

4 Terms of Reference ('ToR')

4.1 Contract Commitment

OICL intends that the contract, which is contemplated herein with the Bidder, shall be for a period of five year (Extendable for one year on mutually agreed terms and conditions).

4.2 Ownership, Grant and Delivery

The Bidder shall procure and provide a non-exclusive, non-transferable licenses to OICL for the Software to be provided as a part of this project. The Software should be assignable / transferable to any successor entity of OICL.

OICL reserves the right to use the excess capacity of the licenses supplied by the Bidder for any internal use of OICL or its affiliates, or subsidiaries at no additional cost other than the prices mentioned in the commercial bid. The Bidder agrees that they do not have any reservations on such use and will not have any claim whatsoever against such use of the hardware, licenses and infrastructure.

Further the Bidder also agrees that such use will not infringe or violate any license or other requirements

4.3 Completeness of Project

The project will be deemed as incomplete if the desired objectives of the project Section 2 – Scope of Work of this document are not achieved.

4.4 Compliance

Compliance with all applicable laws: The Bidder shall undertake to observe, adhere to, abide by, comply with and notify OICL about all laws in force or as are or as made applicable in future, pertaining to or applicable to them, their business, their employees or their obligations towards them and all purposes of this tender and shall indemnify, keep indemnified, hold harmless, defend and protect OICL and its employees/officers/staff/personnel/representatives/agents from any failure or omission on its part to do so and against all claims or demands of liability and all consequences that may occur or arise for any default or failure on its part to conform or comply with the above and all other statutory obligations arising there from.

Compliance in obtaining approvals/permissions/licenses: The Bidder shall promptly and timely obtain all such consents, permissions, approvals, licenses, etc., as may be necessary or required for any of the purposes of this project or for the conduct of their own business under any applicable Law, Government Regulation/Guidelines and shall keep the same valid and in force during the term of the project, and in the event of any failure or omission to do so, shall indemnify, keep indemnified, hold harmless, defend, protect and fully compensate OICL and its employees/ officers/ staff/ personnel/ representatives/agents from and against all claims or demands of liability and all consequences that may occur or arise for any default or failure on its part to conform or comply with the above and all other statutory obligations arising there from and OICL will give notice of any such claim or demand of liability within reasonable time to the Bidder.

This indemnification is only a remedy for OICL. The Bidder is not absolved from its responsibility of complying with the statutory obligations as specified above. Indemnity would be limited to court awarded damages and shall exclude indirect, consequential and incidental

damages. However indemnity would cover damages, loss or liabilities suffered by OICL arising out of claims made by its customers and/or regulatory authorities.

4.5 Assignment

OICL may assign the Services provided therein by the Bidder in whole or as part of a corporate reorganization, consolidation, merger, or sale of substantially all of its assets. OICL shall have the right to assign such portion of the services to any of the sub-contractors, at its sole option, upon the occurrence of the following: (i) Bidder refuses to perform; (ii) Bidder is unable to perform; (iii) termination of the contract with the Bidder for any reason whatsoever; (iv) Expiry of the contract. Such right shall be without prejudice to the rights and remedies, which OICL may have against the Bidder. The Bidder shall ensure that the said subcontractors shall agree to provide such services to OICL at no less favorable terms than that provided by the Bidder and shall include appropriate wordings to this effect in the agreement entered into by the Bidder with such sub-contractors. The assignment envisaged in this scenario is only in certain extreme events such as refusal or inability of the Bidder to perform or termination/expiry of the contract.

4.6 Canvassing/Contacting

Any effort by a Bidder to influence the Company in its decisions on Bid evaluation, Bid comparison or award of contract may result in the rejection of the Bidder's Bid. No Bidder shall contact the Company on any matter relating to its Bid, from the time of opening of Commercial Bid to the time the Contract is awarded.

4.7 Indemnity

The Bidder should indemnify OICL (including its employees, directors or representatives) from and against claims, losses, and liabilities arising from:

- a) Non-compliance of the Bidder with Laws / Governmental Requirements
- b) IP infringement
- c) Negligence and misconduct of the Bidder, its employees, and agents

Indemnity would be limited to court awarded damages and shall exclude indirect, consequential and incidental damages.

The Bidder shall not indemnify OICL for

- (i) Any loss of profits, revenue, contracts, or anticipated savings or
- (ii) Any consequential or indirect loss or damage however caused

4.8 Inspection of Records

All Bidder records with respect to any matters covered by this tender shall be made available to OICL or its designees at any time during normal business hours, as often as OICL deems necessary, to audit, examine, and make excerpts or transcripts of all relevant data. Said records are subject to examination. OICL's auditors would execute confidentiality agreement with the Bidder, provided that the auditors would be permitted to submit their findings to OICL, which would be used by OICL. The

cost of the audit will be borne by OICL. The scope of such audit would be limited to Service Levels being covered under the contract, and financial information would be excluded from such inspection, which will be subject to the requirements of statutory and regulatory authorities.

4.9 Publicity

Any publicity by the Bidder in which the name of OICL is to be used should be done only with the explicit written permission of OICL.

4.10 Solicitation of Employees

Both the parties agree not to hire, solicit, or accept solicitation (either directly, indirectly, or through a third party) for their employees directly involved in this contract during the period of the contract and one year thereafter, except as the parties may agree on a case-by-case basis. The parties agree that for the period of the contract and one year thereafter, neither party will cause or permit any of its directors or employees who have knowledge of the agreement to directly or indirectly solicit for employment the key personnel working on the project contemplated in this proposal except with the written consent of the other party. The above restriction would not apply to either party for hiring such key personnel who (i) initiate discussions regarding such employment without any direct or indirect solicitation by the other party (ii) respond to any public advertisement placed by either party or its affiliates in a publication of general circulation or (iii) has been terminated by a party prior to the commencement of employment discussions with the other party.

4.11 Information Ownership

All information processed, stored, or transmitted by Bidder equipment belongs to OICL. By having the responsibility to maintain the equipment, the Bidder does not acquire implicit access rights to the information or rights to redistribute the information. The Bidder understands that civil, criminal, or administrative penalties may apply for failure to protect information appropriately.

4.12 Sensitive Information

Any information considered sensitive must be protected by the Bidder from unauthorized disclosure, modification or access.

Types of sensitive information that will be found on OICL systems the Bidder may support or have access to include, but are not limited to: Information subject to special statutory protection, legal actions, disciplinary actions, complaints, IT security, pending cases, civil and criminal investigations, etc.

4.13 Technological Advancements

The hardware and software proposed as part of this contract

- a. should not reach end of support during the period of contract
- b. should not have been announced End of Life /Sales as on the date of bid submission

In the event if the proposed hardware and software reached end of support during the period of contract, in such case the Bidder is required to replace the end of support hardware/ software with equivalent or higher capacity hardware/software at no additional cost to OICL.

4.14 Confidentiality

Bidder understands and agrees that all materials and information marked and identified by OICL as 'Confidential' are valuable assets of OICL and are to be considered OICL's proprietary information and property. Bidder will treat all confidential materials and information provided by OICL with the highest degree of care necessary to insure that unauthorized disclosure does not occur. Bidder will not use or disclose any materials or information provided by OICL without OICL's prior written approval.

Bidder shall not be liable for disclosure or use of any materials or information provided by OICL or developed by Bidder which is:

- a. possessed by Bidder prior to receipt from OICL, other than through prior disclosure by OICL, as documented by Bidder's written records;
- b. published or available to the general public otherwise than through a breach of Confidentiality; or
- c. obtained by Bidder from a third party with a valid right to make such disclosure, provided that said third party is not under a confidentiality obligation to OICL; or
- d. Developed independently by the Bidder.

In the event that Bidder is required by judicial or administrative process to disclose any information or materials required to be held confidential hereunder, Bidder shall promptly notify OICL and allow OICL a reasonable time to oppose such process before making disclosure.

Bidder understands and agrees that any use or dissemination of information in violation of this Confidentiality Clause will cause OICL irreparable harm, may leave OICL with no adequate remedy at law and OICL is entitled to seek to injunctive relief.

Nothing herein shall be construed as granting to either party any right or license under any copyrights, inventions, or patents now or hereafter owned or controlled by the other party.

The requirements of use and confidentiality set forth herein shall survive the expiration, termination or cancellation of this tender.

Nothing contained in this contract shall limit the Bidder from providing similar services to any third parties or reusing the skills, know-how, and experience gained by the employees in providing the services contemplated under this contract. The confidentiality obligations shall survive for a period of one year post the termination/expiration of the Agreement.

4.15 Guarantees

Bidder should guarantee that all the software's provided to OICL are licensed and legal. All hardware and related software must be supplied with their original and complete printed documentation.

4.16 Liquidated Damages

If the Bidder fails to meet the Project Timelines as per Section 1.7, OICL shall without prejudice to its other remedies under the contract, deduct from the contract price, as liquidated damages, a sum equivalent to 0.5% of the contract price for every week (seven days) or part thereof of delay, up to maximum deduction of 10% of the total contract price. Once the maximum is reached, OICL may consider termination of the contract.

4.17 Termination for Default

OICL may, without prejudice to any other remedy for breach of contract, by 30 calendar days written notice of default sent to the Bidder, terminate the contract in whole or in part:

- a) If the Bidder fails to deliver any or all of the Solution, Components and services within the time period(s) specified in the contract, or any extension thereof granted by OICL; or
- b) If the Bidder fails to perform any other obligation(s) under the contract

In the event of OICL terminating the contract in whole or in part, pursuant to above mentioned clause, OICL may procure, upon such terms and in such manner, as it deems appropriate, goods and services similar to those undelivered and the Bidder shall be liable to OICL for any excess costs incurred for procurement of such similar goods or services (capped at 5% differential value). However, the Bidder shall continue performance of the contract to the extent not terminated.

4.18 Force Majeure

The Bidder shall not be liable for forfeiture of his performance security, liquidated damages or termination for default, if and to the extent that, his delay in performance or other failure to perform his obligations under the contract is the result of an event of Force Majeure.

For purposes of this clause, "Force Majeure" means an event beyond the control of the Bidder and not involving the Bidder and not involving the Bidder's fault or negligence and not foreseeable. Such events may include, but are not restricted to, acts of OICL either in its sovereign or contractual capacity, wars or revolutions, fires, floods, epidemics, quarantine restrictions and freight embargoes.

If a Force Majeure situation arises, the Bidder shall promptly notify OICL in writing of such conditions and the cause(s) thereof. Unless otherwise directed by OICL, the Bidder shall seek all reasonable alternative means for performance not prevented by the Force Majeure event.

4.19 Termination for Insolvency

OICL may, at any time, terminate the contract by giving written notice to the Bidder, without any compensation to the Bidder, whatsoever if:

- i. The Bidder becomes bankrupt or otherwise insolvent, provided that such termination will not prejudice or affect any right of action or remedy which has accrued or will accrue thereafter to OICL.

- ii. the Supplier being a company is wound up voluntarily or by the order of a court or a receiver, or manager is appointed on behalf of the debenture/shareholders or circumstances occur entitling the court or debenture/shareholders to appoint a receiver or a manager, provided that such termination will not prejudice or affect any right of action or remedy accrued or that might accrue thereafter to the OICL.

4.20 Termination for Convenience

Either party may, by 30 calendar days written notice sent to the other party, terminate the contract, in whole or in part at any time of their convenience. The notice of termination shall specify the extent to which performance of work under the contract is terminated, and the date upon which such termination becomes effective.

The goods and services that are complete and ready for shipment within 30 calendar days after the receipt of notice of termination by the Bidder shall be purchased by OICL at the contracted terms and prices. For the remaining goods and services, OICL may elect:

- i. To have any portion completed and delivered at the contracted terms and prices; and/ or
- ii. To cancel the remainder and pay to the Bidder a mutually agreed amount for partially completed goods and services and for materials and parts previously procured by the Bidder.

4.21 Resolution of disputes

OICL and the Bidder shall make every effort to resolve amicably, by direct informal negotiation between the respective project managers of OICL and the Bidder, any disagreement or dispute arising between them under or in connection with the contract. If OICL project manager and the Bidder project manager are unable to resolve the dispute they shall immediately escalate the dispute to the senior authorized personnel designated by the Bidder and OICL respectively. If after thirty days from the commencement of such negotiations between the senior authorized personnel designated by the Bidder and OICL, OICL and the Bidder have been unable to resolve amicably a contract dispute; either party may require that the dispute be referred for resolution through formal arbitration. All questions, claims, disputes or differences arising under and out of, or in connection with the contract or carrying out of the work whether during the progress of the work or after the completion and whether before or after the determination, abandonment or breach of the contract shall be referred to arbitration by a sole Arbitrator acceptable to both parties failing which the number of arbitrators shall be three, with each side to the dispute being entitled to appoint one arbitrator. The two arbitrators appointed by the parties shall appoint a third arbitrator who shall act as the presiding arbitrator. The Arbitration and Reconciliation Act, 1996 or any statutory modification thereof shall apply to the arbitration proceedings and the venue of the arbitration shall be New Delhi. The arbitration proceedings shall be conducted in English language. Subject to the above, the courts of law at New Delhi alone shall have the jurisdiction in respect of all matters connected with the Contract. The arbitration award shall be final, conclusive and binding upon the Parties and judgment may be entered thereon, upon the application of either Party to a court of competent jurisdiction. Each Party shall bear the cost of

preparing and presenting its case, and the cost of arbitration, including fees and expenses of the arbitrators, shall be shared equally by the Parties unless the award otherwise provides.

4.22 Governing Language

The contract shall be written in the language of the bid i.e. English. All correspondence and other documents pertaining to the contract, which are exchanged by the parties, shall be written in that same language. English Language version of the contract shall govern its implementation.

4.23 Applicable Law

The contract shall be interpreted in accordance with the Indian Laws for the time being in force and will be subject to the exclusive jurisdiction of Courts at Delhi (with the exclusion of all other Courts)

4.24 Prices

The prices quoted (as mentioned in Appendix 2 - Bill of Materials submitted by the Bidder) for the solution and services shall be firm throughout the period of contract and shall not be subject to any escalation.

4.25 Taxes & Duties

The Bidder shall be entirely responsible for all taxes, duties, license fees, and demurrage charges etc., incurred until delivery of the contracted goods & services to OICL. However, local levies (if any), in respect of transaction between OICL and Bidder, will be reimbursed by OICL, on submission of proof of actual transaction. If there is any increase/decrease in taxes/ duties due to any reason whatsoever, after Notification of Award, the same shall be passed on to OICL.

4.26 Deduction

Payments shall be subject to deductions (such as TDS) of any amount, for which the Bidder is liable under the agreement against this tender.

4.27 No Claim Certificate

The Bidder shall not be entitled to make any claim whatsoever against OICL under or by virtue of or arising out of this contract, nor shall OICL entertain or consider any such claim, if made by the Bidder after he shall have signed a "No Claim" certificate in favor of OICL in such forms as shall be required by OICL after all payments due to the Supplier are made in full.

4.28 Cancellation of the contract & compensation

OICL reserves the right to cancel the contract placed on the selected bidder and recover expenditure incurred by the Company in the following circumstances:

- i. The selected bidder commits a breach of any of the terms and conditions of the bid.
- ii. The selected bidder goes in to liquidation voluntarily or otherwise.
- iii. The progress made by the selected bidder is found to be unsatisfactory
- iv. If deductions on account of liquidated Damages exceeds more than 10% of the

total contract price.

OICL reserves the right to cancel the AMC placed on the selected bidder and recover AMC payment made by the Company, if the service provided by them is not satisfactory.

In case the selected bidder fails to deliver the quantity as stipulated in the delivery schedule, OICL reserves the right to procure the same or similar materials from alternate sources at the risk, cost and responsibility (capped at 5% differential value) of the selected bidder. After the award of the contract, if the selected bidder does not perform satisfactorily or delays execution of the contract, OICL reserves the right to get the balance contract executed by another party of its choice by giving thirty day's written notice for the same. In this event, the selected bidder is bound to make good the additional expenditure (capped at 5% differential value), which OICL may have to incur in executing the balance of the contract. This clause is applicable, if for any reason, the contract is cancelled.

If the Contract is cancelled during Warranty, the bidder shall repay all the payment received from OICL and remove the solution supplied and installed by the bidder without any extra cost to the Company. If the Contract is cancelled during AMC, OICL shall deduct payment on pro-rata basis for the unexpired period of the contract

4.29 Rights reserved by OICL

- i. Company reserves the right to accept or reject any or all Bids without assigning any reasons.
- ii. Company reserves the right to verify the validity of information given by the Bidders. If at any future point of time, it is found that the Bidder had made a statement, which is factually incorrect, OICL will reserve the right to debar the Bidder from bidding prospectively for a period to be decided by OICL and take any other action as maybe deemed necessary.
- iii. OICL reserves the right to issue a fresh RFP for this project at any time during the validity of the contract period with the selected Bidder.

4.30 Limitation of Liability

Bidder's cumulative liability for its obligations under the contract shall not exceed the total contract value and the Bidder shall not be liable for incidental / consequential or indirect damages including loss of profit or saving.

4.31 Waiver

No failure or delay on the part of either party relating to the exercise of any right power privilege or remedy provided under this tender document or subsequent agreement with the other party shall operate as a waiver of such right power privilege or remedy or as a waiver of any preceding or succeeding breach by the other party nor shall any single or partial exercise of any right power privilege or remedy preclude any other or further exercise of such or any other right power privilege or remedy provided in this tender document all of which are several and cumulative and are not exclusive of each other or of any other rights or remedies otherwise available to either party at law or in equity.

4.32 Violation of terms

OICL clarifies that OICL shall be entitled to an injunction, restraining order, right for recovery, suit for specific performance or such other equitable relief as a court of competent jurisdiction may deem necessary or appropriate to restrain the Bidder from committing any violation or enforce the performance of the covenants, obligations and representations contained in this tender document. These injunctive remedies are cumulative and are in addition to any other rights and remedies OICL may have at law or in equity, including without limitation a right for recovery of any amounts and related costs and a right for damages.

4.33 Repeat Order

OICL may place Repeat Order against the original order for a quantity up to 50% of the original order quantity during the contract period.

4.34 Integrity Pact

To ensure transparency, equity, and competitiveness and in compliance with the CVC guidelines, this tender shall be covered under the Integrity Pact (IP) policy of OICL. The pact essentially envisages an agreement between the prospective bidders/vendors and OICL committing the persons/officials of both the parties, not to exercise any corrupt influence on any aspect of the contract. The format of the agreement is enclosed in Annexure 14.

Signing of the IP with OICL would be one of the preliminary qualification for further evaluation. In other words, entering into this pact would be one of the preliminary qualification for this tender and the pact shall be effective from the stage of invitation of bids till the complete execution of the contract. Any vendor/bidder not signed the document or refusing to sign shall be disqualified in the bidding process

The Integrity Pact envisages a panel of Independent External Monitors (IEMs) to review independently and objectively, whether and to what extent parties have complied with their obligation under the pact. The IEM has the right to access to all the project document. **Shri N S R Chandra Prasad** and **Smt Ajanta Dayalan** shall be acting as the IEM for this contract/Tender. However, OICL at its sole discretion reserves the right to change/name another IEM, which shall be notified latter.

5 Instruction to Bidders

5.1 Procedure for submission of Bids

Bidders are required to submit Bids online through Auction Tiger e-procurement portal - <https://eauction.auctiontiger.net>. Submission of Online Bids is mandatory for this Tender.

5.1.1 Tender Bidding Methodology

Sealed Bid System.

The Bidders will be required to submit following three separate documents.

1. Eligibility Bid
2. Technical Bid
3. Commercial Bid

5.2 Offline Submissions

The bidder is requested to submit the following documents offline to the under mentioned address before the start of Public Online Tender Opening Event in a Sealed Envelope at the address mentioned in Section 1.5.

The envelope shall bear (the project name), the tender number and the words 'DO NOT OPEN BEFORE' (due date & time).

1. Original copy of the Bid Security in the form of a Bank Guarantee.
2. Original copy of the power-of-attorney

Note: The Bidder should also upload the scanned copies of all the above mentioned original documents as Bid-Annexures during Online Bid-Submission.

Note:

1. The Bid shall be typed in English and signed by the Bidder or a person duly authorized to bind the Bidder to the Contract. The person(s) signing the Bids shall initial all pages of the Bids.
2. All envelopes should be securely sealed and stamped.
3. It is mandatory for the Bidder to quote for all the items mentioned in the RFP.

5.3 Bid Security

EMD of Rs. 40,00,000/- (Rupees Forty Lakhs Only) [Exempt for eligible entities(i.e. MSME/NSIC), as per Government of India Guidelines, subject to submission of the relevant certificate. Certificate shall be valid on the date of Bid Submission] in the form of Bank Guarantee favoring 'The Oriental Insurance Company Ltd' valid for six months should be submitted as per format given in Annexure 5 - Pro forma for Bid Security.

- a) BG should be drawn on Nationalized / Scheduled bank in favor of 'The Oriental Insurance Company Ltd'. Non-submission of BG along with Eligibility-Bid document will disqualify the Bidder.
- b) BG will be returned to the qualified Bidder after acceptance of Purchase Order and/ or Signing of the Contract(s) by the Bidder and submission of required Performance Bank Guarantee (PBG) as per format given in Annexure 6 - Pro forma for Performance Security.
- c) For the Bidders who do not qualify in this tender, BG will be returned after the selection of successful Bidder.
- d) EMD submitted by Bidder may be forfeited if:
 - Bidder backs out of bidding process after submitting the bids;
 - Bidder backs out after qualifying;
 - Bidder does not accept the Purchase Order / Sign the Contract within the time prescribed by OICL after qualifying.

6 Bid Documents

6.1 Eligibility Bid Documents

1. Compliance to Eligibility Criteria as per RFP Section 1.6 along with all relevant supporting documents
2. Application Form for Eligibility Bid as per Annexure 1
3. The references of bidder's clients. Also provide the name, designation, and contact details of a contact person for each reference as per Annexure 2.
4. EMD of Rs.40,00,000 (Rs Forty Lakhs only) (Exempt for eligible entities(i.e. MSME/NSIC), as per Government of India Guidelines, subject to submission of the relevant certificate. Certificate shall be valid on the date of Bid Submission) in the form of BG favoring 'The Oriental Insurance Company Limited' as per Annexure-5.
5. The corporate profile of the bidder (printed corporate brochure is preferred).
6. The profile of the bidder (as per Annexure-9)
7. List of bidder's support/service locations in India.
8. Bidder shall submit PAN number, GSTIN.
9. Undertaking that the Bidder has quoted for all items and the bid validity will be for 180 days from the date of submission of bid.
10. The power of attorney or authorization, or any other document consisting of adequate proof of the ability of the signatory to bind the Bidder

11. The power of attorney or authorization, or any other document consisting of adequate proof of the ability of the signatory to bind the OEM
12. Statement of No-Deviation (Annexure 7)
13. Integrity Pact(Annexure 14 on Stamp Paper)

6.2 Technical Bid Documents

1. Executive Summary of Bidder's response. The Executive Summary should be limited to a maximum of five pages and should summarize the content of the response. The Executive Summary should initially provide an overview of Bidder's organization and position with regards to proposed solution and professional services. A summary of the Bidder's products and services that will be provided as a part of this procurement should follow.
2. Detailed technical note covering the detailed scope of work.
3. Compliance to Minimum Functional and Technical Specifications as per Appendix 1.
4. The Bidder should also include a replica of the masked final commercial bid without prices in the technical bid. The Bidder must note that the masked commercial bid should be actual copy of the commercial bid submitted with prices masked and not copy of the Pro-forma/format of the Appendix 2 – Bill of Materials in the RFP. The Masked Bill of Material shall include details of the Software (Name, Version Details , License Metrics etc.) , Hardware (Name of the Equipment with OEM Make and Model, CPU , RAM , HDD, Cores etc.) , Facility Management (Efforts of Bidder and OEMs) etc.
5. Implementation plan & warranty support
6. Support Plan
7. User Training Plan
8. Transition Plan
9. Undertaking of Authenticity for Appliance and Equipment Supplies (on Bidder's Letterhead) (Annexure 11)
10. Undertaking for Back-lining (Annexure 12)

Note:

1. Participation in this tender will mean that the Bidder has accepted all terms and conditions and clauses of this tender and subsequent modifications to this tender, if any.
2. The documentary evidence asked in respect of the eligibility criteria would be essential. Bids not accompanied by documentary evidence may be subject to rejection. Clarification/ Additional documents, if any, sought by OICL from the Bidder has to be submitted within the stipulated time.

Otherwise, bid will be rejected and no further correspondence in the matter will be entertained by OICL.

3. Any alterations, erasures or discrepancies in figures etc. may render the bid invalid. The bid may be rejected in case of non-adherence to any of the instructions given above.
4. OICL reserves the right not to allow / permit changes in the technical specifications and not to evaluate the offer in case of non-submission or partial submission of technical details.
5. OICL may at its discretion waive any minor non-conformity in any offer and the same shall be binding on all Bidders and OICL reserves the right for such waivers.
6. If OICL is not satisfied with the technical specifications in any tender and observes major deviations, the technical bids of such Bidders will not be short-listed and the price bids of such Bidders will not be opened. No further discussions shall be entertained with such Bidders in respect of the subject technical bid.

6.3 Commercial Bid Documents

Commercial Bid should contain Appendix 2 – Bill of Materials. The Commercial Bid should give all relevant price information and should not contradict the Pre-qualification and Technical Bid in any manner.

There should be no hidden costs for items quoted. The rates quoted should be in Indian rupees only and same should be rounded off to the nearest rupee and filled in both words and figures.

Evaluation Criteria

The competitive bids shall be submitted in three stages:

- ▶ Stage 1 – Eligibility Evaluation
- ▶ Stage 2 - Technical Evaluation
- ▶ Stage 3– Commercial Evaluation

6.4 Eligibility Evaluation

Eligibility criterion for the Bidders to qualify this stage is clearly mentioned in Clause 1.6. The Bidders who meet ALL these criteria would only qualify for the second stage of evaluation. The Bidder would also need to provide supporting documents for eligibility proof. All the credentials of the Bidder necessarily need to be relevant to the Indian market.

The decision of OICL shall be final and binding on all the Bidders to this document. OICL may accept or reject an offer without assigning any reason whatsoever.

6.5 Technical Evaluation

The technical proposals of only those bidders shall be evaluated who have satisfied the eligibility criteria requirements.

The scoring methodology for technical bid components is explained in the following paragraphs.

The proposal submitted by the bidders shall, therefore, be evaluated on the following parameters:

- Functional and Technical Requirement
- Presentation on proposed solution
- Site Visit/ Telephonic interview / Video conference
- Past Experience
- Resource Capability

The proposal submitted by the Bidders shall, therefore, be evaluated on the following criteria:

S.No.	Technical Criteria	Maximum Marks
1	Functional and Technical Requirement	600
2	Presentation on proposed solution	100
3	Site Visit/ Telephonic interview / Video conference	100
3	Past Experience	100
4	Resource Capability	100
	Total	1000

The bidders scoring **less than 70 percent marks** (cut-off marks) in the technical evaluation shall not be considered for commercial opening of the bids. Once the evaluation of technical proposals is completed, the bidders who score more than the prescribed cut-off score will only be short listed for commercial opening of the bids

Please note: All the requirements mentioned in Appendix-1 are mandatory and critical for the envisioned Solution. Any non-compliance to mandatory requirements could lead to disqualification of the bid at sole discretion of the OICL. OICL may at its sole discretion ask any / all the bidders to justify Non-Compliant (N) response to any of the defined requirements. Any unreasonable noncompliance/ deviations to functional or technical requirements which defeats the purpose of this initiative may lead to disqualification of the bid at sole discretion of the OICL.

1. Compliance to Functional and Technical requirements

Responses received in Appendix 1 –Checklist would be used for evaluating the Bidder on the functionality being proposed by the Bidder. The Score for each area in Appendix 1 would be worked out as follows:

All the requirements are mandatory. Bidder shall indicate the availability of each requirement as a standard product (S) or customization C.

The Bidder is required to provide 100% compliance to functional and Technical requirements. Marks will be awarded as per the table below:

Bidder's Response	Marks
Standard Product (S)	10
Customization (C)	6
Not Feasible (N)	0

Where,

- Standard Product (S): The system that shall be delivered currently supports this function either in native form or through existing parameterization without further enhancement or the use of either programming or user tools, i.e. included in the base package, to be delivered in the version of the solution being proposed to OICL.
- Customization (C): The function is not available in the product and it would require customization by the bidder and the bidder shall provide these features at no additional cost before the beginning of the User Acceptance Test.
- Not Feasible (N): The function is not available in the product and cannot be provided even after customization

The total marks obtained against the total number of functional specifications will be proportionately modified to a maximum of 600 for the sake of evaluation.

Note: Unreasonable scope limitations which defeat the purpose of this RFP shall lead to reduction in scores or even possibility of disqualification of the bidder. This will be at the sole discretion of the OICL.

2. Presentation on proposed solution

All eligible Bidders will be required to make presentations to supplement their bids and showcase overall solution proposed. The OICL will schedule presentations and the time and location will be communicated to the Bidders. Failure of a Bidder to complete a scheduled presentation to the OICL may result in rejection of the proposal.

Category	Marks
Understanding of OICL business Operating environment and scope	10
Demonstration of organization capability for the proposed initiative	10

Category	Marks
Service Model demonstration	10
Demonstration of value proposition offered in the bid which shall enable the success of the project	10
Detailed Solution Capability and approach	50
Innovative use cases for the OICL	10

3. Site Visit/ Telephonic interview / Video conference

A Committee of people from OICL at its discretion would carry out Reference Site Visits/ Telephonic Interview/ Video Conference with the existing customers of the Bidder. The inputs that will be received from the Customer would be considered by OICL and this might not need any documentary evidence. This rating would be purely on the inputs (like satisfaction of the organization of the product, timeliness of implementation, promptness of support services etc.) provided by the Bidder's customers and score would be assigned to Bidder by the committee. The OICL at its discretion may reject the proposal of the Bidder without giving any reasons whatsoever, **in case the responses received from the Site Visits / Telephonic interview / Video conference are negative.**

4. Past Experience

Category	Maximum Marks	Marks
The Bidder should have implemented or should have under implementation any 3 of the below mentioned security solutions in 1 BFSI with at least 1000 offices. i. SIEM ii. NAC iii. MDM iv. DDoS v. PIM vi. DAM	100	80
The Bidder should have implemented or should have under implementation any 3 of the below mentioned security solutions in more than 1 BFSI with at least 1000 offices. i. SIEM ii. NAC iii. MDM		100

Category	Maximum Marks	Marks
iv. DDoS v. PIM vi. DAM		

* Bidder is required to submit successful completion certificates or Credential Letters or Copy of Contract / Purchase order from the Client in order to substantiate the above mentioned criteria.

5. Scoring for Resource Capability

The Bidder should provide details of bidder's resource capability in providing security solutions. The Bidder's resource experience shall be evaluated. The Bidder should provide the detailed CV of all the proposed resources including details of scope of project, Activity performed, Timelines of the project, certifications of the resources and Educational Qualifications. Bidder shall submit the certification which is valid as on the date of bid submission in order to substantiate that bidder resource has valid certification.

Category	Maximum Marks	Marks
The Bidder having 5 resources with certification in CISA or CISSP or CISM or any other relevant / OEM professional certification in the field of IT Security	100	80
The Bidder having more than 5 resources with certification in CISA or CISSP or CISM or any other relevant / OEM professional certification in the field of IT Security		100

6.6 Commercial Evaluation

The commercial bids for the technically qualified Bidders will be opened and reviewed to determine whether the commercial bids are substantially responsive. Bids that are not substantially responsive are liable to be disqualified at OICL's discretion. The total cost of ownership for the purpose of evaluation shall be calculated over the contract period of five (5) years.

OICL will award the contract to the successful Bidder whose bid has been determined to be substantially responsive and has been determined as the lowest commercial bid (L1), provided further that the Bidder is determined to be qualified to perform the contract satisfactorily.

7 Service Level Agreement

7.1 Service Level

The SLA specifies the expected levels of service to be provided by the Bidder to OICL. This expected level is also called the baseline. Any degradation in the performance of the solution and services is subject to levying penalties.

Payments to the Bidder are linked to the compliance with the SLA metrics. During the contract period, it is envisaged that there could be changes to the SLAs, in terms of addition, alteration or deletion of certain parameters, based on mutual consent of both the parties i.e. OICL and Bidder.

The Bidder shall monitor and maintain the stated service levels to provide quality service. Bidder to use automated tools to provide the SLA Reports. Bidder to provide access to OICL or its designated personnel to the tools used for SLA monitoring.

7.1.1 Definitions

1. "Availability" means the time for which the services and facilities are available for conducting operations on the OICL system including application and associated infrastructure.

Availability is defined as (%) =
$$\frac{(\text{Operation Hours} - \text{Downtime})}{(\text{Operation Hours})} * 100\%$$

2. The business hours are 24*7 on any calendar day the OICL is operational.
3. All the infrastructure of Data Center, Disaster Recovery site, Offices/Branches will be supported on 24x7 basis.
4. The "Operation Hours" for a given time frame are calculated after deducting the planned downtime from "Operation Hours". The Operation Hours will be taken on 24x7 basis, for the purpose of meeting the Service Level requirements i.e. availability and performance measurements both.
5. "Downtime" is the actual duration for which the system was not able to service OICL or the Clients of OICL, due to System or Infrastructure failure as defined by OICL and agreed by the Bidder.
6. "Scheduled Maintenance Time" shall mean the time that the System is not in service due to a scheduled activity as defined in this SLA. The scheduled maintenance time would not be during business hours. Further, scheduled maintenance time is planned downtime with the prior permission of OICL
7. "Incident" refers to any event / abnormalities in the functioning of any of IT Equipment / Services that may lead to disruption in normal operations of the Data Centre, System or Application services.
8. Total Maintenance Cost refers to Sum of FM Manpower Cost and AMC, ATS & others Cost for the entire contract duration.

7.1.2 Interpretation & General Instructions

1. Typical Resolution time will be applicable if systems/components are not available to the OICL's users.
2. The SLA parameters shall be monitored on a monthly basis for the entire contract duration (including the warranty period) as per the individual SLA parameter requirements. The Bidder

is expected to provide the following service levels. In case the service levels defined in the tables below cannot be achieved, it shall result in a breach of contract and invoke the penalty clause.

3. A Service Level violation will occur if the Bidder fails to meet Minimum Service Levels on a monthly basis for a particular Service Level.
4. Quarterly SLAs would be analyzed. However, there would be month wise SLAs and all SLA targets have to be met on a monthly basis.
5. Overall Availability and Performance Measurements will be on a quarterly basis for the purpose of Service Level reporting. Month wise "Availability and Performance Report" will be provided by the Bidder for every quarter in the OICL suggested format and a review shall be conducted based on this report. Availability and Performance Report provided to OICL shall contain the summary of all incidents reported and associated performance measurement for that period.
6. The primary intent of Penalties is to ensure that the system performs in accordance with the defined service levels. Penalties are not meant to be punitive or, conversely, a vehicle for cutting fees.

7.1.3 Service Level Criteria

Severity Definition during Live operations due to Infrastructure/Functional issues of the proposed solution, the SLA's will be applicable post go-live of Solution at DC, DRS and other OICL Offices

During the term of the contract, the bidder will maintain the equipment/components/hardware/software in perfect working order and condition and for this purpose bidder will provide the repairs and maintenance services as require.

Level Classification

Level	Function/Technologies
Critical	<ol style="list-style-type: none"> i Such class of errors will include problems, which prevent users from making operational use of solution. ii Security Incidents iii No work-around or manual process available iv Financial impact on OICL v Infrastructure related to providing solution to the OICL users comprising of but not limited to the following: <ul style="list-style-type: none"> • Proposed Solution Tools / Application Servers • Proposed Solution Database Servers / Appliance • Proposed Solution servers/appliances • Network components, if any proposed by the bidder
High Priority	<ol style="list-style-type: none"> i Any incident which is not classified as "Critical" for which an acceptable workaround has been provided by the Bidder or; ii Any problem due to which the infrastructure of the proposed solution is not available to the OICL users or does not perform according to the defined performance and query processing parameters required as per the RFP or;

Level	Function/Technologies
	iii Users face severe functional restrictions in the application irrespective of the cause. iv Key business infrastructure, systems and support services comprising of but not limited to the following: <ul style="list-style-type: none"> Proposed solution Test & Development and Training Infrastructure and Application Infrastructure for providing access of dashboards etc.
Medium Priority	i Any incident which is not classified as “High Priority” for which an acceptable workaround has been provided by the Bidder; ii Moderate functional restrictions in the application irrespective of the cause. Has a convenient and readily available workaround. iii No impact on processing of normal business activities iv Equipment/system/Applications issues and has no impact on the normal operations/day-to-day working. v All other residuary proposed solution Infrastructure not defined in “Critical” and “High Priority”
Low Priority	i All other residuary proposed solution Infrastructure not defined in “Medium Priority”, “Critical” and “High Priority”

S. No	Service Area	Service Level	Penalty
1	All Solutions Uptime	Uptime % calculated on monthly basis for each solution. In case of any hardware problems, the SI should ensure that replacement devices are made available to meet the SLAs.	Penalty (as mentioned Below) of the individual quarterly maintenance Cost (Including AMC and ATS Cost). These penalties will be deducted against any payable amount by OICL. Quarterly Maintenance Cost = $\frac{\text{Total Maintenance Cost (Including AMC \& ATS Cost) for the entire contract period}}{\text{(Contract Period *4)}}$
		99.9% and above	NA
		98% to 99.89%	5%
		95% to 97.99%	8%
		90% to 94.99%	15%
		Less than 90%	20%

S. No.	Service Area	Expected Service Level	Penalty
1	Incident Response	<p>24x7 monitoring of all in-scope devices</p> <p>Categorization of events into Critical, High, Medium and Low priority shall be carried out in consultation with the OICL during the contracting phase.</p> <p>Example for calculation of percentage of incidents</p> <p>10 Incidents are logged of which 8 are responded within the specified time and 2 have been delayed. This means $8/10*100 = 80\%$ have been responded within the specified timelines and correspondingly the penalty will be applied based on the event/incident categorization.</p>	<p>All Critical, High and Medium priority incident should be logged as incident tickets and responded as per below SLAs:</p> <p>Incident along with action plan/mitigation steps should be provided to designated OICL personnel as per the below SLA:</p> <ul style="list-style-type: none"> • Critical incidents within 15 minutes of the incident identification. Update should be provided every 15 minutes till the closure of the incident. • High priority incidents within 30 minutes of the incidents identification. Update should be provided every 1 hour till the closure of the incident • Medium priority incidents within 60 minutes of the incidents identification. Update should be provided every 4 hours till the closure of the incident. <p>Quarterly Maintenance Cost = (Total Maintenance Cost (Including AMC & ATS Cost) for the entire contract period) / (Contract Period *4)</p> <p>Penalty:</p> <p>SLA is measured on a Quarterly basis and the penalty is as follows:</p> <p>Critical Events:</p> <ul style="list-style-type: none"> • 95-99%: 10% of the Quarterly Maintenance (Including ATS & AMC) Cost

S. No.	Service Area	Expected Service Level	Penalty
			<ul style="list-style-type: none"> 90-95%: 15% of the Quarterly Maintenance (Including ATS & AMC) Cost <90%: 20% of the Quarterly Maintenance (Including ATS & AMC) Cost <p>High Priority Events:</p> <ul style="list-style-type: none"> 95-99%: 5% of the Quarterly Maintenance (Including ATS & AMC) Cost 90-95%: 10% of the Quarterly Maintenance (Including ATS & AMC) Cost <90%: 15% of the Quarterly Maintenance (Including ATS & AMC) Cost <p>Medium Priority Events:</p> <ul style="list-style-type: none"> 95-99%: 1% of the Quarterly Maintenance (Including ATS & AMC) Cost 90-95%: 2% of the Quarterly Maintenance (Including ATS & AMC) Cost <90%: 5% of the Quarterly Maintenance (Including ATS & AMC) Cost <p>Low Priority/ Operational Incidents need to be logged and maintained for reference. An incident ticket need not be raised for such incidents. However these need to be included in the daily reports.</p>
2	Incident Resolution	Response and resolution of the identified incidents.	The timelines required for resolution of Critical, High and Medium priority mentioned below:

S. No.	Service Area	Expected Service Level	Penalty
		<p>Managing the devices and fine-tuning them so as to avoid and prevent further attacks.</p>	<ul style="list-style-type: none"> • Disaster or Critical incidents within 60 minutes of the incident identification. Update should be provided every 15 minutes till the closure of the incident • High priority incidents within 90 minutes of the event identification. Update should be provided every 1 hour till the closure of the incident. • Medium priority incidents within 120 minutes of the event identification. Update should be provided every 4 hours till the closure of the incident. <p>Quarterly Maintenance Cost = (Total Maintenance Cost (Including AMC & ATS Cost) for the entire contract period) / (Contract Period *4)</p> <p>Penalty:</p> <ul style="list-style-type: none"> • Any violation in meeting the SLA requirements which leads to Critical incident, OICL shall impose a penalty 10% of the Quarterly Maintenance Cost for each 30 minutes delay up to 2 hours, beyond 2 hours penalty would be 10% of the overall Quarterly Maintenance Cost for each 20 minutes delay. • Any violation in meeting the SLA requirements which leads to High or Medium incident, OICL shall impose a penalty of 5% of the Quarterly Maintenance Cost for each 45 minutes delay up to 3 hours, beyond 3 hours penalty would be 10% of the overall

S. No.	Service Area	Expected Service Level	Penalty
			Quarterly Maintenance Cost for each 30 minutes delay.
3	Report and Dashboard	Periodic reports to be provided to OICL	<p>Daily Reports: Critical reports should be submitted as and when required. Timings will be mutually decided.</p> <p>Penalty Delay in reporting for daily report for more than 6 hour shall incur a penalty of INR 5,000 for each default</p> <p>Weekly Reports: Every Monday of the subsequent week</p> <p>Penalty Delay in reporting by more than 3 days for weekly reports shall incur a penalty of INR 10,000 for each default</p> <p>Monthly Reports: 5th of each month.</p> <p>Penalty Delay in reporting by more than 7 days for monthly reports shall incur a penalty of INR 15,000 for each default</p>
4	Vulnerability Assessment and Penetration Testing (External & Internal)	<ul style="list-style-type: none"> The Bidder is expected to provide Vulnerability Assessment Reports with remediation steps. An incident needs to be logged for all vulnerabilities identified and the incident response SLA shall apply for these. 	<ul style="list-style-type: none"> To be conducted for identified devices and/or applications and/or Solutions in coordination with the OICL to ensure that business Operations are not impacted. Ad-hoc scan to be conducted as and when required by the OICL

S. No.	Service Area	Expected Service Level	Penalty
			<p>Quarterly Maintenance Cost = (Total Maintenance Cost (Including AMC & ATS Cost) for the entire contract period) / (Contract Period *4)</p> <p>Penalty</p> <ul style="list-style-type: none"> Delay in performing VAPT scan and providing final report by more than 7 days from the specified timelines shall incur a penalty of 10% of Quarterly Maintenance Cost
5	Continual Improvement	<ul style="list-style-type: none"> The Bidder is expected to improve the operations on an on-going basis. The Bidder is expected to provide a quarterly report of the new improvements suggested, action plans, and the status of these Improvements to the OICL. Improvement areas could include: process changes/ training resulting in efficiency/SLA improvement, new correlation rules to identify threat patterns etc. 	<ul style="list-style-type: none"> Quarterly reports need to be provided by the 5th day of each quarter beginning <p>Quarterly Maintenance Cost = (Total Maintenance Cost (Including AMC & ATS Cost) for the entire contract period) / (Contract Period *4)</p> <p>Penalty:</p> <ul style="list-style-type: none"> Delay in providing quarterly reports shall lead to 2% of Quarterly Maintenance Cost
6	Periodic Review	The Project Manager from the Bidder is expected to conduct a monthly review meeting with OICL officials resulting in a report covering details about current SLAs, status of operations, key threats and new threats	<ul style="list-style-type: none"> Monthly meeting for the entire contract period to be conducted on the 5th (tentatively) of each month during the operations phase. <p>Quarterly Maintenance Cost = (Total Maintenance Cost (Including AMC & ATS Cost) for the entire</p>

S. No.	Service Area	Expected Service Level	Penalty
		identified, issues and challenges etc.	contract period) /(Contract Period *4) Penalty: <ul style="list-style-type: none">A delay of more than three days will incur a penalty of 1% of Quarterly Maintenance Cost.
7	Security Device Management and Administration	Bidder is expected to provide this service 24/7 basis. Management and administration of all in-scope security devices and/or solutions	Penalty: <ul style="list-style-type: none">For more than 1 hour delay (after OICL confirmation) for rule modification in any of the security devices / solutions will incur a penalty of INR 10,000 for each default.For wrong rule modification in any of the security solutions will incur a penalty of INR 10,000 for each default.For a wrong rule modification in any of the security solutions by which OICL incur any service disturbance will incur a penalty of INR 20,000 for each default.

Resources Deployment SLA

Service Details	SLA Measurement	SLA	Penalty	Measurement Tools	Remarks
Program Manager	No change in these resources for minimum 1 year from the issuance of the PO and maximum 2 changes in the complete contract term (*the Program Manager should not be rotated to other clients of the Service Provider under the contract period).	100%	Penalty shall be INR 2, 00,000 for each default beyond the agreed the threshold.	Manual	If the resource leaves because of attrition, the same would not be considered for any penalty computation.
Staff transition period (Handover period)	As per below mentioning staff transition period: <ul style="list-style-type: none"> • Program Manager - 60 Days • Other staff- 30 days 	100%	Program Manager/Delivery Manager- Penalty shall be INR 10,000 for each week of default or part thereof Other Staff- Penalty shall be INR 2,000 for each week of default or part thereof	Manual	

Service Details	SLA Measurement	SLA	Penalty	Measurement Tools	Remarks
Resource availability	Attendance for support personnel. (covers all the locations) Minimum attendance level during any shift is 100% of agreed deployment.	No of shift below minimum attendance level	Penalty shall be INR 5,000 for every 2% default or part thereof below the agreed threshold	Manual	

7.2 Penalty

- i OICL will impose a penalty, of Rs. **20,000/- (Rupees Twenty thousand only) per week** or part thereof, for delay in not adhering to the time schedules for closing the intimated gaps for the proposed solutions identified through VAPT Report.
- ii The OICL expects the Bidder to complete the scope of the project as mentioned in section 02 - scope of work of this document within the timeframe specified in Section 1.7 Project Timelines of this document. Inability of the Bidder either to provide the requirements as per the scope or to meet the timelines as specified would be treated as breach of contract and would invoke the penalty /LD clause.
- iii Inability of the Bidder to provide services at the service levels defined would result in breach of contract and would invoke the penalty clause
- iv Notwithstanding anything contained above, no such penalty will be chargeable on the Bidder for the inability occasioned, if such inability is due to reasons entirely attributable to the OICL.
- v Bidder needs to deploy the same resources or resources with equivalent/higher skill sets as per the terms and conditions of the RFP. For Each Default, OICL may levy the penalty of **Rs. 1,00,000** quarterly till the Bidder deploys the required resources
- vi The Bidder is required to provide and implement the regular updates/upgrades/patches released by the OEM within the timelines as mentioned, OICL will levy the penalty of Rs. 20,000 per week or part thereof in not adhering the schedules.
- vii If during the contract period, any equipment has a hardware failure on four or more occasions in a quarter, it shall be replaced by equivalent or higher new equipment by the bidder at no additional cost to OICL.
- viii The right to levy the penalty is in addition to and without prejudice to other rights / remedies available to the OICL such as termination of contract, invoking performance guarantee and recovery of amount paid etc.
- ix The OICL reserves the right to recover the penalty from any payment to be made under this contract.

- x The penalty would be deducted from the quarterly payouts and the cap on any penalty due during the Warranty period will be adjusted against the payments made for bills/invoices provided by the bidder. Quarterly penalty will be 20% of the quarterly payout. **For the purpose of this RFP, the total of penalties as per SLA and the Liquidated damages will be subject to a maximum of 10% of the overall contract value.**
- xi Performance measurements would be assessed through audits or reports, as appropriate to be provided by the Bidder e.g. utilization reports, response time measurements reports, ticket details and resolution time report etc. The tools to perform the audit will need to be provided by the Bidder. Audits will normally be done on regular basis or as required by OICL and will be performed by OICL or OICL appointed third party

7.2.1 Exception

OICL shall not hold the Successful Bidder responsible for a failure to meet any Service Level if it is directly attributable to:

- i Execution of the disaster recovery plan/business continuity plan for an OICL declared disaster situation; and
- ii Any established inability of other third party vendor or service provider of OICL, to fulfill the requirements as per the contract.

8 Disclaimer

This RFP is being issued by OICL for inviting bids for providing hardware, software and Services. The words 'Tender' and 'RFP' are used interchangeably to refer to this document. The purpose of this document is to provide the Bidder with information to assist in the formulation of their proposal. While the RFP has been prepared in good faith with due care and caution, OICL or any of its employees or consultants do not accept any liability or responsibility for the accuracy, reasonableness or completeness of the information contained in this document. The information is not intended to be exhaustive. Interested parties are required to make their own inquiries. OICL reserves the right not to proceed with the project, to alter the timetable reflected in this document or to change the process or procedure to be applied. It also reserves the right to decline to discuss the project further with any party submitting a bid. No reimbursement of any cost will be paid to persons, entities submitting a Bid.

9.10 Annexure 10: OICL Present IT Setup

Core Insurance Solution (INLIAS)

Oriental is the first PSU Company to have implemented core insurance software in all the offices, including all the Business Centres. The application has a centralized architecture and handles the entire business operations in an integrated manner. It has benefit of Centralized Change Management and also makes available companywide MIS for Management.

To bring uniformity, security and centralized access OICL has adopted integrated non-life insurance application software (INLIAS) developed and customized by 3i-infotrch. The INLIAS application serves the business requirements of OICL including underwriting, accounting, claims processing, report generation and reinsurance requirements. It has integration through web services with our Web Portal and various outside domains.

Daily around 40,000 documents (proposal, endorsement etc.) are being entered into the system. Users generate around 50,000 transaction reports (Premium receipt etc.) and 25000 non-transaction reports (GL Summary etc.) on a normal working day. The transaction load increases by around 10% on every month-end/year-end. Also the volume of report-generation increases on the first three working days of every month.

Web Portal:

OICL also has state-of-the-art web portal through which customers can transact, make payments and track the status of various transactions. The web portal is available for use of its customers, Agents and other stake holders with a provision for premium calculator, payment gateway and online issuance/ renewal of policies. It is integrated with IRDAI Grievance Application IGMS through web services".

Human Resource Management (HRMS) System

HRMS handles the entire operations of OICL related to HR Including Payroll, Pension, PF, Loans, etc.

Investment Management System

The system handles the entire Investment operations of the Company.

Enterprise Content Management (ECM) System

ECM has been integrated with INLIAS and Portal and integration with other applications is under progress.

Biometric Authentication Solution

The Solution has been integrated with our core business application INLIAS to enable 2 Factor Authentication.

DITSM

OICL has implemented following centralized solutions in in Data Centres:-

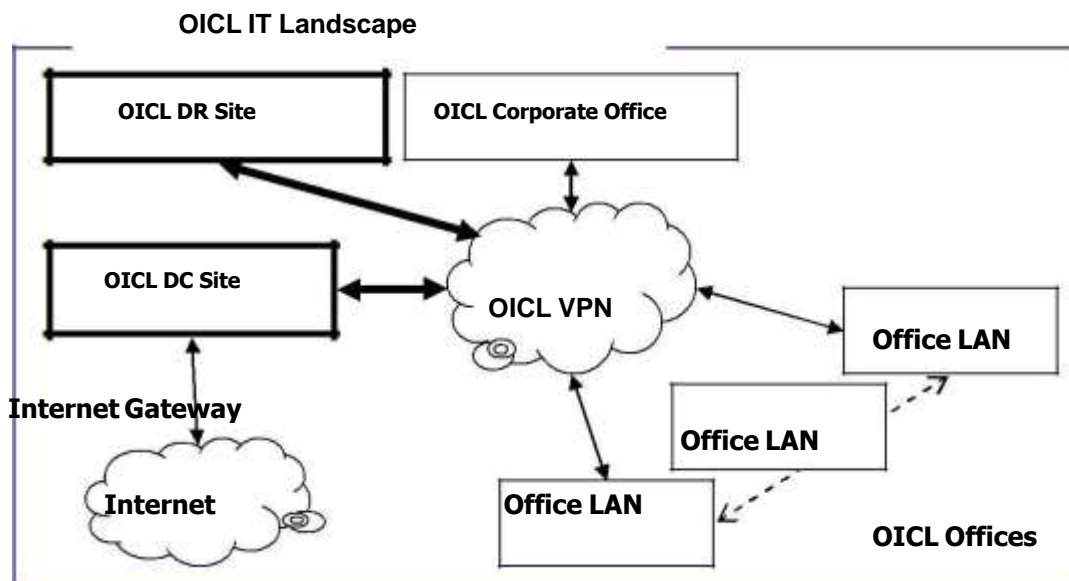

- Microsoft Active Directory
- Symantec Antivirus Solution
- Sapphire EMS &
- Sapphire Helpdesk Solution

E-Mail:

OICL has implemented MS Exchange 2013 E-mail solution with TrendMicro IMSVA Email/SMTP Gateway Appliance.

OICL IT Architecture:

The OICL IT Architecture is designed around active-active data centers.

The servers are used to host applications including INLIAS, SAP, HRMS, Portal, E-mail, Proxy, etc. that provide business services to the users.

The data centers and the OICL Offices are connected through dual active-active connectivity MPLS over RF/Lease line links or through VPN with 2 FA.

All the other elements are ultimately to serve the users in performing their business functions.

Desktop Inventory

- OICL has approximately 13000 desktops across all offices in the country.
- The operating systems implemented on these desktops are Windows 7/ Windows 8/Windows 10.

Active Directory

- The existing Active Directory Solution is on Microsoft Windows 2012.
- Currently OICL is having 13000 Client Access Licenses.

Security Devices

Firewall - Cisco

IPS – Cisco

Web Application Firewall - Radware

Backup Solution

Backup Solution: EMC NetWorker

Device Inventory

PC/Desktop: WIPRO, Dell, Acer etc.

Printer: HP, Canon, LIPI etc.

Scanner: HP, Canon etc.

Router: Cisco etc.

Switches: Cisco, Brocade etc.

Bandwidth

The following table specifies the bandwidth available at various OICL offices:

Bandwidth (*2)	No. of Offices
1 Mbps	14
512 Kbps	96
384 Kbps	6
320 Kbps	52
256 Kbps	322
192 Kbps	197
128 Kbps	345

BY AND BETWEEN

..... Company Limited, a company incorporated under the

Companies Act, 1956 having its registered office at (Hereinafter referred to as the Vendor which expression unless repugnant to the context or meaning thereof be deemed to include its permitted successors) of the ONE PART;

AND

The Oriental Insurance Company Ltd, having its headquartered and Corporate Office at Oriental House, A-25/27, Asaf Ali Road, New Delhi - 110002 (hereinafter referred to as "OICL" which expression shall unless it be repugnant to the subject, meaning or context thereof, be deemed to mean and include its successors and assigns) of the OTHER PART.

The Vendor and The Oriental Insurance Company Ltd are hereinafter collectively referred to as "the Parties" and individually as "the Party"

WHEREAS:

1. The Oriental Insurance Company Ltd is engaged in the business of providing financial services to its customers and intends to engage Vendor for providing

2. In the course of such assignment, it is anticipated that The Oriental Insurance Company Ltd or any of its officers, employees, officials, representatives or agents may disclose, or deliver, to the Vendor some Confidential Information (as hereinafter defined), to enable the Vendor to carry out the aforesaid assignment (hereinafter referred to as " the Purpose").

3. The Vendor is aware and confirms that all information, data and other documents made available in the RFP/Bid Documents/Agreement /Contract or in connection with the Services rendered by the Vendor are confidential information and are privileged and strictly confidential and or proprietary of The Oriental Insurance Company Ltd. The Vendor undertakes to safeguard and protect such confidential information as may be received from The Oriental Insurance Company Ltd

NOW, THEREFORE THIS AGREEMENT WITNESSED THAT in consideration of the above premises and the Oriental Insurance Company Ltd granting the Vendor and or his agents, representatives to have specific access to The Oriental Insurance Company Ltd property / information and other data it is hereby agreed by and between the parties hereto as follows:

1. Confidential Information:

(i) "Confidential Information" means all information disclosed/furnished by The Oriental Insurance Company Ltd to the Vendor whether orally, in writing or in electronic, magnetic or other form for the limited purpose of enabling the Vendor to carry out the proposed Implementation assignment, and shall mean and include data, documents and information or any copy, abstract, extract, sample, note or module thereof, explicitly designated as "Confidential"; Provided the oral information is set forth in writing and marked "Confidential" within seven (7) days of such oral disclosure.

(ii) The Vendor may use the Confidential Information solely for and in connection with the Purpose and shall not use the Confidential Information or any part thereof for any reason other than the Purpose stated above.

Confidential Information in oral form must be identified as confidential at the time of disclosure and confirmed as such in writing within seven (7) days of such disclosure. Confidential Information does not include information which:

(a) is or subsequently becomes legally and publicly available without breach of this Agreement by either party,

(b) was rightfully in the possession of the Vendor without any obligation of confidentiality prior to receiving it from The Oriental Insurance Company Ltd,

(c) was rightfully obtained by the Vendor from a source other than The Oriental Insurance Company Ltd without any obligation of confidentiality,

(d) was developed by for the Vendor independently and without reference to any Confidential Information and such independent development can be shown by documentary evidence, or is/was disclosed pursuant to an order of a court or governmental agency as so required by such order, provided that the Vendor shall, unless prohibited by law or regulation, promptly notify The Oriental Insurance Company Ltd of such order and afford The Oriental Insurance Company Ltd the opportunity to seek appropriate protective order relating to such disclosure.

(e) the recipient knew or had in its possession, prior to disclosure, without limitation on its confidentiality;

(f) is released from confidentiality with the prior written consent of the other party.

The recipient shall have the burden of proving hereinabove are applicable to the information in the possession of the recipient. Confidential Information shall at all times remain the sole and exclusive property of the disclosing party. Upon termination of this Agreement, Confidential Information shall

be returned to the disclosing party or destroyed, if incapable of return. The destruction shall be witnessed and so recorded, in writing, by an authorized representative of each of the parties.

Nothing contained herein shall in any manner impair or affect rights of The Oriental Insurance Company Ltd in respect of the Confidential Information.

In the event that any of the Parties hereto becomes legally compelled to disclose any Confidential Information, such Party shall give sufficient notice to the other party to enable the other Party to prevent or minimize to the extent possible, such disclosure. Neither party shall disclose to a third party any Confidential Information or the contents of this Agreement without the prior written consent of the other party. The obligations of this Clause shall be satisfied by handling Confidential Information with the same degree of care, which the receiving party applies to its own similar confidential information but in no event less than reasonable care.

The obligations of this clause shall survive the expiration, cancellation or termination of this Agreement

2. Non-disclosure: The Vendor shall not commercially use or disclose any Confidential Information or any materials derived there from to any other person or entity other than persons in the direct employment of the Vendor who have a need to have access to and knowledge of the Confidential Information solely for the Purpose authorized above. The Vendor shall take appropriate measures by instruction and written agreement prior to disclosure to such employees to assure against unauthorized use or disclosure. The Vendor may disclose Confidential Information to others only if the Vendor has executed a Non-Disclosure Agreement with the other party to whom it is disclosed that contains terms and conditions that are no less restrictive than these presents and the Vendor agrees to notify The Oriental Insurance Company Ltd immediately if it learns of any use or disclosure of the Confidential Information in violation of terms of this Agreement.

Notwithstanding the marking and identification requirements above, the following categories of information shall be treated as Confidential Information under this Agreement irrespective of whether it is marked or identified as confidential:

- a) Information regarding The Oriental Insurance Company Ltd and any of its Affiliates, customers and their accounts ("Customer Information"). For purposes of this Agreement, Affiliate means a business entity now or hereafter controlled by, controlling or under common control. Control exists when an entity owns or controls more than 10% of the outstanding shares or securities representing the right to vote for the election of directors or other managing authority of another entity; or
- b) any aspect of The Oriental Insurance Company Ltd business that is protected by patent, copyright, trademark, trade secret or other similar intellectual property right; or
- c) business processes and procedures; or
- d) current and future business plans; or

e) personnel information; or

f) financial information.

3. Publications: The Vendor shall not make news releases, public announcements, give interviews, issue or publish advertisements or publicize in any other manner whatsoever in connection with this Agreement, the contents / provisions thereof, other information relating to this Agreement, the Purpose, the Confidential Information or other matter of this Agreement, without the prior written approval of The Oriental Insurance Company Ltd.

4. Term: This Agreement shall be effective from the date hereof and shall continue till expiration of the Purpose or termination of this Agreement by The Oriental Insurance Company Ltd, whichever is earlier. The Vendor hereby agrees and undertakes to The Oriental Insurance Company Ltd that immediately on termination of this Agreement it would forthwith cease using the Confidential Information and further promptly return or destroy, under information to The Oriental Insurance Company Ltd, all information received by it from The Oriental Insurance Company Ltd for the Purpose, whether marked Confidential or otherwise, and whether in written, graphic or other tangible form and all copies, abstracts, extracts, samples, notes or modules thereof. The Vendor further agree and undertake to The Oriental Insurance Company Ltd to certify in writing upon request of The Oriental Insurance Company Ltd that the obligations set forth in this Agreement have been complied with.

Any provisions of this Agreement which by their nature extend beyond its termination shall continue to be binding and applicable without limit in point in time except and until such information enters the public domain

5. Title and Proprietary Rights: Notwithstanding the disclosure of any Confidential Information by The Oriental Insurance Company Ltd to the Vendor, the title and all intellectual property and proprietary rights in the Confidential Information shall remain with The Oriental Insurance Company Ltd.

6. Remedies: The Vendor acknowledges the confidential nature of Confidential Information and that damage could result to The Oriental Insurance Company Ltd if the Vendor breaches any provision of this Agreement and agrees that, if it or any of its directors, officers or employees should engage or cause or permit any other person to engage in any act in violation of any provision hereof, The Oriental Insurance Company Ltd may suffer immediate irreparable loss for which monetary compensation may not be adequate. The Oriental Insurance Company Ltd shall be entitled, in addition to other remedies for damages & relief as may be available to it, to an injunction or similar relief prohibiting the Vendor, its directors, officers etc. from engaging in any such act which constitutes or results in breach of any of the covenants of this Agreement.

Any claim for relief to The Oriental Insurance Company Ltd shall include The Oriental Insurance Company Ltd costs and expenses of enforcement (including the attorney's fees).

7. Entire Agreement, Amendment and Assignment: This Agreement constitutes the entire agreement between the Parties relating to the matters discussed herein and supersedes any and all prior oral discussions and / or written correspondence or agreements between the Parties. This Agreement may

be amended or modified only with the mutual written consent of the Parties. Neither this Agreement nor any right granted hereunder shall be assignable or otherwise transferable.

8. Governing Law: The provisions of this Agreement shall be governed by the laws of India and the competent court at Bangalore shall have exclusive jurisdiction in relation thereto even though other Courts in India may also have similar jurisdictions.

9. Indemnity: The Vendor shall defend, indemnify and hold harmless The Oriental Insurance Company Ltd , its affiliates, subsidiaries, successors, assigns, and their respective officers, directors and employees, at all times, from and against any and all claims, demands, damages, assertions of liability whether civil, criminal, tortuous or of any nature whatsoever, arising out of or pertaining to or resulting from any breach of representations and warranties made by the Vendor. and/or breach of any provisions of this Agreement, including but not limited to any claim from third party pursuant to any act or omission of the Vendor, in the course of discharge of its obligations under this Agreement.

10. General: The Vendor shall not reverse - engineer, decompile, disassemble or otherwise interfere with any software disclosed hereunder.

All Confidential Information is provided "as is". In no event shall the Oriental Insurance Company Ltd be liable for the inaccuracy or incompleteness of the Confidential Information. None of the Confidential Information disclosed by The Oriental Insurance Company Ltd constitutes any representation, warranty, assurance, guarantee or inducement with respect to the fitness of such Confidential Information for any particular purpose.

The Oriental Insurance Company Ltd discloses the Confidential Information without any representation or warranty, whether express, implied or otherwise, on truthfulness, accuracy, completeness, lawfulness, merchantability, and fitness for a particular purpose, title, non-infringement, or anything else.

11. Waiver: A waiver (whether express or implied) by The Oriental Insurance Company Ltd of any of the provisions of this Agreement, or of any breach or default by the Vendor in performing any of the provisions hereof, shall not constitute a continuing waiver and such waiver shall not prevent The Oriental Insurance Company Ltd from subsequently enforcing any of the subsequent breach or default by the Vendor under any of the provisions of this Agreement.

In witness whereof, the Parties hereto have executed these presents the day, month and year first herein above written.

9.14 Annexure 14: Integrity Pact

(On Rs.100 Non-Judicial stamp paper)

PRE CONTRACT INTEGRITY PACT

General

This pre-bid pre contract Agreement (hereinafter called the integrity pact is made on

day of the month of _____ 2017, between, on one hand, The Oriental Insurance Company Ltd, having its headquartered and Corporate Office at Oriental House, A-25/27, Asaf Ali Road, New Delhi - 110002, acting through _____, _____ (hereinafter called the "BUYER" which expression shall mean and include, unless the context otherwise requires, his successors in office and assignees) of the first part and M/s _____ represented by Shri _____, authorized signatory of M/s -----(hereinafter called the "BIDDER/SELLER" which expression shall mean and include, unless the context otherwise requires , his successors and permitted assigns)of the second part .

WHEREAS the BUYER proposes to procure (Name of the Store /Equipment /item and the BIDDER /SELLER is willing to offer /has offered the store and

WHEREAS the BIDDER is a private company/public company/Government /undertaking/partnership/ registered export agency, constituted in accordance with the relevant law in the matter and the BUYER is a Government of India, Public Sector Insurance Company.

Now, THEREFORE,

To avoid all forms of corruption by following a system that is fair , transparent and free from any influence /prejudiced dealings prior to, during and subsequent to the currency of the contract to be entered into with a view to:-

Enabling the BUYER to obtain the desired said store/equipment at a competitive price in conformity with the defined specifications by avoiding the high cost and the distortionary impact of corruption on public procurement, and

Enabling the BIDDERS to abstain from bribing or indulging in any corrupt practice in order to secure the contract by providing assurance to them that their competitors will also abstain from bribing and other corrupt practices and the BUYER will commit to prevent corruption, in any form, by its officials by following transparent procedures .

The parties hereby agree to enter into this integrity pact and agree as follows:-

1. **Commitments of the BUYER**

1.1 The BUYER undertakes that no official of the BUYER, connected directly or indirectly with the contract, will demand, take a promise for or accept directly or accept, directly or through intermediaries, any bribe, consideration, gift, reward favor or any material or immaterial benefit or any other advantage from the BIDDER, either for themselves or for any person, organization or third

party related to the contract in exchange for an advantage in the bidding process, bid evaluation contracting or implementation process related to the contract.

1.2 The BUYER will, during the pre- contract stage treat all BIDDERS alike, and will provide to all BIDDERS the same information and will not provide any such information to any particular BIDDER which could afford an advantage to that particular BIDDER in comparison to other BIDDERS.

1.3 All the officials of the BUYER will report to the appropriate Government office any attempted or completed breaches of the above commitment as well as any substantial suspicion of such a breach.

2. In case any such preceding misconduct on the part of such official (s) is reported by the BIDDER to the BUYER with full and verifiable facts and the same is prima facie found to be correct by the BUYER, necessary disciplinary proceedings, or any other action as deemed fit including criminal proceedings may be initiated by the BUYER and such a person shall be debarred from further dealings related to the contract process. In such a case while an enquiry is being conducted by the BUYER the proceedings under the contract would not be stalled.

3. Commitment of BIDDERS

The BIDDERS commit itself to all take all measures necessary to prevent corrupt practices, unfair means and illegal activities during any stage of its bid or during any pre-contract or post- contract stage in order to secure the contract or in furtherance to secure it and in particular commit itself to the following:-

3.1 The BIDDER will not offer, directly or through intermediaries, any bribe, gift, consideration, reward, favor, any material or immaterial benefit or other advantage, commission, fees, brokerage or inducement to any official of the BUYER, connected directly or indirectly with the bidding process, or to any person, organization or third party related to the contract in exchange for any advantage in the bidding, evaluation contracting and implementation of the contract.

3.2 The BIDDER further undertakes that it has not given, offered or promised to give, directly or indirectly any bribe, gift, consideration, reward, favor, any material benefit or other advantage commission fees, brokerage or inducement to any official of the BUYER or otherwise in procuring the contract forbearing to do or having done any act in relation to the obtaining or execution of the contract or any other contract with the Government for showing or for bearing to show favor or disfavor to any person in relation to the contract or any other contract with the Government.

3.3 BIDDERS shall disclose the name and address of agents and representatives and Indian BIDDERS shall disclose their foreign principals or associates.

3.4 BIDDERS shall disclose the payment to be made by them to agents/brokerage or any other intermediary, in connection with this bid/contract.

3.5 The BIDDER further confirms and declares to the BUYER that the BIDDER is the original manufacturer/integrator/authorized Government sponsored export entity of the defense stores and has not engaged any individual or firm or company whether Indian or foreign to intercede, facilitate or in any way to recommend to the BUYER or any of its functionaries, whether officially or unofficially to the award of the contract to the BIDDER, nor has such any amount been paid promised or intended

to be paid to any such Individual, firm or company in respect of any such intercession, facilitation or recommendation.

3.6 The BIDDER, either while presenting the bid or during pre- contract negotiations or before signing the contract shall disclose any payment he has made, is committed to or intends to make to officials of the BUYER or their family members agents, brokers or any other intermediaries in connection with the contract details or/and the services agreed upon for such payments.

3.7 The bidder will not collude with other parties interested in the contract to impair the transparency, fairness and progress of the bidding process, bid evaluation contracting and implementation of the contract.

3.8 The BIDDER will not accept any advantage in exchange for any corrupt practice, unfair means and illegal activities.

3.9 The BIDDER shall not use improperly, for purposes of competition or personal gain, or pass on to other, any information provided by the BUYER as part of the business deal, relationship regarding plans, technical proposals and business details, including information contained in any electronic data carrier. The BIDDER also undertakes to exercise due and adequate care lest any such information is divulged.

3.10 The BIDDER commits to refrain from giving any complaint directly or through any other manner without supporting it with full and verifiable facts.

3.11 The BIDDER shall not instigate or cause to instigate any third person to commit any of the action mentioned above.

3.12 The BIDDER will not, directly or through any other person or firm, offer, promise or give to any of the Principal's employees involved in the tender process or the execution of the contract or to any third person any material or other benefit which he/she is not legally entitled to, in order to obtain in exchange any kind of favour whatsoever during the tender process or during the execution of the contract.

4. Previous Transgression

4.1 The BIDDER declares that no previous transgression occurred in the last three year immediately before signing of this integrity pact, with any other company in any country in respect of any corrupt practices envisaged hereunder or with any public sector enterprise in India or any government Department in India that justify BIDDER'S exclusion from the tender process.

4.2 The BIDDER agrees that if it makes incorrect statement on this subject, BIDDER can be disqualified from the tender propose or the contract, if already awarded. Can be terminated for such reason.

5. Earnest money (security deposit)

5.1 While submitting commercial bid, the BIDDER shall deposit an amount _____(as specified in RFP) as Earnest money/security, with the BUYER through any of the following instruments:-

- (i) Bank draft or a pay order in favor of _____

- (ii) A confirmed guarantee by an Indian nationalized bank, promising payment of the guaranteed sum to the BUYER on demand within three working days without any demur whatsoever and without seeking any reasons whatsoever .the demand for payment by the BUYER shall be treated as conclusive proof of payment.
- (iii) Any other mode or through any other instrument (to be specified in the RFP).

5.2 The Earnest money / Security deposit shall be valid up to a period of five years or the complete conclusion of the contractual obligations to the complete satisfaction of both the BIDDER and the BUYER, including warranty period, whichever is later.

5.3 In case of the successful BIDDER a clause would also be incorporated in the article pertaining to performance bond in the purchase contract that the provisions of sanction for violation shall be applicable for, forfeiture of performance bond in case of a decision by the BUYER to forfeit the same without assigning any reason for imposing sanction for violation of this pact.

5.4 No interest shall be payable by the BUYER to the BIDDER on Earnest Money/Security Deposit for the period of its currency.

6. Sanctions for violations

6.1 Any breach of the aforesaid provisions by the BIDDER or any one Employed by it or acting on its behalf (whether with or without the knowledge of the BIDDER) shall entitle the BUYER to take all or any one of the following actions, wherever required:

- (i) To immediately call off the pre contract negotiations without assigning any reason or giving any compensation to the BIDDER. However, the proceeding with the other BIDDER(s) would continue.
- (ii) The Earnest Money Deposit (in pre-contract stage) and/or Security Deposit /Performance bond (after the contract is signed shall stand forfeited either fully or partially, as decided by the BUYER and the BUYER shall not be required to assign any reason therefore.
- (iii) To immediately cancel the contract, if already signed, without giving any compensation to the BIDDER.
- (iv) To recover all sum already paid by the BUYER, and in case of an Indian BIDDER with interest thereon at 2% higher than the prevailing prime lending rate of State Bank of India, while in case of a BIDDER from a country other than India with interest thereon at 2% higher than the LIBOR . If any outstanding payment is due to the BIDDER from the BUYER in outstanding payment could also be utilized to recover the aforesaid sum and interest.
- (v) To encash the advance bank guarantee and performance bond / warranty bond, if furnished by the BIDDER in order to recover the payments, already made by the BIDDER, along with interest.
- (vi) To cancel all or any other contracts with the BIDDER, the BIDDER shall be liable to pay compensation for any loss or damage to the BUYER resulting from such cancellation/ rescission and the BUYER shall be entitled to deduct the amount so payable from the money (s) due to the BIDDER.

- (vii) To debar the BIDDER from participating in future bidding processes of the Government of India for a minimum period of five year, which may be further extended at the discretion of the Buyer
- (viii) To recover all sum paid in violation of this pact by bidder (s) to any middleman or agent or broker with a view to securing the contract.
- (ix) In case where irrevocable letters of credit have been received in respect of any contract signed by the BUYER with the BIDDER, the same shall not be opened.
- (x) Forfeiture of performance bond in case of a decision by the BUYER to forfeit the same without assigning any reason for imposing sanction for violation of this pact.

6.2 The BUYER will be entitled to take all or any of the actions mentioned at Para 6.1(i) to (x) of this pact also on the commission by the BIDDER or any one employed by it or acting on its behalf (whether with or without the knowledge of the BIDDER), of an offence as defined in chapter IX of the Indian penal code, 1860 or prevention of corruption.

6.3 The decision of the BUYER to the effect that breach of the provisions of this pact has been committed by the BIDDER shall be final and conclusive on the BIDDER. However, the BIDDER can approach the independent monitor (s) appointed for the purpose of this pact.

7. Fall Clause

The BIDDER undertakes that it shall not supply similar Product / systems or subsystems in comparable business circumstances at a price lower than that offered in the present bid in respect of any other Public Sector Banks/Insurance Companies in India and if it is found that within one year after the signing of contract that similar product / systems or sub systems is supplied by the BIDDER to any other Public Sector Banks/Insurance Companies in India at a lower price, with due allowance for elapsed time, will be applicable to the present case and the difference in the cost would be refunded by the BIDDER to the BUYER, if the contract has already been concluded.

8. Independent Monitors

8.1 The BUYER has appointed Independent Monitors (here either referred to as Monitors) for this pact in consolation with the central vigilance commission.

8.2 The task of the Monitors shall be to review Independent and objectively, whether and to what extent the parties comply with the obligations under this pact.

8.3 The Monitors shall not be subject to instruction by the representatives of the parties and perform their functions neutrally and independently.

8.4 Both the parties accept that the Monitors have the access all the documents relating to the project/procurement, including minutes of meeting.

8.5 As soon as the monitor notice, or has reason to believe, a violation of this pact, he will so inform the Authority designated by the BUYER.

8.6 The BIDDER (s) accepts that the Monitor has the right to access without restriction to all project documentation of the BUYER including that provided by the BIDDER. The BIDDER will also grant the monitor, upon his request and demonstration of a valid interest, unrestricted and unconditional access to his project documentation. The same is applicable to subcontractors. The monitor shall

be under contractual obligation to treat the information and documents of the BIDDER/subcontractor(s) with confidentiality.

8.7 The BIDDER will provide to the Monitor sufficient information about all meetings among the parties related to the project provided such meetings could have an impact on the contractual relations between the parties the parties will offer to the monitor the option to participate in such meetings.

8.8 The monitor will submit a written report to the designated Authority of BUYER / Secretary in the Department/ within 8 to 10 weeks from the date of reference or intimation to him by the BUYER / BIDDER and, should the occasion arise, submit proposals for correcting problematic situations.

9. Facilitation of Investigation

In case of any allegation of violation of any provision of this pact or payment of commission, the BUYER or its agencies shall be entitled to examine all the documents including the Books of Accounts of the BIDDER and the BIDDER shall provide necessary information and documents in English and shall extend all possible help for the purpose of such examination.

10. Law and place of jurisdiction

This Pact is subject to Indian Law. The place of performance and jurisdiction is the seat of the BUYER.

11. Other Legal Actions

The actions stipulated in this Integrity pact are without prejudice to any other legal action that may follow in accordance with provisions of the extent law in force relating to any civil or criminal proceedings.

12. Validity

12.1 The validity of this Integrity Pact shall be from date of this signing and extend up to 5 years or the complete execution of the contract to the satisfaction of both the BUYER and the BIDDER/SELLER, including warranty period, whichever is later, In case BIDDER is unsuccessful, this Integrity Pact shall expire after six months from the date of the signing of the contract.

12.2 Should one or several provisions of this Pact turn out to be invalid, the reminder of this Pact shall remain valid. In this case, the parties will strive to come to an agreement to their original intentions.

13. The BIDDER undertakes that he shall not approach the Court while representing the matter to External Independent Monitors (IEMs) and he will await their decision in the matter within a time ceiling of 90 days.

14. **The parties hereby sign this Integrity Pact at _____ on _____**

10 Appendix

10.1 Appendix 1: Technical and Functional Specifications

10.1.1 SIEM

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
	General		
1	The Solution should be an appliance or Software with a clear physical or logical separation of the collection module, logging module and correlation module.		
2	The solution should support log collection, correlation and alerts for the number of devices mentioned in scope.		
3	The solution should be able to conduct agent less collection of logs except for those which cannot publish native audit logs		
4	The solution should have connectors to support the listed devices/ applications wherever required the vendor should develop customized connectors at no extra cost		
	Log Collection and Management		
5	All logs should be Authenticated (time-stamped) encrypted and compressed before transmission		
6	The solution should be able to continue to collect log data during database backup, de-fragmentation and other management scenarios, without any disruption to service		
7	The solution should support log collection from all operating systems and their versions including but not limited to Windows, AIX, Unix, Linux, Solaris servers, HP Unix etc.		
8	In case the connectivity with SIEM management system is lost, the collector should be able to store the data in its own repository. The retention, deletion, synchronization with SIEM database should be automatic but it should be possible to control the same manually.		
9	The solution shall allow bandwidth management, rate limiting, at the log collector level.		
10	The solution should ensure that the overall load on the network bandwidth at DC, WAN level is minimal		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
11	The solution should provide time based and forward feature at each log collection point		
12	Collection layer should be able to forward logs to multiple destinations this will help OICL to forward logs to other locations (full redundancy) without any additional configurations.		
13	It should be possible to store the event data in its original format in the central log storage		
14	The data archival should be configured to store information in tamper proof format and should comply with all the relevant regulations.		
15	Traceability of logs shall be maintained from the date of generation to the date of purging.		
16	The system shall be able to capture all details in raw log, events and alerts and normalize them into a standard format for easy comprehension.		
17	It should be feasible to extract raw logs from the SIEM and transfer to other systems as and when required.		
18	Should support the following log collection protocols: Syslog over UDP / TCP, Syslog NG, SDEE, SNMP Version 2 & 3, ODBC, FTP, Windows Event Logging Protocol, Opsec, Netflow at a minimum		
19	The solution should be able to collect and process raw logs in real-time from any IP Device including Networking devices (router/ switches/ voice gateway etc.s), Security devices (IDS/IPS, AV, Patch Management, Firewall/DB Security solutions etc.), Operating systems(Windows 2003 / 2008, Unix, HP Unix, Linux, AIX, etc.), Mainframe(z/196), Virtualization platforms, Databases (Oracle, MSSQL, MySQL, DB2, Post-Gres etc.), Storage systems, and Enterprise Management systems etc.		
20	The solution should prevent tampering of any type of logs and log any attempts to tamper logs		
	Correlation		
21	SIEM must allow the creation of an unlimited number of new correlation rules		
22	Solution should be able to perform the following correlations (but not limited to): Rule based, Vulnerability based, Statistical based, Historical based, Heuristics based, Behavioral based etc.		
23	The system/solution should have the ability to correlate all the fields in a log		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
24	The solution should be able to parse and correlate multi line logs		
25	Ability to gather information on real time threats and zero day attacks issued by anti-virus or IDS/ IPS vendors or audit logs and add this information as intelligence feed in to the SIEM solution via patches or live feeds		
26	The solution should allow a wizard based interface for rule creation. The solution should support logical operations and nested rules for creation of complex rules		
27	The central correlation engine database should be updated with real time security intelligence updates from OEM		
	Dashboard and Reporting		
28	The dashboard should be in the form of a unified portal that can show correlated alerts/ events from multiple disparate sources such as security devices, network devices, enterprise management systems, servers, applications, databases, etc.		
29	Events should be presented in a manner that is independent of device specific syntax and easy to understand for all users		
30	The dashboard should show the status of all the tools deployed as part of the SOC, including availability, bandwidth consumed, system resources consumed (including database usage)		
31	It should be possible to categorize events while archiving for example , events for network devices, antivirus, servers etc.		
32	Any failures of the event collection infrastructure must be detected and operations personnel must be notified as per SLA. The device Health monitoring must include the ability to validate that original event sources are still sending events		
33	The solution should generate the following reports (but not restricted to): User activity reports, Configuration change reports, Incident tracking report, Attack source reports etc. In addition, the solution should have a reporting writing tool for development of any ad-hoc reports.		
34	The Dashboard design for the solution should be editable on an ad hoc basis as per the individual user need		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
35	The system should display all real time events. The solution should have drill down functionality to view individual events from the dashboard		
36	The solution should allow applying filters and sorting to query results.		
37	The solution should allow creating and saving of ad hoc log queries on archived and retained logs. These queries should be able to use standard syntax such as wildcards and regular expressions.		
38	The solution should provide event trace back/ playback for forensic analysis.		
39	The solution should allow for qualification of security events and incidents for reporting purpose. The solution should be able to generate periodic reports (weekly, monthly basis) for such qualified security events/ incidents.		
40	Should provide summary of log stoppage alerts and automatic suppression of alerts.		
41	Should generate e-mail and SMS notifications for all critical/high risk alerts triggered from SIEM		
42	Solution should be able to provide asset details such as Asset owner, location, events & incidents and issue mitigation tracking mapped to individual assets/users		
43	Dashboard should display asset list and capture details including name, location, owner, value, business unit, IP address, platform details		
44	Dashboard should capture the security status of assets and highlight risk level for each asset. This should be used to capture security status of OICL, status of different business units within the OICL status of key locations etc.		
45	Dashboard should support reporting for consolidated relevant compliance across all major standards and regulatory requirements. This includes ISO 27001, IRDAI regulations, IT ACT, PCI DSS standards etc.		
46	Dashboard should support different views relevant for different stake holders including top management, operations team, Information Security Department		
47	Dashboard should support export of data to multiple formats including CSV, XML, Excel, PDF, word formats		
48	Dashboard views should be customizable as per user rights and access to individual components of the application.		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
49	Administrators should be able to view correlated events, real-time raw logs and historical events through the dashboard.		
50	Senior Management should be able to view compliance to SLA for all SOC operations		
51	The system should permit setting up geographical maps/images on real time dashboards to identify impacted areas and sources of alerts.		
52	Solution should have the ability to perform free text searches for events, incidents, rules and other parameters.		
53	Log collection solution should have an option to filter or choose logs at collection layer to govern flexibility to forward security related events and filter.		
	Event and Incident Management		
54	The system should identify the originating system and user details while capturing event data.		
55	It should be possible to automatically create incidents and track their closure		
56	The solution should offer a means of escalating alerts between various users of the solution, such that if alerts are not acknowledged in a predetermined timeframe, that alert is escalated to ensure it is investigated.		
	Storage		
57	The vendor should provide for adequate storage to meet the EPS and retention requirements of the OICL. SI shall be responsible for upgrade of the storage to meet the OICL requirements as above at no additional cost. The SI should provide adequate justification for the storage size proposed as part of the response.		
58	The solution should be able to store both normalized and RAW logs		
59	The platform should provide tiered storage for the online, archival, and backup and restoration of event log information.		
60	The Tier I and II storage should have the capability to authenticate logs on the basis of time, integrity and Origin		
61	The storage solution should have the capability to encrypt/hash the logs in storage		
62	System should have capacity to maintain the logs for 90 days on storage and older logs should be archived on TAPE or Storage as required by OICL		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
63	Solution should be capable of retrieving the archived logs for analysis, correlation and reporting purpose automatically.		
64	Should be able to part and filter logs before storage on the basis of type of logs; date etc.		
65	Solution should be capable to replicate logs in Synchronous as well as Asynchronous mode.		
66	It should be possible to define purging and retention rules for log storage.		
67	The solution should come with built-in functionality for archiving data.		
	Integration		
68	Receive database alerts from DAM		
69	Integrate with NBA, IPS, IDS, Firewall, Proxy etc. to identify network security issues		
70	Integrate with DLP solutions to identify misuse of sensitive information		
71	Integrate with PIM and other Directory solution to relate security events to user activities		
72	Should be able to integrate with physical access control systems.		
73	Integrate with existing helpdesk/ incident management tools		
74	Should be able to integrate with OICL's existing backup solution for performing backup of the SIEM.		
75	Should be able to integrate with all the application as mentioned in the RFP, OICL during the contract period may procure additional applications/solutions /devices which is to be integrated with the SIEM Solution at no additional cost.		
76	Connector Development tool/SDK availability for developing collection mechanism for home-grown or any other unsupported applications		
77	The system should have out of the box rules for listed IDS/IPS, firewalls routers, switches, VPN devices, antivirus, operating systems, Databases and standard applications etc.		
	Availability		
78	The SI should prepare a DR plan for switch over in case the DC operations are down		
79	The solution should have high availability feature built in. There should be an automated switch over to secondary SIEM in case of failure on the primary SIEM. No		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
	performance degradation is permissible in case of failure.		
80	The storage solution should have adequate redundancy for handling disk failures		
	Scalability		
81	The solution should be scalable as per OICL roadmap for expansion		
82	Solution should support integration with big data storage configuration such as Hadoop etc.		
83	The solution should support creation of incident management workflows to track incident from creation to closure, provide reports on pending incidents, permit upload of related evidences such as screenshots etc.		
84	The system should receive feeds from a threat intelligence repository maintained by the OEM which consists of inputs from various threat sources and security devices across the globe.		

10.1.2 DAM

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
1	The solution should be Database agnostic and should support at least the following databases:		
1.1	Oracle 10g, 11g, 12c		
1.2	SQL Server 2008, 2012 or higher		
1.3	Sybase ASE 15.0.3 or Higher		
1.3	MySQL		
1.5	IBM DB2		
2	The solution should support on the following OS platforms at least:		
2.1	IBM AIX 6.1 or Higher		
2.2	Microsoft Windows 2008 / 2012 all editions or Higher		
2.3	Red Hat Enterprise Linux / Oracle Linux (latest version)		
2.4	HPUX 11 or Higher		
2.5	ORACLE SOLARIS 10 & 11 or Higher		
3	Solution does not require changes in the database application (e.g. truning audit or trace on)		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
4	Solution should be a non-intrusive agent installed on the server. The agent should read the data from shared memory		
5	Solution should protect it-self from tampering and attacks		
6	Solution allows easy translation of actual database activity into monitoring / audit policy direct from alerts		
6.1	Solution should be capable of capturing the alerts which will include the following metadata:		
6.2	Originating IP Address		
6.3	DB User		
6.4	OS User		
6.5	Full SQL Statement		
6.6	Accessed tables		
6.7	Application Name		
6.8	Module Name		
6.9	Host Name/Terminal name		
7	Command Type		
7.1	The solution should be capable of sending alerts to external applications atleast through:		
7.2	via e-mail		
7.3	via syslog		
7.4	via snmp traps		
9	Solution should easily integrate with SIEM and other management products		
10	Solution should be capable of monitoring of all database activities and protect against insiders with privileged access		
11	Solution should offer granular monitoring of database transactions with real-time alerts and prevention of breaches		
12	Solution should offer granular monitoring of queries, objects and stored procedures with real-time alerts and prevention of breaches		
13	Solution should provide protection against newly discovered database vulnerabilities, providing immediate protection with no DBMS downtime and without having to update the patch itself.		
14	Solution should offer flexible audit and reporting capabilities suitable for PCI DSS, SOX and HIPAA		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
15	Solution should provide multiple user roles that facilitate separation of duties		
16	Solution should capable of monitoring and alerting unauthorized access to sensitive data on the Database, like credit card tables etc.		
17	Solution should have the ability to independently monitor and audit all database activity, including administrator's activity and select transactions.		
18	Solution should record all SQL transactions : DML, DDL , DCL and Selects and The ability to store this activity securely outside the database		
19	Solution should have the ability to enforce separation of duties on Database Administrators. Auditing should include monitoring of DBA activity and solutions should prevent DBA manipulation or tampering with logs or recorded activity.		
20	Solution should have the ability to generate alert on policy violations and provide real time monitoring and rule based alerting.		
21	Solution should have the ability to ensure that a service account only accesses a database from a defined source IP and only runs a narrow group of authorized queries		
22	Solution Should capture and report on SELECT statements made on Databases		
23	Solution Should report on detailed SQL, including the source of the request, the actual SQL commands, the database user name, when the request was sent and what database objects the command was issued against.		
24	Solution Should report on database access including logins, client IP, server IP and source program information.		
25	Solution Should track execution of stored procedures, including who executed a procedure, name of the procedure and when, which tables were accessed as a result		
26	Solution Should track and audit administrative commands such as GRANT		
27	Solution Should track and report all failed logins.		
28	Solution Should support creation of specific rules on observed events, sending SMTP alerts when the rules are violated.		

S.No	Requirement	Compliance (S/C/N)	Bidders Remarks
29	Solution should Capture and report on non-administrators executing DDL.		
30	Solution Should support architecture where application has pooled connections, the user name should be monitored.		
31	The solution deployed should not require any change in the DBMS binaries		
32	The agent should not demand for restart of the database while installing or while upgrading or while uninstalling the solution		
33	Solution should be able to monitor inter and intra DB activities and attacks		
34	Solution should be able to monitor activities done by administrator or any DB admin sitting directly on the database server console		
35	The solution should have a single console to manage and monitor database activity monitoring and the vulnerabilities inside the database		
36	Solution should be capable of detecting weak passwords		
37	Solution Application comes with predefined reports, allows for customizing and Ad-hoc reports		
38	The solution should provide Sarbanes-Oxley module, PCI DSS and any others(Specify)		

10.1.3 DDoS

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
1	The Proposed DDoS Solution should be a dedicated Hardware Appliance and No Service Apart from DDoS should be running on the said Device. DDoS solution should be stateless but has to provide the capacity mentioned in the RFP.		
2	System should Protect from multiple attack vectors on different layers at the same time with combination OS, Network, Application, and Server side attacks.		
4	The solution must support to be deployable in transparent inline Mode.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
5	The solution should have the capability to be configured in detect as well as protect mode. Initially the solution will be configured in detect mode and based on reports/observations, the protection settings will be configured and finally solution will be put in protect mode		
6	In inline mode system must not modify MAC or IP addresses of passed frames		
7	The solution should inspect, detect and mitigate IPv4 & IPv6 Attacks		
8	The system should support symmetric & asymmetric traffic flow. Note - The architecture of the solution should not be restricted to HTTP, HTTPS and Syn Flood Protection. It should include other traffic like SSH, FTP, Telnet, SMTP, etc.		
9	The system should be capable to mitigate and detect both inbound and outbound traffic.		
10	The DDoS detection solution must have the learning mode to easily identify anomalies in the network communication.		
11	The application should generate reports and provide analysis		
12	System should have capability to differentiate between Flash Crowds and Attack Traffic.		
13	System should support suspension/dynamic suspension of traffic from offending source based on a signature detection		
14	System should support user customizable/user definable signature/counter measures		
15	System should protect from TCP Out-Of-State attacks.		
16	Solution should Detect misuse of applications in the network like HTTP, SMTP, SIP etc		
17	The system must be able to block invalid packets (including checks for Malformed IP Header, Incomplete Fragment, Bad IP Checksum, Duplicate Fragment, Fragment Too Long, Short Packet, Bad TCP / UDP Checksum, Invalid TCP Flags, Invalid ACK Number) and provide statistics for the packets dropped. Solution should also support packet Anomaly Protection.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
18	The system must support the dropping of idle TCP sessions if client does not send data within a configurable initial time period and should statically/dynamically blacklist the offending sources.		
19	The system must have Connection limit option for limiting the number of new connection based on a) Source Basis. b)Destination Basis In IP wise or in range or equivalent		
20	System should have Behavioural DoS approach/ Challenge response/ countermeasure based approach for immediate mitigation of flood attacks—protecting against zero-day DoS and DDoS attacks without manual intervention. The system should not depend on only signatures for mitigation of DDOS attacks.		
21	System must be able to detect and block SYN Flood attacks and should support different mechanism a) SYN Protection - TCP Authentication, b) SYN Protection - TCP Reset		
22	System must be able to detect and block ICMP, DNS Floods, Bot nets.		
23	System must be able to detect and block HTTP GET Flood and should support following mechanism to avoid False positive Prevention (or equivalent); a) TCP Authentication/302 Redirect. B) JavaScript redirection		
24	System should Protect from Amplification attacks or equivalent		
25	System should be able to provide Challenge action/Challenge Response applicable to suspicious source/ specific policy only		
26	System should detect from Known DDOS attack Tools without any performance impact. For All the known attacks mitigation should have a signature database and the database to be updated weekly or as and when emergency.		
27	System should detect and Mitigate different categories of Attacks irrespective of Source Origin		
28	System should Decrypt ALL Incoming SSL Traffic.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
29	The Device should have at least 8 x 1G copper Interfaces, 4 x 10G SFP fiber interface. Device should have Dual Power supply (Active- Active).		
30	The system must support configuration via standard up to date web browsers.		
31	System must support CLI access over RS-232 serial console port or equivalent , through SSH or Telnet, etc.		
32	The system must have a dedicated management port for Out-of- Band management		
33	Management interfaces must be separated from traffic interfaces. System management must not be possible on traffic interfaces, management interfaces must not switch traffic		
34	System must support concept of users, groups, roles and role based access permission		
35	The proposed solution should have inbuilt Management /external management system to manage configure DDOS solution.		
36	The logs should be stored in the hard disk/ SSD for atleast 90 days. The device should support integration with an external Syslog server or equivalent.		
37	The System must support the ability to blacklist a host, country , domain , URL, valid IP Range.		
38	The system must support the blocking of malformed DNS requests on port 53 that do not conform to RFC standards and capability to allow only specific DNS query type.		
39	The system must be able to drop specific HTTP packets with HTTP headers matching to configurable REGEX expressions.		
40	The system must provide the ability to block bot-originated traffic according to system supplied signatures and challenge response mechanism.		
41	Device should integrate seamlessly with the all SOC solutions existing and procured through this RFP and procured by OICL during the contract period.		
42	As a part of proposal, supplier must indicate availability of spare devices for quick RMA hardware replacement: location of devices and replacement time (Next Business Day)		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
43	System should have inspect throughput for a minimum of 1 Gbps scalable to 3 Gbps without additional hardware.		
44	System should have high performance FPGA or equivalent based architecture that ensures that attack mitigation does not affect normal traffic processing and Minimum DDoS Flood Attack Prevention Rate up to 12 Million PPS.		
45	System should have SSL Inspection Throughput of 1 Gbps on Day 1, Scalable to 3 Gbps on the same Device without additional hardware and should support minimum 30K SSL TPS / CPS @1K or 6K SSL TPS / CPS @2K.		
46	The solution must provide an appliance status dashboard that includes information about active alerts, all protections applied to traffic, total passed and blocked traffic, blocked hosts, traffic through the interfaces and solution CPU/Memory status		
47	The solution must provide summary reporting of user defined Top IP Sources and Destinations		
48	The detailed statistics and graphs for each protection group for Servers like Web, DNS, File Servers, Custom Servers must include information on total traffic, total passed/ blocked traffic, number of blocked hosts, statistics on each prevention type, traffic by URL, traffic by Domain, IP Location information, Protocol distribution, Services distribution, Web Crawlers, and statistics on top blocked hosts		
49	The solution must provide packet capture display filters for Passed, Dropped, or all packets of traffic		
50	The solution must provide detailed statistics and graphs for specific prefixes, showing their impact on traffic over a custom specified interval.		
51	The solution must display real- time protection statistics on dropped and passed traffic in packets, with rate statistics in bps/pps.		
52	The solution must support the generation of pdf reports containing the detailed statistics and graphs for any user defined entity from the solution		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
53	The solution must support the generation of e-mail reports with the detailed statistics and graphs for any user defined entity from the solution		
54	The solution must have upstream cloud signaling mechanism to effectively handle volumetric and application based attacks which volumetric in case of multi vector DDoS attacks		
55	The proposed DDoS Solution should not have latency exceeding 90 Microseconds		
56	DDoS Mitigation System should support Symmetric and Asymmetric Traffic flows along with the following capabilities. a) The System must have an updated IP reputation feed that describes suspicious traffic (Blacklisted IPs, botnets, Phishing etc.) b) The System should have options for Blacklist and Whitelist, If user wants to configure any customer IPs.		
57	The solution should have following capabilities 1. DDos Protection from active botnets 2. DDos Protection from active DDos campaigns based on IP reputation 3. Protection from web crawler service 4. IP reputation to block threats 5. Capability to handle L2-L7 DDoS attacks		

10.1.4 NAC

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	General Requirement		
1	Solution should integrate seamlessly with existing IT infrastructure comprising of routers, switches, firewalls, IPS, various types of WAN links and computers, devices, printers, IP phones, Operating Systems etc.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
2	Solution should be capable to Implement centralized authentication and authorization system or accessing and administering applications, operating systems, databases, network and security devices/systems, point of connectivity (local/remote, etc.) including enforcement of strong password policy, two-factor/multi-factor authentication depending on risk assessment and following the principle of least privileges and separation of duties.		
3	The NAC Solution should support all IP enabled devices from day 1. The solution should be able to identify all IP enabled devices.		
4	The NAC Solution should able to integrate with WSUS/SCCM for patch Management and Antivirus		
5	The NAC solution should able to send the logs to external log server		
6	The NAC solution should support existing network infrastructure (Wired/Wireless/VPN).		
7	The NAC solution should detect endpoint state changes (AV disabled, execution of an unauthorized application etc.) and perform the remediation		
8	The Solution should support Out of Band or Inline or equivalent deployment mode with adequate high availability to avoid single point of failure.		
9	Proposed Solution should not lead to downtime of the OICL Network due to any failure/downtime of NAC Solution		
	Broad Requirement		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
10	Network Access Control solution (NAC/NAC Solution/Solution) should do exactly what the name implies— control access to the network with policies, including pre-admission endpoint security policy checks and post-admission controls over where users and devices can go on a network and what they can do.		
11	The Network Access Control (NAC) solution should be an automated security control platform that can monitor and control everything on the network—all devices, all operating systems, all users. The solution shall let employees and guests remain productive on the network while critical network resources and sensitive data remain protected.		
12	Solution should Maintain an up-to-date/centralised inventory of authorised devices connected to the network and authorised devices enabled in the network.		
13	Solution must provide a highly powerful and flexible attribute-based access control solution that combines authentication, authorization and accounting (AAA), BYOD, posture, profiling, guest management services and conditional elements on a single platform.		
14	It must allow to authenticate and authorize users and endpoints via wired, wireless and VPN with consistent policy throughout the Network and should support variety of authentication methods (802.1X, MAC auth, Web auth etc) and ensure endpoint compliance is met		
15	The proposed solution should have role based policies defined, implemented, monitored continuously for policy violation. In		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	case of violation SOC should be alerted and given a provision of automated remediation		
16	Solution should ensure that the high privilege accounts (administrator level) are not used except to access specific resources		
17	Solution must be designed and deployed to work with the existing network and devices and should not require re-architecting the network and bidder is required to resolve any issue in order to make the NAC Solution work		
18	Solutions must support agent and dissolvable agent method for performing endpoint profiling, baselining, health check, isolate and initiate remediation process and must check the end device compliance before permitting access to the network		
19	The System should support Federal Information Processing Standard (FIPS) 140-2		
	Capacity & Architecture Requirement		
20	Solution must have equipment & component level redundancy, fault tolerance and site level redundancy with automatic-seamless-stateful failover as mentioned in the RFP		
21	Solution must be scalable		
22	Solution should have multitier architecture for supporting scalability		
23	Components/devices should have ability to be clustered in any combination via local and remote network connections providing scale, redundancy, and access load balancing.		
24	Solution/devices should be rack mountable and have redundant power supply.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	Functional Requirement		
25	Solution should do Authorization, Authentication and Accounting of endpoint connections		
26	Supports a wide range of authentication protocols, including PAP, MS-CHAP, Extensible Authentication Protocol (EAP)-MD5, Protected EAP (PEAP), and EAP-Transport Layer Security (TLS).		
27	Enable administrators to centrally configure and manage profiler, posture, guest, authentication, and authorization services in a single GUI console, and greatly simplifying administration by providing consistency in managing all these services.		
28	Solution should provision for differentiated authorization based on specific device. For eg. When User 1 (who is a Network Admin) logs in from PC 1 he is authorized to access Internet etc. and he cannot login to any Network device from PC1, but the same User 1 logs in to a System Admin PC kept in Firewall's Management Zone, then the user 1 will be able to login to Network devices but cannot access Internet.		
29	Solution should support RADIUS server for all endpoint device authentication		
30	All external facing interfaces are programmable, which means APIs are available to extend the system to support different authentication protocols, identity stores, health evaluation engines and port and vulnerability scanning engines.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
31	Solution should support Role-based controls of user, devices and application or controls based on post authentication security posture		
32	Solution should have capability to assign services based on the assigned user role, group, and associated policy (job role, location, device type, and so on).		
33	Solution should support Identity and access management. Solution should have capability to establish user identity, location, and access history, which can be used for compliance and reporting.		
34	Solution needs to detect unsuccessful logins and restrict the devices to limited access		
35	Solution shall detect and disconnect the idle end devices after expiry of Authentication time-out		
36	Solution should facilitate provisioning of assets and should deny access to non-complaint devices		
37	Solution should provision two factor or multifactor authentication for allowing access to the network resources by integrating with third party two-factor authentication		
38	Policy must be thoroughly tested before being implementing them in the production		
39	Solution should have Real-time and Context aware policy assessment feature		
40	Solution must have Dynamic role-based enforcement workflow for user and device registration		
41	Solution should support Access control lists – both statically defined filter-ID based enforcement, as well as dynamically downloaded ACLs.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
42	Solution must support Non 802.1x technology on assigned ports and 802.1x technology on open use ports		
43	Solution should support Mac Address Bypass (MAB) and can further utilize identity of the endpoint to apply the proper rules for access. Mac Address Bypass is typically used for devices which do not support 802.1x		
44	Solution should offer comprehensive visibility of the network by automatically discovering, classifying, and controlling endpoints connected to the network to enable the appropriate services per endpoint		
45	Solution should support network-based profiling by targeting specific endpoints (based on policy) for specific attribute device scans, resulting in higher accuracy and comprehensive visibility of the network		
46	Solution should manage endpoint access to the network with the Endpoint Protection Service, which enables administrators to specify an endpoint and select an action - for example, move to a new VLAN, return to the original VLAN, or isolate the endpoint from the network entirely - all in a simple interface		
47	Solution should offer a rules-based, attribute-driven policy model for creating flexible and business-relevant access control policies. Provides the ability to create fine-grained policies by pulling attributes from predefined dictionaries that include information about user and endpoint identity, posture validation, authentication protocols, profiling identity, or other external attribute sources. Attributes can also be created dynamically and saved for later use		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
48	It should allow Administrators to create their own device templates. These templates can be used to automatically detect, classify, and associate administrative-defined identities when endpoints connect to the network. Administrators can also associate endpoint-specific authorization policies based on device type.		
49	Solution should verify endpoint posture assessment for PCs connecting to the network. Works via either a persistent client-based agent or a temporal web agent to validate that an endpoint is conforming to a company's posture policies. Provides the ability to create powerful policies that include but are not limited to checks for the latest OS patches, antivirus and antispymware software packages with current definition file variables (version, date, etc.), registries (key, value, etc), and applications. Solution should support auto-remediation of PC clients as well as periodic reassessment to make sure the endpoint is not in violation of company policies.		
50	Should have mechanism to automatically identify unauthorized device connections to the network and block such connections originating within the network		
51	Solution should classify a client machine, and should support client provisioning resource policies to ensure that the client machine is set up with an appropriate agent version, up-to-date compliance modules for antivirus and antispymware vendor support, and correct agent customization packages and profiles, if necessary		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
52	Solution should support automated remediation and integration with all major OEM Antivirus, patch update and O/S systems		
53	Solution should support URL redirection or secure tags for remediation or Auto remediation or prompt the end user with appropriate message for self-remediation or other purposes		
54	Should have predefined device templates for a wide range of endpoints, such as IP phones, printers, IP cameras, smartphones, and tablets.		
55	Solution should have ability to meet each of the following features: a. Base lining for endpoints determines the status of a wide variety of endpoint devices, including different device type, operating system, etc. b. Profiling for endpoints which identifies all connected devices, including advanced mobile identification. c. Guest management is performed from a central, "single pane" viewpoint allowing full visibility into current guest provisioning.		
56	Solution should support Help desk and self-service remediation allowing for load reduction through end user self-support and automatic remediation including remediation, guided remediation, quarantine, manual etc		
57	Solution should support to Integrate with firewall, IPS, Router, Switch, Wireless Access Points, Active Directory, LDAP, MDM solutions etc of major OEMs using direct or platform exchange mechanism		
58	Solution should support granular level policy enforcement and provide information about users beyond that obtained in a login system		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
59	Solution should detect network threats by itself or by integrating with other Security defenses and should be prevented from spreading and should send notification to end user and administrator concerning the network threat activity via e-mail and http/webpage notification		
60	NAC solution should take feedback from external systems like Syslog servers, IDS/IPS, Firewalls etc. and block a user if compromised on the network.		
61	Delivers customizable self-service portals as well as the ability to host custom web pages to ease device and guest on-boarding, automate endpoint secure access and service provisioning, and enhance the overall end-user experience inside business-defined workflows		
62	Solution should allow end users to interact with a self-service portal for device on-boarding, providing a registration vehicle for all types of devices.		
63	Should support full guest lifecycle management, whereby guest users can access the network for a limited time, either through administrator sponsorship or by self-signing via a guest portal. Allows administrators to customize portals and policies based on specific needs of the enterprise		
64	Solution should determine running of endpoint solutions (such as AV, PF, DLP, HIPS etc.) with latest updates to support threat monitoring, containment extending beyond rogue detection and authentication action etc.		
65	Solution should have profiling capabilities integrated into the solution in order to detect headless host. The profiling features leverage		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	the existing infrastructure for device discovery. Should support the use of attributes from the following sources or sensors: a. Profiling using MAC OUIs, DHCP information, RADIUS information, HTTP information, DNS, SNMP, Flow/Jflow information etc.		
66	Should support session termination with port shutdown option to block an infected host that sends a lot of traffic over the network.		
67	Should support for importing endpoints details from LDAP/AD server. Should allow to import MAC addresses and the associated profiles of endpoints securely from an LDAP/AD server		
68	Must incorporate a complete set of tools for reporting (Audit trailing, customizable reporting and data export capabilities), analysis, and troubleshooting. Data from access transactions can be organized by customizable data elements and used to generate graphs, tables, and reports. Must correlate and organize user, authentication, and device information together		
69	The proposed solution should provide the ability to monitor an endpoint after it has gained access to the network		
70	Should support Endpoint audit via NISSUS or NMAP scanning		
71	Solution should support troubleshooting of authentication issues by triggering session re-authentication to follow up with an attempt to re-authenticate again.		
72	Encryption of traffic to the wireless and wired network using protocols for 802.1X such as EAP-TLS, EAP-PEAP or EAP-MSCHAP.		
	Remediation, quarantine and captive portals		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
73	Quarantine (A quarantine network is a restricted IP network that provides users with routed access only to certain hosts and applications)		
74	Captive portals (A captive portal intercepts HTTP access to web pages, redirecting users to a web application that provides instructions and tools for updating their computer. Until their computer passes automated inspection, no network usage besides the captive portal is allowed)		
75	Solution should enforces security policies by blocking, isolating, and repairing noncompliant machines in a quarantine area without requiring administrator attention		
76	Allows administrators to quickly take corrective action (Quarantine, Un-Quarantine, or Shutdown) on risk-compromised endpoints within the network. This helps to reduce risk and increase security in the network.		
77	Solution should support automated /manual remediation system including starting process, killing process, setting registry keys, starting antivirus, update anti-virus, starting windows updates and running custom scripts		
78	When endpoints are discovered on the network, they can be profiled dynamically based on the configured endpoint profiling policies, and assigned to the matching endpoint identity groups depending on their profiles.		
79	The solution should support Endpoint context visibility using the Unique Identifier (UDID) attribute		
80	Restrict access based on - End station condition IP, MAC - Device Network Condition – based on AAA client IP address, Device name or Network device group		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	- Device Port Conditions – IP address, name, Port		
81	The solution should support RADIUS DTLS to provide improved security for DTL tunnel establishment and RADIUS communication		
82	The solution should uses the cached user credentials for the subsequent authentications if they happen within the configured time period		
83	The solution should support Dictionary Check for User and Admin User Passwords		
84	The solution should be able to integrate with firewall, NBA for containment of malicious or infected host in the network		
85	Solution should have capability to identify and authenticate BYOD		
86	The solution should periodically check the compliance of the machines and it should not wait for the next authentication event to happen.		
87	Solution should support the following guest networking capabilities: a. automated provisioning of network login credentials b. network access to certain hours of the day c. secured profile control related to the application uses for guest users" d. Solution should provision guest notifications of their login credentials by: email, SMS etc. e. Provides complete guest lifecycle management by empowering sponsors to on-board guests		

10.1.5 MDM

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	General		
1	Solution Should failover to standby site without compromising security policy defined or without any changes at End users		
2	The licenses for the proposed solution is for 500 devices (consisting of Mobiles, PDA's, Tablets, Laptops)		
3	The solution should have a scalability support for 2500 devices		
	Platform Architecture		
4	Supports Platforms - Android, iOS, Windows 10, OSX, Chrome		
5	Open enterprise platform technology (.NET, Microsoft SQL, Windows Server)		
6	Support for RESTful APIs for extensibility / workflows		
7	Secure tiered-architecture (database server securely on internal network and not in DMZ)		
8	Same functionality / platform for on-premise and cloud deployments (no gap in feature time to market)		
9	Multi-tenant architecture to support multiple active LDAP/AD, Exchange, PKI, etc. integration services		
10	Grouping of devices and users based on business units, organization groups, geographic locations, device ownership, etc.		
11	Customized branding in the solution		
12	Support for federated authentication (SAML 2.0)		
13	Limit device registration based on LDAP OU, groups and attributes (x max devices per user)		
14	Automatically email user to enroll based on being added to an LDAP/AD group		
15	Restrict device registration to IT approved device platforms, model, OS, and ownerships		
16	The application should generate reports and analysis		
	Device Management		
17	Compromised device detection (jailbreak, root)		
18	Offline wipe for compromised detection (app specific detection)		
19	Kiosk mode to restrict device to run approved applications (Android & iOS (Single App))		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
20	Support shared device deployments (one device that multiple users can login and receive their appropriate content)		
21	Integrate with Android for Work		
22	Integrate with specific OEM APIs (KNOX, LG, Moto, Sony, Panasonic, etc.)		
23	Windows 10 support including streamlined deployment (bulk enrollment, add work account), health attestation, conditional access, encryption policies, Windows Hello and Passport integration, update management		
24	Supports Apple's Device Enrollment Program and VPP for iOS and Mac OS X		
25	Manages Wi-Fi-only (non-cellular-capable) devices		
26	Recognizes multiple devices per user		
27	Can enforce user authentication before device use		
28	Can apply policies by device type or OS		
19	Can push out and manage a WLAN profile		
30	Can disable/enable the camera		
31	Determines device compliance based on the OS version		
32	Can configure the device to lock if the maximum number of failed login attempts is exceeded		
33	Can configure device wipe if the maximum number of failed login attempts is exceeded		
34	Can configure device lock or wipe if the SIM card is changed or removed		
35	Can configure device lock or wipe if the device cannot communicate with the EMM suite		
36	Detects hardware-based jailbreak or rooting before allowing enterprise resource access		
37	Detects software-based jailbreak or rooting before allowing enterprise resource access		
38	Checks device policy compliance before allowing enterprise resource access		
39	Has an automatic policy control that deletes all enterprise policies, profiles, apps and data if the management agent is removed		
40	Can configure and manage the internal VPN		
41	Can manage multiple WLAN profiles		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
42	Support management of BYOD (employee-owned) and GFE/AFE devices with equal facility.		
43	Support for multi-factor authentications		
44	Remote troubleshooting and Administration		
45	Centralized configuration & policy management (group based configuration)		
46	SIM mapping with device, so that SIM change will disable the functioning of Device		
47	Device WIPE/Part WIPE in case number of pre-defined attempts cross a predefined attempts device not connected to MDM for defined number of days		
48	Mobile asset and GPS tracking		
	Compliance		
49	Web user interface to define and assign compliance policies (no scripting required)		
50	Customizable compliance levels (define 1-n compliance tiers)		
51	Define automatic actions for compliance and tiers of actions and notifications (immediate, X minutes, X hours, X days)		
51	Fully configurable notification system (notify select admins or end users based on select events defined)		
	Reports and Logging		
52	Pre-configured policy reports (Compliance, asset management, applications, email, content, certificates, etc.)		
53	Real time device data reporting and dashboard views		
54	Centralized event log to capture all device and administrative events (logins, policy changes, application updates, configuration updates, etc.)		
	Email Management		
55	Support containerized email, calendar, contacts		
56	Prevent unmanaged / compromised / non-compliant devices from email access		
57	Two factor email authentication (certificate and un/pw)		
58	Support S/MIME email (iOS and Android)		
59	Whitelist applications for opening attachment		
60	Encrypt email attachments (AES 256 encryption)		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
61	Disable access to all email attachments upon jailbreak/root detection (without internet connectivity)		
	Application Management		
62	Blacklist / whitelist / required application lists		
63	Support different deployment policies (on-demand, auto install/ install with manual intervention, VPN configs, etc) for different groups of users		
64	Unified app catalog to enable users to access any app - native, web or remote - on any device		
65	Support multiple VPP tokens and assignment of applications to users		
66	Support for multiple application versions (different devices use different versions)		
67	Secure applications by wrapping post code complies without modifying source code for iOS and Android		
68	Secure applications by integration with an SDK		
69	AppWrapping security settings can be updated OTA at any time		
70	Auto detect compromised status upon application launch - restrict use of application when detected		
71	AppTunnel - Certificate based secure app-specific VPN tunnel to internal network		
72	User-level microsegmentation that extends security from the device to the data center		
73	Built in one-touch mobile single sign-on (SSO) with conditional access		
74	Can block access to consumer app stores		
	Content Management		
75	Integrates with existing on-prem repositories (Network Shares, WebDAV, SharePoint, CMIS)		
76	Supports cloud repositories (O365, One Drive, Google Drive, Box)		
77	Global search across corporate repositories		
78	Seamlessly integrates with existing content repositories - no need to copy or duplicate existing content		
79	Content encrypted in-use and at rest (FIPS 140-2 AES 256)		
80	Prevent copy / paste / screenshot / printing		
81	Content accessibility effective and expiration dates		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
82	Restrict content downloads while roaming, Wi-Fi only connections		
83	Whitelist or Blacklist file types to determine what can be uploaded or synced		
84	Outlook Add-In for creating links to documentation in email		
85	Limit number of downloads for shared content links		
	Identity Management		
86	Integrates with the enterprise LDAP/AD directory for users and groups		
87	Integrates with the enterprise LDAP/AD directory for the administrator console		
88	Provides Microsoft AD credential integration		
89	Natively integrates with Microsoft AD Certificate Services		
90	Uses SCEP for certificate distribution		
91	Provides basic certificate-based authentication for device access		
92	Provides certificate-based authentication for Microsoft Exchange		
93	Supports password policies for the device		
94	Supports password policies for the container		
95	Supports administrator console password policies		
96	Provides two-factor authentication for container access		
	Self Service Portal		
97	Provide user self-service portal to manage their own devices and corporate access (GPS, Policy and Security Management, Compliance visibility)		
98	Apply privacy settings ensuring sensitive device data is not collected		
99	Visual privacy app for users to see what admins can access on their device		
	Secure Browsing		
100	Provide separate corporate browser for secure browsing		
101	Kiosk mode to restrict browser to a single web application or whitelists / blacklists sites		
102	Intranet browsing through secure AppTunnel (no device VPN required)		
103	Enforce security policies (Prevent copy/paste, Data at rest protection (cache, cookies, history)		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	Other Features		
104	Solution should support multiple authentication types with one single installation. Any Open source LDAP v2 and above, Active Directory and Azure		
105	The Solution should manage using Unified Console for EMM solution management for Devices, Apps, Email and Content management		
106	Solution should have a SDK for iOS and Android mobile application development platforms		
107	Solution should support Multi-tenant and Multi-Domain integration with complete separate branding, policies and configuration requirement		
108	The Solution should help to enable EMM as service for multiple circle, product portfolios like – e-KYC, BYOD, Insurance		
109	The solution should be load balancer agnostic - should work with any load balancer should support - DNS round Robin, Session or cookie persistent session.		
110	Supports Platforms - Android, iOS, Windows 10, OSX		
111	Mobile Threat Prevention solution must be able to detect and prevent the mobile attack vectors: OS exploits, network attacks & SMS phishing. MDM and mobile threat prevention should be from different OEM and must be tightly integrated for seamless deployment		
112	Mobile Threat Prevention solution should protect the employee device from infected apps, man-in-middle attack, OS exploits, day 0 protection and malicious links in SMS messages		
113	Mobile Threat Prevention solution should have dashboard with real time threat intelligence and visibility into mobile threats		

10.1.6 PIM

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	Architecture		
1	Should be Agent based/ agentless		
2	Solution should support High Availability/Redundancy deployments for higher availability and DRBC solution. The system should be highly available (24x7x365) and redundant from hardware failure, application failure, data failure, and / or catastrophic failure. The system should have provisions to keep the solution running at 100% with proper alerting, fail-over, bypass in equally secure manner with availability of credentials.		
3	The password vault must be highly reliable, the switch over to HA/DR should be instantaneous without manual intervention, and provisions should be available to recover credentials securely in case of catastrophic failures.		
4	Solution also support for printing of password in secure manner		
5	The solution should provide a secured process for encrypted storing and backups.		
6	The architecture should support network load balancing and clustering technology.		
7	If a back-end database is used/required, the database should be managed within the solution and no outside DBA access should be available. The solution needs to be fully self-managed and hardened.		
8	The platform should be highly secured, tamper-proof for the solution and for the storage. The solution should provide web-based interface for easy access and management.		
	Performance and scalability		
9	The solution should be able to be implemented in virtual environment. Solution should also be able to control, manage privileged accounts and identities on Hypervisors/ platform virtualization software (Installation on virtual servers and control of users and resources in virtual servers etc.).		
10	The product should be capable of handling unlimited user accounts and systems. There should be no latency or performance degradation in using an average of 100 users.		
11	In multi-tiered architecture the solution should have the capability to deploy the password database, management console, web server and reporting database etc. on separate machines which can be connected to a central management console. (Web-based Central administration		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	within unified suite, single user interface, central repository)		
12	The solution should provide scalability through a modular design for adding capacity and scalability metrics. It should have capability to integrate with HR applications / Identity and Access Management applications or Physical access applications that OICL may procure.		
	Discovery of Systems, Accounts and Services		
13	The product should be capable to dynamically and automatically detect new resources / locations like desktops, servers, operating systems, services, IIS service accounts, network devices, hyper visors in virtual systems etc., throughout the environment and provision them to the product and automatically discover privileged accounts and enforce the right password policy.		
14	Product must support open API / provide API's to add "connectors" to manage devices that are not currently supported 'out-of-the-box'. It should also be capable of connecting to legacy applications.		
15	The solution must be able to support/manage privileged accounts and create seamless single sign on in the following: Windows, Unix, HP UX, Different flavours of Linux, Oracle, MS SQL Server, SOC application like ASA-Firewall, Radware Alteon -WAF & Load Balancer, WSA -Proxy Server, Network Devices (routers, switches, firewall, IDS/IPS etc.)- Cisco, Brocade, ASA, Applications - SAP, PeopleSoft, Virtual Servers like Oracle Virtualisation ,HyperV, VMWare, web-based or client-server application, Apache, MS Exchange client support application like TOAD, SQL Plus, SSH and ODBC services/devices, Servers, PCs and Laptops connected to the network, Mobile/smart devices/applications, Middleware like Oracle WebLogic, IBM Websphere, JBoss, Tomcat SSL/VPN application like Portwise Access Manager SAN storage devices and Tape libraries etc. or any other solution procured by OICL during contracted period. The solution should be capable of providing multi-domain access.		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
16	Should be able to seamlessly connect to Active Directory and LDAP-Compliant directory services accounts, TACACS/TACACS+ and RADIUS. For identity consolidation, solution should provide AD bridging capabilities over heterogeneous non-windows platforms as this helps to manage Unix, Linux and other non-windows platform accounts through Microsoft AD thereby enabling consolidation of authentication and account information.		
17	The solution should be able to bulk-import system lists and make ad-hoc entries through the management console.		
18	The product must be able to manage remote target systems through a firewall (e.g. servers in a DMZ, remote locations etc.) through secure built-in connectivity (without requirement of additional security; such as third party VPN)		
Password Management / Credential management			
19	The solution should have a strong inbuilt password vault/management system with single-sign-on feature. Password vault should be replicated over a secured channel and off-site data backup, data restoration capabilities should be offered. PIM solution as a whole and specially the password vault, should be installed on a highly secure/ hardened system with minimal services running, in a physically safe environment with least number of people having access to the administrative controls.		
20	Should be able to create flexible password management policies for assets. A policy can be applied to an object/a group of objects or a group of policies can be applied to an asset/group of assets/objects.		
21	After dynamically discovering resources /services/ processes, the solution should be able to propagate password changes to relevant targets across the network to avoid the potential for service disruptions and lockouts whenever changes are made.		
22	Product should allow bulk operations to be performed on managed accounts (such as force password change immediately, reconcile password, verify password)		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
23	Password changes can be scheduled. Solution must protect password change process against race conditions like a failed attempt to update password on target system (password in vault should not be updated) or inability/delay in determining if the password has successfully been updated on target systems or application configuration files (old password shouldn't be removed from the vault). Recovery of managed systems from a backup media should also be supported by solution - for e.g., a database recovery to a point 5 days back.		
24	Any failed password change event or exceptions should be promptly reported after a certain numbers of retries.		
25	The solution should have the capability to reset individual passwords or groups of passwords on-demand, and to schedule automated checks to ensure that each password stored in the database correctly matches the current login for each target account.		
26	The solution should keep the passwords in very strong encrypted form. Support for Hardware Security Modules (HSMs) should be available. The solution should also provide for strong encryption inside the system components/processes, between its distributed modules, and between the web application and user machines, to protect passwords and other sensitive information.		
27	Solution should be able to change password on demand, on the basis of a specific criteria or policy, automatically or manually, support password verification, reconciliation and reporting, set password parameters like constitution, history, and change timings.		
28	The solution should support transparent connection to the target device, without seeing the password or typing it in as part of the connection.		
29	The solution should be able to manage credentials in well-known operating systems, applications, Database Management Systems, programming languages/scripts (Exa: C++, Java,.Net, VB etc.).		
30	The solution should be able to manage passwords stored in plain or encrypted, hardcoded in system files or user-defined files, database tables, network devices etc. including within application configuration files, code or scripts.		
31	The solution should have provisions to provide credentials for authenticating applications/scripts during run-time.		
E	Access Management		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
32	The solution should be able to automatically and dynamically provision users in real time with trusted Windows domains, popular directories such as AD/ LDAP /TACACS+/RADIUS servers in accordance to the user entitlements and access privileges granted (based on least privileges principle). Solution should be able to support granular command filtering or context-sensitive entitlements on various platforms for super-user privileged management. Solution should also be able to detect and support concurrent login to managed systems as a privileged user		
33	The solution should be capable of organizing / grouping target server / device accounts into logical groups and apply granular/fine-grained access control to access the individual accounts or the groups of accounts.		
34	The solution must support full Segregation of Duties - e.g. roles are clearly and unambiguously defined with no overlapping. In addition to user access roles and entitlements, solution should also support role based administrative access in order to provide Segregation of Duties for administrative management and control. The user permission should be only as per his original privilege even he 'SU'es after logging in to the OS. Using root user credentials does not provide root privileges. Capability to restrict users to use RDP to other end-points.		
35	It should be capable of having dual control systems (maker-checker) for approval and authorisation of critical operations with 4-eye principles.		
36	The solution should be capable of integration with strong authentication including biometric authentication, OTP authentication support on alternate channel, hardware/software tokens etc. with single sign on facilities.		
37	The solution should have login security by limiting user login by parameters like originating IP address, terminal ID, type of login program or time of the day or geographical location etc. and limit concurrent login sessions by user.		
38	The solution should be capable of maintaining details of shared/pooled accounts by mapping it to the individual users.		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
39	The solution should be capable to have command level restrictions, i.e. of assigning specific commands to be run by specific users/groups, from specific nodes etc. The solution should be able to block commands from command line and also in queries as configured for users/groups/target resources.		
	Workflows		
40	The solution should be capable of integrating with a Change Management /ticketing system like Sapphire in order to initiate access approval workflows for scheduled changes and be able to control required access (based on least privilege principle) and monitor and/or terminate super user connections that exceed pre-set time limits (change window).		
41	It should have ability to enforce approval workflow only to the human users which can be created to a very granular level.		
42	It should support a workflow approval process that is flexible to assign multiple approvers based on product or model (i.e. require 2 or more approvals before access is allowed). Solution should also be able to provide delegation of management tasks like approval / review etc. Should support easy customization of approval workflows according to business needs (without requiring code changes). Solution should also be able to support emergency/ break glass scenarios.		
	Auditing/Reporting		
43	The solution should provide a central live Dashboard covering features like management of devices, events and password policies, user activities, event logs etc.		
44	The system should have all regular pre-configured report templates like entitlements reports, user activities, privileged accounts inventory, applications inventory, compliance reports etc., capability to create custom reports based on users, events, activities, target systems, password uses and status etc., distribute the reports to intended users through e-mail, the ability to run all reports by frequency, on-demand and schedule them.		
45	The reports generation should support CSV or Excel. This report extraction should not have any performance impact & feature for report extraction should be available on demand & scheduled. The solution should support customizable reports.		

S. No	Requirements	Compliance (S/C/N)	Bidder's Remarks
46	The solution should record access to the Web console for password requests, approvals and check-out, delegation changes, reporting and other activities, access to its management console for configuration and reporting, and all password change job activity.		
47	The solution should be able to record sessions, take video recording of screen shots, key strokes / commands and output, replay sessions for forensic purposes and provide optimized search capabilities on different parameters like users, events, time, target resources etc.		
48	The solution should have real-time session monitoring support and full audit-trail for user activities in the solution itself.		
	Alerting and Integration		
49	The solution should be configurable so that events can trigger email / SMS alerts, run specific programs, and communicate with trouble ticketing applications like Sapphire, other security frameworks.		
50	The solution should be capable of alerting on actions such as password requests and check-outs, password changes, failed password change jobs, console and web application activities etc. and attempts of access violations (running elevated/ higher privilege commands, modifying password/ user files, adding users to privileged groups etc.)		
51	Ability to integrate with vulnerability management solutions for deep, authenticated scans (e.g. Indus Guard, Qualys Guard, Rapid 7 etc.) i.e. should be able to provide credentials to these scanning applications during run-time.		
52	The solution should be able to provide simple methods for integrations that are not provided out-of-the-box with minimum of effort.		
	Compliance Reports		
53	The solution should provide pre-configured reports to monitor compliance with regulatory mandates such as SOX, PCI-DSS, HIPAA, IRDAI etc. It should also provide screen-based templates/capabilities to create/generate custom reports without writing codes.		
54	The solution should not act as a single point of failure for privilege access to systems and it should be possible to recover passwords during outages.		

10.1.7 VAPT

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
1	<p>Network Scanning /Surveying-Bidder shall identify active hosts on a network, for the purpose of simulating attack and also for network security assessment with the help of suitable procedure/ tools including but not limited to :-</p> <ol style="list-style-type: none"> Examine Name server responses Review the outer wall of the network Review tracks from the target organization Review Information Leaks 		
2	<p>Port Scanning : To find the active ports on server port addresses on a host vendor shall perform the following but not limited to :-</p> <ol style="list-style-type: none"> Error Checking Enumerate Systems Enumerating Ports Verification of Various Protocol Response Verification of Packet Level Response 		
3	<p>Port sweep : To scan multiple hosts for a specific listening port for potential vulnerabilities</p>		
4	<p>System & OS Fingerprinting : To guess the system information i.e. type and version of OS etc.</p>		
5	<p>System Identification & Trusted System Scanning: Vendor shall perform the SITS scanning which would include but not limited to the following:-</p> <ol style="list-style-type: none"> Match each open port to a service and protocol. Identify server uptime to latest patch releases. Identify the application behind the service and the patch level using banners or fingerprinting. Verify the application to the system and the version. Locate and identify service remapping or system redirects. Identify the components of the listening service. Use UDP-based service and Trojan requests to all the systems in the network. 		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
6	<p>Wireless Leak Tests: Vendor shall perform the vulnerability assessment & wireless leak test. This may include the following activities:-</p> <ul style="list-style-type: none"> a. Verification of the distance in which the wireless communication extends beyond the physical boundaries of the organization. b. List equipment needed/tried should be taken (antenna, card, amplifier, etc.) c. Verification of authentication-method of the clients d. Verification of that encryption is configured and running - and what key length used e. Verification of that clients can't be forced to fallback to plaintext-mode f. Verification of the IP-range of the network g. Verification of the IP-range and reachable from the wireless network, and the protocols involved h. Probe network for possible DoS problems. 		
7	Vulnerability Scanning: Vendor shall carry out VA for entire IT assets		
8	Malware Scanning : Vendor shall do exhaustive scanning for hostile or intrusive software, including computer viruses, worms, Trojan horses, ransomware, spyware, adware, scareware, and other malicious programs.		
9	Spoofing : Vendor shall assess the scope of potential spoofing attacks i.e, IP, ARP etc. and other applicable ones in the OICL's environment		
10	Security Policy Review: Vendor shall carry out the review & assessment of Security Policies already in place in the organization.		
11	<p>Services Probing : Vendor shall do the following:-</p> <ul style="list-style-type: none"> a. Web Tracks b. Mail Tracks c. Name Services d. Visible Documents e. Anti-Virus and Trojan 		
12	Application Security Testing & Code Review : In case of some application whose code review is allowed to be done for the purpose of VAPT i.e, HRMS,INLIAS-Live & Non Live, ECM, HRMS, Portal, SAP etc. the vendor shall conduct the same.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
13	<p>Service Fingerprinting: The vendor shall do the following:-</p> <ul style="list-style-type: none"> a. Examine system responses to determine operating system type and patch level. b. Examine application responses to determine operating system type and patch level. c. Verify the TCP sequence number prediction for each live host on the network. d. Search job postings for server and application information from the target. e. Search tech bulletin boards and newsgroups for server and application information from the target. f. Match information gathered to system responses for more accurate results. 		
14	<p>Access Control Mapping: ACL has to be reviewed and recommended for improvement.</p>		
15	<p>Assessment of OS Hardening : Vendor shall carry out the the assessment of OS hardening to check & explore the gap in hardening , patch management etc.</p>		
16	<p>Denial Of Service (DOS) Attacks: Following points may be considered for DoS attack :-</p> <ul style="list-style-type: none"> a. Verify that administrative accounts and system files and resources are secured properly and all access is granted with "Least Privilege". b. Check the exposure restrictions of systems to non-trusted networks c. Verify that baselines are established for normal system activity d. Verify what procedures are in place to respond to irregular activity. e. Verify the response to SIMULATED negative information (propaganda) attacks. f. Test heavy server and network loads. 		
17	<p>DDOS Attacks: All the steps as mentioned for DoS attack has to be verified.</p>		
18	<p>Authorization Testing: Vendor shall do the authorization & authentication testing for the present AD system.</p>		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
19	Doc Grinding (Electronic Dumpster Diving) a. News, Trade, and Business b. Sources c. Job, Board, and Chat Searches d. Newsgroups e. Cracks, Serials, and Underground f. FTP, Gopher g. Web h. P2P		
20	Lockout Testing: To mitigate the brute force attack etc., lockout testing must be carried out.		
21	Password Cracking : To mitigate the brute force attack, cryptographic attack etc., Password cracking testing must be carried out		
22	Cookie Security: Vendor shall review the cookie settings and recommend the best practice for making the environment secure.		
23	Cookie & Web Bug Analysis : Vendor shall review the cookie for bugs and recommend the best practice for making the environment secure		
24	Functional validations: Any or all application when offered for functional validation, vendor shall perform the same.		
25	Containment Measure Testing: The vendor shall perform this test also wherever applicable.		
26	War Dialing : In case of need vendor would carry out the wardialing for fax machines		
27	DMZ Network Architecture Review: Vendor shall review the present DMZ Network Architecture and recommend for the improvement if any.		
28	Server Assessment (OS Security Configuration): Vendor shall review the present configuration of critical servers and recommend for the improvement if any.		
29	Security Device Assessment: Vendor shall review the present security devices and recommend for the improvement if any.		
30	Network Device Assessment: Vendor shall review the present network devices and recommend for the improvement if any.		
31	Database Assessment: Vendor shall review the present databases and recommend for the improvement if any.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
32	Website Assessment (Process) : Vendor would do the assessment of internet facing application as mentioned in the subsequent section with and without credentials having different access levels like operator, supervisor, administrator, etc., to check for vulnerabilities like privilege escalation, input validation, etc.		
33	Vulnerability Research & Verification: Vendor shall conduct the research including but not limited to the following:- a. Integrate the currently popular scanners, latest scanning definitions/signatures, hacking tools, and exploits into the tests. b. Measure the target organization against the currently popular scanning tools. c. Attempt to determine vulnerability by system and application type. d. Attempt to match vulnerabilities to services. e. Attempt to determine application type and service by vulnerability. f. Perform redundant testing with at least 2 automated vulnerability scanners. g. Identify all vulnerabilities according to applications. h. Identify all vulnerabilities according to operating systems. i. Identify all vulnerabilities from similar or like systems that may also affect the target systems. j. Verify all vulnerabilities found during the exploit research phase for false positives and false negatives. k. Verify all positives. In addition to the above vendor shall perform Manual Vulnerability Testing and Verification also.		
34	IDS/IPS review & Fine tuning of Signatures : Vendor shall perform the IDS /IPS review including but not limited to the following :- a. IDS and features identification b. Placement of IDS in the network c. Testing IDS configuration d. Reviewing IDS logs and alerts		
35	Man in the Middle attack :- To rule out the possibilities of eavesdropping the MIMA has to be accrued out		
36	Man in the browser attack : To rule out the possibilities of eavesdropping the MIBA has to be accrued out		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
37	<p>Social Engineering: The vendor shall carry out social engineering for users at HO, IT staff & ROs. This may include request testing, guided testing & trusted people testing. This may include the following but not limited to :-</p> <ul style="list-style-type: none"> a. Select a person or persons from information already gained about personnel b. Examine the contact methods for the people from the target organization c. Invite the people & Gather information from them d. Enumerate the type and amount of privileged information disclosed 		
38	Trusted Systems Testing: The validity of trusted system also has to be checked.		
39	Directory Traversal : Directory Traversal is a type of HTTP exploit that is used by attackers to gain unauthorized access to restricted directories and files		
40	Linux Hacking: Vendor would assess the security risk associated with systems running on Linux platform.		
41	Keyloggers: Key loggers are a form of spyware where computer users are unaware their actions are being tracked.		
42	Rootkit: Vendor would assess the systems to see the presence or probability of presence of rootkit.		
43	Botnet : Vendor would assess the system to see the presence of botnet		
44	Any other attacks & Scenario Analysis: Apart from all the above mentioned line item if any activity required of felt by OICL as well as vendor has to be carried out.		
45	Website/Web – Application Assessment		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
46	<p>Website/Web- Application assessment should be done as per latest OWASP guidelines including but not limited to the following:-</p> <ul style="list-style-type: none"> · SQL Injection · Broken Authentication and Session Management · Cross-Site Scripting (XSS) · Insecure Direct Object References · Security misconfiguration · Insecure Cryptographic Storage · Sensitive Data Exposure · Missing Function Level Access Control · Cross-Site Request Forgery (CSRF) · Using Known Vulnerable Components · Un-validated Redirects and Forwards · Failure to Restrict URL Access · Insufficient Transport Layer Protection · Any other attacks, which are vulnerable to the web sites and web Applications 		
47	<p>Re-Engineering</p> <ol style="list-style-type: none"> a. Decompose or deconstruct the binary codes, if accessible. b. Determine the protocol specification of the server/client application. c. Guess program logic from the error/debug messages in the application outputs and program behaviors/performance. 		
48	<p>Authentication</p> <ol style="list-style-type: none"> a. Find possible brute force password guessing access points in the applications. b. Find a valid login credentials with password grinding, if possible. c. Bypass authentication system with spoofed tokens. d. Bypass authentication system using Injection attacks. e. Bypass authentication system with replay authentication information. f. Determine the application logic to maintain the authentication sessions - number of (consecutive) failure logins allowed, login timeout, etc. g. Determine the limitations of access control in the applications - access permissions, login session duration, idle duration. h. Determine the transmission of authentication credentials in clear text/ encrypted/ hash form. 		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
49	<p>Session Management</p> <p>a. Determine the session management information - number of concurrent sessions, IP based authentication, role-based authentication, identity-based authentication, cookie usage, session ID in URL encoding string, session ID in hidden HTML field variables, etc.</p> <p>b. Guess the session ID sequence and format</p> <p>c. Determine the session ID is maintained with IP address information; check if the same session information can be retried and reused in another machine.</p> <p>d. Determine the session management limitations - bandwidth usages, file download/upload limitations, transaction limitations, etc.</p> <p>e. Gather excessive information with direct URL, direct instruction, action sequence jumping and/or pages skipping.</p> <p>f. Gather sensitive information with Man-In-the-Middle attacks.</p> <p>g. Inject excess/bogus information with Session-Hijacking techniques.</p> <p>h. Replay gathered information to fool the applications</p>		
50	<p>Input Manipulation</p> <p>a. Verify that input validation is happening at client or server or both end.</p> <p>b. Find the limitations of the defined variables and protocol payload - data length, data type, construct format, etc.</p> <p>c. Use exceptionally long character-strings to find buffer overflows vulnerability in the applications. Concatenate commands in the input strings of the applications.</p> <p>d. Inject SQL language in the input strings of database-tiered web applications.</p> <p>e. Examine "Cross-Site Scripting" in the web applications of the system.</p> <p>f. Examine unauthorized directory/file access with path/directory traversal in the input strings of the applications.</p> <p>g. Use specific URL-encoded strings and/or Unicode-encoded strings to bypass input validation mechanisms of the applications.</p> <p>h. Execute remote commands through "Server Side Include".</p> <p>i. Manipulate the session/persistent cookies to fool or modify the logic in the server-side web applications.</p> <p>j. Manipulate the (hidden) field variable in the HTML forms to fool or modify the logic in the server-side web</p>		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
	<p>applications.</p> <p>k. Manipulate the "Referrer", "Host", etc. HTTP Protocol variables to fool or modify the logic in the server-side web applications.</p> <p>l. Use illogical/illegal input to test the application error-handling routines and to find useful debug/error messages from the applications</p>		
51	<p>Output Manipulation</p> <p>a. Retrieve valuable information stored in the cookies</p> <p>b. Retrieve valuable information from the client application cache.</p> <p>c. Retrieve valuable information stored in the serialized objects.</p> <p>d. Retrieve valuable information stored in the temporary files and objects.</p> <p>e. Retrieve bulk information/ multiple rows from database</p>		
52	<p>Information Leakage</p> <p>a. Find useful information in hidden field variables of the HTML forms and comments in the HTML documents.</p> <p>b. Find valuable information stored in the HTML source code on browser like Unencrypted View State</p> <p>c. Examine the information contained in the application banners, usage instructions, welcome messages, farewell messages, application help messages, debug/error messages, etc.</p>		
	PENTRATION TESTING		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
53	identify ways to exploit vulnerabilities to circumvent or defeat the security features of system components through manual process that may include the use of vulnerability scanning or other automated tools, resulting in a comprehensive report.		
54	Black Box Testing Scanning of all critical documents has to be taken up initially. For all the critical applications and data vendor is required to perform Black Box testing and thereby perform the penetration test to simulate an external hacking or cyber warfare attack both at Application layer as well as Network layer. The vendor shall also carry out the segmentation check		
55	White Box Testing With knowledge of the internal structure/design/implementation of the application/object allowed to be tested vendor shall perform the White Box testing both at Application layer as well as Network layer. The vendor shall also carry out the segmentation check.		
56	Gray Box Testing Successful vendor shall also perform Gray Box Testing both at Application layer as well as Network layer. The vendor shall also carry out the segmentation check		
57	In addition to the internal IS policy, IT H/w S/w guidelines, the selected bidder should adhere to all the applicable laws of land and rules, regulations and guidelines prescribed by various regulatory, statutory and Government authorities, multiple industry-accepted methodologies during the execution as following but not limited to the following :- <ul style="list-style-type: none"> · National Critical Information Infrastructure Protection Center (NCIIPC) · The National Institute of Standards and Technology ("NIST") Special Publication 800-115 · Cert-In Guidelines · PCI-DSS standards · IRDAI · Open Source Security Testing Methodology Manual ("OSSTMM") · OWASP Testing Guide · Penetration Testing Execution Standard · Penetration Testing Framework The OICL reserves the right to ascertain information from the other OICL and institutions to which the Bidders have rendered their services for execution of similar projects.		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
58	<p>Interim Reports & Post Execution Activities</p> <p>It is recommended that the report should contain any and all the findings that impact the security posture of the assessed entity even in cases where exploitation did not occur. In the testing phase, all relevant tests need to be conducted as per the project schedule and satisfactory report should be obtained from the concerned authorities of OICL before preparing it for execution. Potential risks posed by known vulnerabilities, ranked in accordance with NVD/CVSS base scores associated with each vulnerability.</p> <p>Note that external vulnerability scans must be performed and the risks ranked in accordance with the CVSS. Internal vulnerability scans should be performed by qualified personnel and risks ranked in accordance with the organization's risk-ranking process</p> <p>Both the external & internal vulnerability scan is to be conducted. An external vulnerability scan is to be conducted from outside the target organization. An internal vulnerability scan is to be conducted from inside the target organization. The details of IP etc must be shared before conducting the external vulnerability scan. Description of each vulnerability verified and/or potential issue discovered. More specific risks that vulnerability may pose, including specific methods how and to what extent it may be exploited. Examples of vulnerabilities include but are not limited to SQL injection, privilege escalation, cross-site scripting, or deprecated protocols etc.</p>		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
59	<p>Severity Scoring Since all the vulnerabilities identified may not have equal severity so in order to prioritize remediation of the penetration test findings, risk ranking is to be assigned for each detected security issue. The report should clearly document how the severity/risk ranking is derived. Vendor may refer the applicable industry standard or any suitable severity ranking mentioned below:-</p> <ul style="list-style-type: none"> · Common Vulnerability Scoring System (CVSS) · Common Vulnerabilities and Exposure (CVE) · Common Weakness Enumeration (CWE) · National Vulnerability Database (NVD) · Open Source Vulnerability Database (OSVDB) · Bugtraq ID (BID) <p>In case of custom scoring is adopted during the risk-ranking process, the report should clearly justify with acceptable reasoning for the modification of industry-standard scores and also in case of arriving at a score for a vulnerability that does not have an industry-standard score defined .</p>		
60	<p>Documentation of Identified vulnerability The report should contain all the details of the steps, test vectors, and exploited vulnerabilities that lead to positive and /or false positive penetration during testing for which remediation and retesting are required. It is also important to identify vulnerabilities that are not always exploitable but may pose a potential risk to the environment</p>		
61	<p>Recommendations Remediation recommendations to close the deficiencies identified. Detailed steps (wherever/whenever applicable) to be followed while mitigating the reported deficiencies. Security issues that pose an imminent threat to the system are to be reported immediately. In case the primary recommendation is not feasible for OICL to implement for any reason, vendor would give the alternate recommendations.</p>		

S.No	Requirements	Compliance (S/C/N)	Bidder's Remarks
62	<p>Retest after the interim report After the submission of interim report & recommendations, OICL would fix the identified vulnerability within the mutually agreed time period. Thereafter, vendor shall perform a retest to validate the newly implemented controls mitigate the original risk.</p> <p>The scope of a retest should consider whether any changes occurring as a result of remediation identified from the test are classified as significant. All changes should be retested; however, whether a complete system retest is necessary will be determined by the risk assessment of those changes. After the retest is performed the vendor shall submit its final report</p>		
63	<p>Tools & Resources All the software, hardware equipment like laptops, tools etc to carry out the assignment has to be brought by the Bidder at no extra cost. Bidder will use audit tools that are licensed and not the trial versions. In case of the same is of open source kind, vendor should ensure that there is no risk to OICL and its IT assets. Assessor should disclose the details of automated tools used for accomplishing the assessment process. The assessor must have the valid license of the said automated tool(s).</p>		

10.2 Appendix 2: Bill of Material

The format for Bill of Material is attached separately as a file "Appendix 2: Bill of Material"

10.3 Appendix 3: E Procurement System Process.

Login Process

1. Open Website : <https://eauction.auctiontiger.net>
2. Click on login
3. Enter Registered Email id and Password and Click on Login
4. In case of Forgot Password : click on Forgot password

Tender Submission Process

Follow the below mentioned steps:

1. After Login on the website, Click on the Search Rfx/Tender.
2. Download All the Document and go through it properly before proceeding to bid.
3. Click on Dashboard to start the bidding Process.
4. Click on "I Agree" to confirm your Participation.
5. Click on "Fill" to Submit your Details.
6. Please put your response as per the bid form requirement and Click on "Save"
7. Click on "Map Documents" to upload the required documents.
8. Click on Upload Document
9. Click on Browse and Select the document to upload.
10. Enter Document Brief and Click on Upload.
11. All Bidding form should be Mandatory to fill.
12. Click on Final Submission Tab after verifying all the submitted details in the Bid form and uploaded document
13. Click on Final Submission Button.
14. Click on "OK" from message box to proceed with final submission.
15. Final Submission Confirmation
